CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:
Affiliation with full address, contact numbers & Pin Code:
Residential address with Pin Code:
Mobile Number (s):
Landline Number (s):
E-mail Address:
Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION**REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**BOOKS**

A STUDY OF CORPORATE BOND MARKET IN INDIA AND ITS LIQUIDITY

HEMA GWALANI
ASST. PROFESSOR
ASHOKA BUSINESS SCHOOL
NASHIK

DR. D. B. BHARATI
DIRECTOR
RAJGAD INSTITUTE OF MANAGEMENT RESEARCH & DEVELOPMENT
KOTHRUD

ABSTRACT

Corporate Bond Market in India has not achieved the efficiency which the time demands. Various efforts have been taken by Government authorities by injecting reforms in the system. But in comparison to other financial securities and developed countries Bond Markets Indian Corporate Bond Market still stands inefficient. Liquidity is assumed to be one of the parameter of measuring the efficiency of the market as Liquid markets bring various benefits with it. This paper tries to provide a study of the corporate bond market in India and its liquidity. The paper studies the current Market position and various reasons listed out by the researchers for the subdued state. The second part of the paper focuses on the liquidity of the Market and tries to measure the Liquidity. Out of the various measures available Turnover ratio has been used to measure the liquidity of the corporate bond market in India in this paper. Though there is no single theoretically correct universally accepted measure to determine a markets degree of liquidity, market specific factor can be a good indicator and suggestive of the current state of the market if compared over a period of time.

KEYWORDS

Corporate Bond Market, Liquidity, Turnover Ratio, Outstanding securities.

INTRODUCTION**MEANING OF SECURITIES**

Though the term security has not been defined formally but in general it can be described as financial instruments and can be broadly categorized into debt securities, equity securities, and Derivative contracts. Debt Securities have been defined under chapter 1 of Securities And Exchange Board Of India (Issue And Listing Of Debt Securities) Regulations, 2008 as : "debt securities" means a non-convertible debt securities which create or acknowledge indebtedness, and include debenture, bonds and such other securities of a body corporate or any statutory body constituted by virtue of a legislation, whether constituting a charge on the assets of the body corporate or not, but excludes bonds issued by Government or such other bodies as may be specified by the Board, security receipts and securitized debt instruments.

CORPORATE BONDS

In broader terms Corporate bonds are fixed income securities issued by corporate i.e. entities other than Government. Corporate bonds are debt securities issued by private and public corporations.

Corporate Bond Market in India and need for the development Market is a place where the buyer and seller meet together to meet each other's demand. When it comes to securities market, It is the place where the buyers and seller come together to meet the objective of creating securities from sellers point of view and buying and trading securities from buyers point of view.

Corporate Bond Market is the market where the corporate bonds are created and traded. When it comes to the Corporate Bond market in India it is in existence in real sense since December 2003, with the amendment in disclosure norms to make listing of companies made mandatory and with an initiative to provide a similar trading system for the bond market as like equity market. The objective being to provide a platform for corporate and investors to exchange and fulfill their needs i. e. mobilizing the funds at affordable rate in case of corporate and for investors a good investment with good long term returns at less risk. So far the corporate bonds market has failed to achieve the desired objective; it considerably lags in point of time. The secondary debt market in India is practically non-existent.

Various studies have been made in past and recently as well to study the reasons and various reforms have also been suggested through these studies. Serious effort has been made by government to match with the expectations; still the results are not so visible, which creates a need of study.

REVIEW OF LITERATURE

India needs to develop a corporate debt market to meet the projected investment of USD 1 trillion required to sustain the country's economic growth rate in the 12th Five-Year Plan (2012-2017)

These are the comments of Prime Minister Manmohan Singh in his speech on Wed Feb 16 2011 realizing the need for a vibrant corporate debt market in India.¹ The Corporate Debt Market in India has not reached the levels which the time demands. The various benefits which a developed corporate bond brings have been the reason for the attention on the issue. It's not the first time that the need for corporate bond markets has been arised and expressed. The literature shows that the issue of development of corporate bond market has been the point of attraction not only in India but in the world since way back.

Tadashi Endo, Financial Markets Advisory Department, International Finance Corporation, The World Bank Group in his paper 'The Development of Corporate debt markets'² (2000) at world level or the Indian researchers Dr. R H Patil in his working paper 'Broad basing and Deepening the Bond Market in India'³ (2001-02), Suchismita Bose and Dipankor Coondo⁴ (2003) and Pronab Sen, Nikhil Bahel and Shikhar Ranjan in the working paper series of Planning Commission, Government of India 'Developing the Indian Debt Capital Markets: Small Investor Perspective'⁵ (2003) studied the various benefits of a developed corporate bond market and also the reasons for an underdeveloped Corporate Bond Market and also suggested the various measure for the development.

