CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF _____.

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Education/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the authors have seen and agreed to the submitted version of the manuscript and their inclusion of names as co-authors.

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR

Designation :
Institution/College/University with full address & Pin Code :
Residential address with Pin Code :
Mobile Number (s) with country ISD code :
WhatsApp or Viber is active on your above noted Mobile Number (Yes/No) :
Landline Number (s) with country ISD code :
E-mail Address :
Alternate E-mail Address :
Nationality :

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.
- g) The author (s) name or details should not appear anywhere on the body of the manuscript, except the covering letter and cover page of the manuscript, in the manner as mentioned in the guidelines.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers**, and **email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, funding institutions, etc., if any.
5. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.
6. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aeaweb.org/econlit/jelCodes.php
7. **KEYWORDS:** JEL Code must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. **It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.**
9. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
10. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
11. **MAIN TEXT:** The main text should follow the following sequence:
 - INTRODUCTION
 - REVIEW OF LITERATURE
 - NEED/IMPORTANCE OF THE STUDY
 - STATEMENT OF THE PROBLEM
 - OBJECTIVES
 - HYPOTHESES
 - RESEARCH METHODOLOGY
 - RESULTS & DISCUSSION
 - FINDINGS
 - RECOMMENDATIONS/SUGGESTIONS
 - CONCLUSIONS
 - LIMITATIONS
 - SCOPE FOR FURTHER RESEARCH
 - REFERENCES
 - APPENDIX/ANNEXURE

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.
12. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure**. **Sources of data should be mentioned below the table/figure**. It should be ensured that the tables/figures are referred to from the main text.
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parentheses, horizontally centered with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word should be utilized. If any other equation editor is utilized, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that do not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on first use in each section: Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. Also check to make sure that everything that you are including in the reference section is cited in the paper. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - Headers, footers, endnotes and footnotes may not be used in the document, but in short succinct notes making a specific point, may be placed in number orders following the references.

A SCIENTIFIC APPROACH USING FUZZY LOGIC IN OPERATIONS MANAGEMENT

B. V. MANIKANTA**LECTURER****DEPARTMENT OF MATHEMATICS****ERITREAN INSTITUTE OF TECHNOLOGY****ERITREA****S. RANJETH KUMAR****ASST. PROFESSOR****ERITREAN INSTITUTE OF TECHNOLOGY****ERITREA****O. SIVAREDDY****LECTURER****ERITREAN INSTITUTE OF TECHNOLOGY****ERITREA****ABSTRACT**

This paper discusses the role of Quantitative Network Analysis in Business Management. How the business organizations can use those as business applications and competitive advantage tools. This paper will attempt to demonstrate project management. Any organization involves planning, scheduling, and controlling a number of inter related activities with use of limited resources, namely men, machines, materials, money and time. The projects may be extremely large and complex such as construction of a power plant, a highway, shopping complex, ships and air craft's, introduction of new products and research and development projects. It is required that managers must have dynamic planning and scheduling system to produce the best possible results and also to react immediately to the changing conditions and make necessary changes in the plan and schedule. Convenient analytical and visual techniques such as shortest route (SR), Minimal Spanning Tree (MST), prove extremely valuable assisting the managers managing the projects.

KEYWORDS

Competitive advantage, Planning, scheduling, Controlling, Shortest route (SR), Minimal Spanning Tree (MST).

1. INTRODUCTION

This study discusses the Network analysis in Business Management. It is a scientific approach to Managerial decision making. How the Business Organizations can be successful by use of Network analysis. This would help the Organization in solving complex problems on time, with greater accuracy and in the most economical way.

The Minimum Spanning Tree (MST) problem is to find a least cost spanning tree in an edge weighted graph. The efficient polynomial-time algorithms to solve MST problems have been developed by [5] and [8]. In the real world, MST problems are usually seen in network optimization. For instance, when designing a layout for telecommunication systems, if a decision maker wishes to minimize the cost for connection between cities, it is formulated as an MST problem. As other examples, the objective is to minimize the time for construction or to maximize the reliability.