The above study shows the importance of the development of Corporate Bond markets in India and also the importance of the role of small investor in the process and justifies the selection of the topic by the researcher. The period after 2005 saw a considerable amount of policy changes in the system towards development. Some of the important developments being

- 1) 2006-07, Acceptance of, recommendations of the Report of the High Level Expert Committee on Corporate Bonds and Securitization for creating a single, unified exchange traded market for corporate bonds.
- 2) December 2006, SEBI permitted BSE to set up a reporting platform. Access to the platform for reporting was given to all market intermediaries. Non-members of the Exchange were provided connectivity through Virtual Private Network (VPN).
- 3) January 2007, BSE operationalised its reporting platform to capture information related to trading in corporate bond market.
- 4) July 2007, BSE and NSE trading platforms became operational.
- 5) April-May 2008, SEBI discussed with the stock exchanges BSE and NSE on introduction of mandatory clearing and settlement for trades in corporate bonds.

- 6) February 2009, the first public issue of non-convertible debt securities
- 7) May 2009, SEBI put in place the simplified listing agreement for debt securities.
- 8) August 2011, SEBI amended the Regulations for Mutual Funds, permitting Mutual Funds to set up Infrastructure Debt Funds under the Mutual Funds Framework.⁶

All these necessary policy reforms were taken considering the need of development of corporate debt market in India. The same was also expressed by various researchers in the same period.

'Why a corporate bond Market: growth and direct finance' by Marvin Goodfriend overviewed the role of direct corporate borrowings verses bank loans in the process of economic development.⁷

During the same period Dr. Y V Reddy Governor, Reserve Bank of India gave remarks at Washington in October 2007 that the development of a corporate bond market in India has lagged behind in comparison with other financial market segments and also that the secondary market has not developed and market liquidity has been an issue.⁸

A similar observation was presented in 'The Indian Corporate Debt Market: Prescription for revival' in 2007 by Tamal Datta Chaudhari by showing a comparative picture of a subdued Indian corporate bond market with Government Bonds in India and also with Size of Domestic Corporate debt market as percentage GDP showing outstanding Corporate Bonds to be only 3.3% of GDP as compared to 128.8 per cent of United States. (Based on BIS 2006).⁹

Further the reasons for the failure of corporate Debt Market in India were also discussed in 'The Indian Corporate Debt Market – Need of the hour' Various steps taken to tackle such problems have resulted only in a slight improvement. The Corporate debt market in India has reached only 6.5 per cent of GDP as compared to 3.3 per cent in 2006. But is negligible as compared to government debt sector which is nearly 40 per cent of GDP.¹⁰

In India banks accounted for 14.4% of the financing of large firms in 2000-01, which went up to 17.8% in 2010-11. But the bond market stagnated, with 3.5% in 2000-01 and 3.9% a decade later.¹¹

Though it is clear from the above literature and the available data that the Indian Corporate Bond market has not been so efficient, it can further be tested by measuring the liquidity of the market as well. Liquidity has been considered as one of the parameter of efficiency by many researchers like Abdourahmane Sarr and Tonny lybek , (2002) Measuring liquidity in Financial Markets, Working Paper Series, International monetary Fund¹⁴ and also by Dr. Venkat R. Eleswarapu, and Dr. Chandrasekar Krishnamurti in liquidity, stock returns and ownership structure: An empirical study of the Bombay stock exchange.¹³

OBJECTIVES OF THE STUDY

- To study the Meaning types and features of Corporate Bonds and the Corporate Bond Market in India.
- To study the public issues and trading pattern of Corporate bonds in Corporate Bond market in India.
- To study the term liquidity and to measure the liquidity of Corporate Bond Market in India with the help of Turnover ratio -one of the tools available.

HYPOTHESES

The Indian corporate bond market is poor in liquidity.

INDIAN CORPORATE BOND MARKET – AN OVERVIEW

There has been a development in the field of Corporate Bond Markets of India though various reforms and policy changes but it has been very slow and the Corporate Bond Market Still remains underdeveloped.

The Number of Public Issues and amount collected can be said to be the representative of the underdeveloped market.

TABLE 1: PUBLIC ISSUES AND TRADING VOLUMES OF NON-CONVERTIBLE DEBENTURE

Year	Number of Issues	Amount	Number of securities traded	Number of trades	Traded Value (Rs. In cr.)
2008-09	1	1500	2543	4967	50029
2009-10	3	2500	5559	12231	156616
2010-11	10	9451	4504	8006	155951
2011-12	20	35611	5401	9798	176609
2012-13 (figures till Sept.2012)	6	2223	5728	9984	106272

Source: http://www.sebi.gov.in/cms/sebi_data/statistics/corporate_bonds/publicissuedata.html

http://www.nseindia.com/products/content/debt/corp_bonds/cbm_trades_archives.htm

Various reasons for this subdued state of market can be summarized as follows

- Market restricted to only highly rated issues, with pension funds, commercial banks and insurance companies as investors.
- Absence of transparency, regulatory autonomy Trustworthy and transparent benchmarks and Liquidity
- Credit risk and interest risk
- Absence of liquid market for Credit default swaps
- High Stamp duty
- High costs of funds as a key deterrent to growth of Indian corporate bond market.
- Key factors alleviating cost of funds being liquidity and transparency
- Information asymmetry, liquidity and lack of market making

To overcome the above difficulties many measures have been suggested and have been introduced on to the system as reforms. Even though the efforts are not getting the expected results the process has not been stopped as the purpose brings various benefits to the economy of the country.

NEED FOR THE DEVELOPMENT OF CORPORATE BOND MARKET

To achieve the expected GDP growth of Indian Economy, Development of Corporate Bond Market has been the high priority agenda of the Government this being the highly untapped market. Many such reforms are taking place since 2007 in full force but are not generating the expected results. The time has come for better reforms which will attract small investors not only to achieve the above mentioned reason but also to support the banking system in the country which facing the big problem of – Asset Liability Mismatch.

It can be seen that the private placement route has been the most preferred route by the issuers for the benefits of low cost but with the limited scope it has the issuers need to fine the alternative source. Looking at the Indian saving statistics the one area which the researcher feels to be the opportunity is the household sector, the small investors.

LIQUIDITY OF CORPORATE BOND MARKET IN INDIA

Market liquidity is a multifaceted Concept and is characterized by many dimensions like depth, breadth tightness etc. Many traditional measures can be useful to measure the same like Bid –ask spread, turnover ratios and even price based indicators.

Liquid markets bring various benefits with it like improved allocation of finance, stable monetary mechanism, and support to financial institutes to manage larger asset liability mismatch, and making it more attractive for the investors. Though the last benefit may not stand true when taken collectively, as per Keynes.¹⁴

An effort has been made in this paper to judge the liquidity of the Indian corporate debt Market. A financial Asset is said to be liquid if it can be sold even in large quantities without affecting the price much. Though there is no single theoretically correct universally accepted measure to determine a markets degree of liquidity, market specific factors can be a good indicator. Out of the various measures available Turnover ratio has been used to measure the liquidity of the corporate bond market in India in this paper. The turnover ratio which is derived by the following equation gives an indication of the number of times the outstanding volume of the assets changes hands.

$$\text{Turnover ratio} = \text{Quarterly trading} / \text{outstanding securities}$$

Turnover and trading volume are couple of reflectors of the depth of the market. Trading Volume measures the market participants and the transactions. If outstanding volumes are considered along with trading volumes it becomes more meaningful tool of measuring the liquidity. The outstanding securities are the securities currently held by investors.

TABLE 2: NO OF TRADES, TRADING AMOUNT, NET OUTSTANDING AND TURNOVER RATIO

Quarter Ended	No. of Trades	Trading Amount (Rs. In cr.)	Net Outstanding Amount (Rs in Crores)	Turnover Ratio
June 2010	14519	193963.12	794022.20	0.24427922

As can be seen the secondary debt market in India is practically non-existent. The number of trades and the trading volumes are persistently low as compared to the developed market like US where the average daily trading volume was \$22 billion (Quarter 2 2012).¹⁸

CHART 1: TRADING TRENDS IN INDIAN CORPORATE BOND MARKET

From the chart number 1 it can be observed that the trading amount has been over a selected period has moved up from a small range. Though the net outstanding amount has an increasing trend that to a higher rate. Net outstanding amount is obtained by adding the new issued amount and deducting the redemption amount from the opening net outstanding amount.

CHART NO 2: TURNOVER RATIO

As like other emerging markets the Turnover ratio of Indian Corporate Bond market is also well below one¹⁹. This indicates the liquidity being drastically low. It can be for various reasons discussed by various researchers and as discussed in literature review part.

CONCLUSION

A well developed corporate bond market brings various benefits in to the economy. The need has been felt in India as well and the necessary actions have been taken through reforms. But the reforms do not seem to get the intended results. The poor liquidity of the Indian Corporate Debt Market suggests the reforms have failed to achieve the intended objective. The persistently low trading volumes, turnover ratio and the increasing net outstanding corporate bond amount hint the same. Few more investor friendly reforms are required to be injected in the system to derive the benefit.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail i.e. infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