Most research papers with respect to MST problems have been dealt with the case where each weight is constant. However, in order to investigate more realistic cases, it is necessary to consider the situation that one makes a decision on the basis of data in or construction often depends on economical environments which vary randomly, and experts often estimate the value of the cost not as a constant but as an ambiguous value. In order to take account of such situations, we shall deal with minimum spanning tree problems where each edge weight is a fuzzy random variable. We call it a Fuzzy Random Minimum Spanning Tree (FRMST) problem.

A fuzzy random variable was first defined by [6]. Recently, some researchers [3, 9] considered fuzzy random linear programming problems. We could take various approaches to an FRMST problem according to the interpretations of the problem. In this paper, we take a possibilistic and stochastic programming approach, which is based on the idea provided in [3]. As it is shown later, the formulated problem is transformed into the deterministic equivalent nonlinear maximum ratio spanning tree problem, which is generally an NP-hard problem. In order to obtain an approximate optimal solution, we employ a solution method through TS [1, 2].

Today, several quantitative techniques are available to solve managerial problems and use of these techniques helps to managers become explicit about their objectives and provides additional information to select on optimal decision. This study presents with variety of these techniques with real life problem areas. Use of past data in a systematic manner and constructing it into a suitable model for future use comprises a major part of quantitative techniques. There are many quantitative algorithms like Kruskal's [5] and Prim's [8] etc. That has been developed to determine and analyze the problems. In this paper we use Kruskal's with Fuzzy random edge weights.

2. MST PROBLEM WITH FUZZY RANDOM EDGE WEIGHTS

Consider a connected undirected graph $G = (V, E)$ where $V = \{v_1, v_2, \dots, v_n\}$ is a finite set of vertices representing terminals, telecommunication stations or regional computer stations etc, and

$E = \{e_1, e_2, \dots, e_m\}$ is a finite set of edges representing connections between these terminals or stations. Let T be spanning tree in the graph G . Let $x = (x_1, x_2, \dots, x_m)$ denote its characteristic vector defined by

$$x_i = \begin{cases} 1 & \text{if } e_i \text{ is an edge of } T \\ 0 & \text{otherwise} \end{cases} \quad i = 1, 2, 3, \dots, m$$

In this paper, we consider an MST problem involving fuzzy random weights as follows

$$\begin{cases} \min \bar{c}x \\ \text{s.t. } x \in X \end{cases}$$

Where $x = (x_1, x_2, \dots, x_m)^T$ is a decision variable column vector $C = (c_1, c_2, \dots, c_m)$ is a coefficient vector and X stands for the set of characteristic vectors representing all possible spanning trees of the graph G .

Each C_j is a fuzzy random variable with the following membership function.

$$\mu_{c_j}(t) = \begin{cases} \max \left\{ 0, 1 - \frac{\bar{c}_j - t}{\alpha_j} \right\}, & \text{if } t \leq \bar{c}_j \\ \max \left\{ 0, 1 - \frac{t - \bar{c}_j}{\beta_j} \right\}, & \text{if } t \geq \bar{c}_j \end{cases} \quad j = 1, 2, \dots, m$$

Where \bar{c}_j denotes a random variable, whose realization under scenario s is $C_{j,s}$, parameters α_j and β_j denote the left and right spread of a fuzzy number,

$$\sum_{s=1}^s p_s = 1$$

respectively. Let p_s be the probability that a scenario s occurs, and let s denote the number of scenarios. We assume that holds.

Since the coefficients of the objective function are triangular fuzzy random variables, the objective function also becomes the same type of fuzzy random variable y with the following membership function.

$$\mu_{\bar{y}}(y) = \begin{cases} \max \left\{ 0, 1 - \frac{\sum_{j=1}^m \bar{c}_j x_j - y}{\sum_{j=1}^m \alpha_j x_j} \right\}, & \text{if } y \leq \sum_{j=1}^m \bar{c}_j x_j \\ \max \left\{ 0, 1 - \frac{y - \sum_{j=1}^m \bar{c}_j x_j}{\sum_{j=1}^m \beta_j x_j} \right\}, & \text{if } y \geq \sum_{j=1}^m \bar{c}_j x_j \end{cases}$$

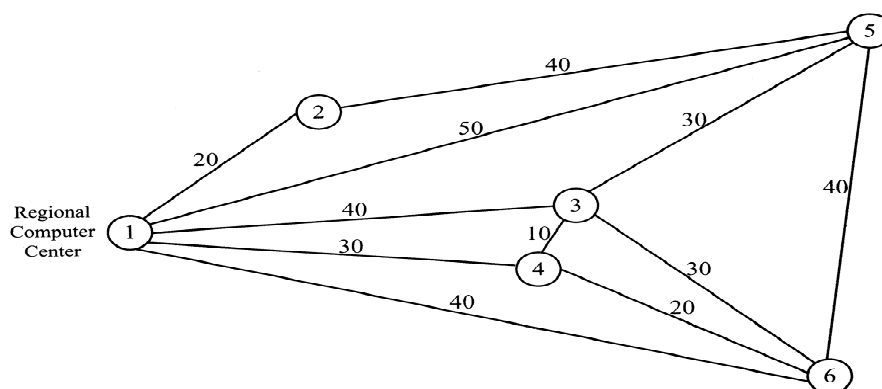

Considering the impression or fuzziness of the decision maker's judgment, for each objective function of problem, we introduce a fuzzy goal \bar{G} with the membership function expressed as

$$\mu_{\bar{G}(y)} = \begin{cases} 0 & , y > g^0 \\ \frac{y - g^0}{g' - g^0}, & g' \leq y \leq g^0 \\ 1 & , y < g' \end{cases}$$

3. AN EXAMPLE PROBLEM

The Southwestern Regional Computer Center must have special computer communication lines installed in order to connect five satellite users with a new central computer. Because the lines are expensive, the computer center's management wants the total length of the new communication lines to be as small as possible. While the central computer could be connected directly to each user, it appears to be more economical to install a direct line to some users and let other users tap into the system by linking up with the users who are already connected to the system. The network shown in Figure 1 shows us the links being considered between the regional computer center and the satellite users. The distance, in miles, between locations is shown above the associated with edges. Note that the network has 6 vertices and 11 edges.

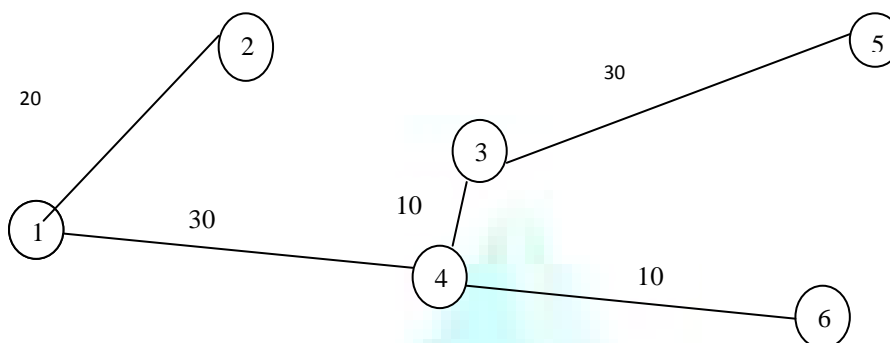

FIGURE 1: COMMUNICATIONS NETWORK FOR THE REGIONAL COMPUTER SYSTEM

Here $E = \{20, 40, 30, 40, 40, 50, 30, 10, 30, 20, 40\}$ and $X = \{1, 2, 3, 4, 5, 6\}$ by using the above fuzzy random edges weights if the edge is in MST it is 1 otherwise 0, finally the MST of the above problem is

i.e. $X_1 = 1$ then $\text{Min}\{20, 50, 40, 30, 40\} = 20$ then the edge is in MST it is 1 similarly it is searching to every X_i , where $i = 1, 2, 3, 4, 5, 6$ at last we get the following MST

FIGURE 2

The above MST Figure 2 is minimized the length of new communication lines, now the length is 110kms.

4. CONCLUSION

It is very useful to minimize the cost and time and maximizes the profit of the project for all Network projects. Using this technique manager can take decision quickly and it is useful to give a bid value for the project he can send the bid quickly.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

The responsibility of the contents and the opinions expressed in this journal is exclusively of the author (s) concerned.

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
