#### **NOTES:**

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:  
**New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)**
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
  - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use **(ed.)** for one editor, and **(ed.s)** for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parentheses.
  - The location of endnotes within the text should be indicated by superscript numbers.

**ABSTRACT**

The use of digital media is rapidly increases. Every printed media is converting into digital form. It is necessary to compress images or videos due to the growing amount of visual data to make efficient transfer and storage of data. Visual data is stored in form of bits, which represents pixels. An image often contains redundant and/or irrelevant data. Redundancy is the statistical properties of an image and irrelevancy is the subject/viewer perception of an image. These redundancies are reduced through different techniques during the compression. The main purpose of compression is to reduce the number of bits as much as possible. It also maintains the visual quality of the reconstructed image close to the original image. JPEG is one of the image compression algorithms. It is the best or excellent algorithm for image compression. This algorithm can be adjusting the image compression ratio. That is the main features of the image compression algorithm.

**KEYWORDS**

Redundancy, Pixel, Compression, Reconstruct, Visual Data.

**1. INTRODUCTION**

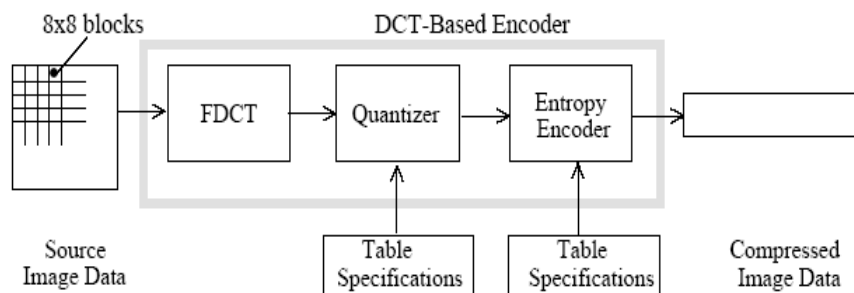

The Joint Photographic Experts Group developed the JPEG algorithm in the late 1980's and early 1990's. JPEG standard has been established by International Standards Organization (ISO) and International Electro-Technical Commission (IEC). The performance of these coders generally degrades at low bit rates mainly because of the underlying block-based Discrete Cosine Transform (DCT) scheme.

**2. JPEG IMAGE COMPRESSION PROCESS**

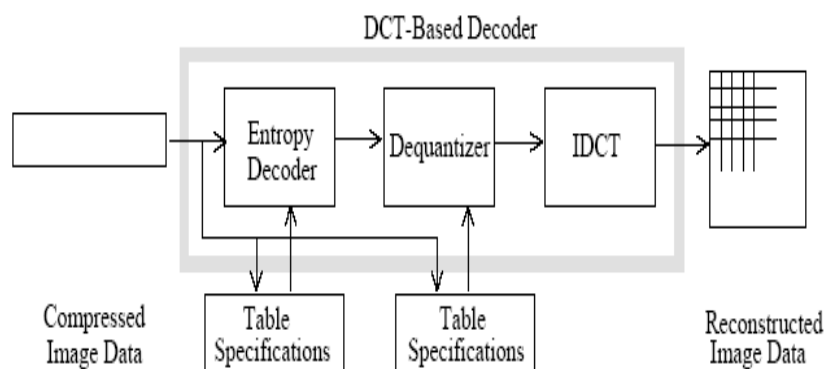

A different set of standards has to be created for compressing images of any size. Joint Photographic Expert Group is the first standard, which is known as JPEG and it is most widely used one. It is a very simple and easy to use standard that is based on the Discrete Cosine Transform (DCT). In JPEG compression there are main two processes: Encoder and Decoder.

Below figure shows the block diagram of JPEG Encoder and JPEG Decoder.

**FIG-1: DCT BASED ENCODER PROCESS**

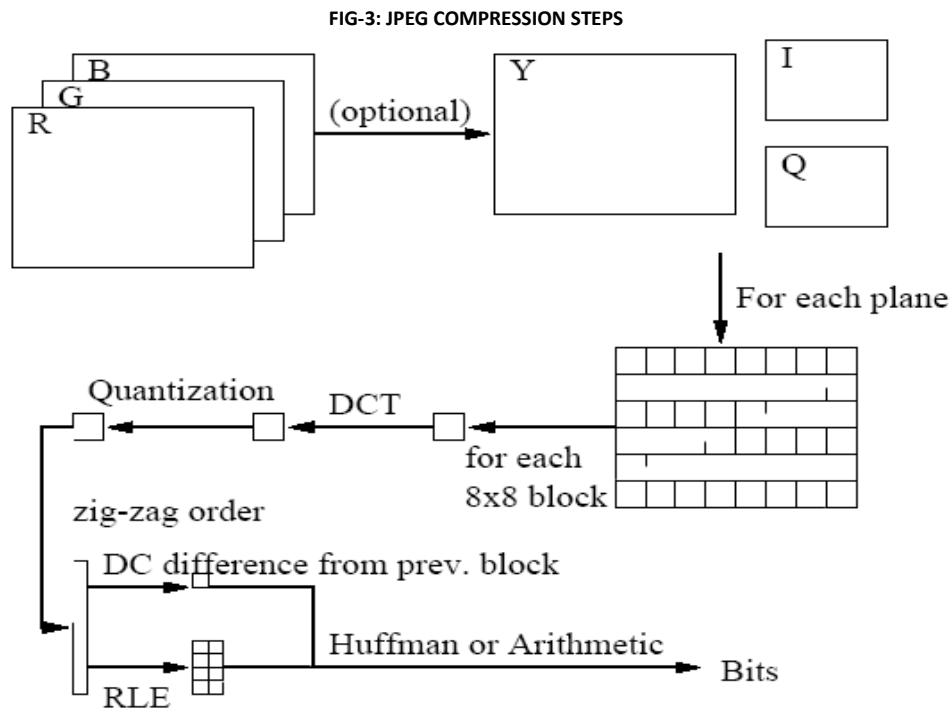

**FIG-2: DCT BASED DECODER PROCESS**

JPEG is a lossy compression scheme for color and gray scale images. It works on full 24-bit color. It is designed to be used with photographic material and naturalistic artwork. It is not the ideal format for line-drawings, textual images, or other images with large areas of solid color or a very limited number of distinct colors. Below figure shows the step in JPEG image compression process.

The input to JPEG is three color planes of 8-bits per-pixel each representing Red, Blue and Green (RGB). These colors are used by hardware to generate images.

### 3. JPEG ALGORITHM

JPEG compression and decompression process consist of four distinct and independent steps.

Step – 1 : Divide the Image

In this step image is divided into 8 x 8 pixel blocks.

Step – 2 : Conversion to the Frequency Domain

In this step Discrete cosine Transform is applied to each block to convert the information from the spatial domain to the frequency domain.

Step – 3 : Quantization

In this step the frequency information is quantized to remove unnecessary information.

Step – 4 : Entropy Coding

In this step final bit stream is compressed by using standard compression techniques. The report will analyze the compression of a gray scale image, and will then extend the analysis to decompression and to color images.

### 4. EXPERIMENTAL STUDY

JPEG image compression algorithm experiment is performed on gray scale image Boat and Barbara and color image Mandrill and Peppers image. In our experiment we perform this study on different image quality level such as 20%(Low Quality), 40%(Good Quality), 60%(Better Quality) and 80%(Great Quality). Below images represent the original images and different image quality level with original image and compressed image.

**FIG-4: ORIGINAL BOAT AND BARBARA IMAGES**

FIG-5: IMAGE QUALITY LEVEL AND COMPRESSED IMAGES OF BOAT AND BARBARA

FIG-14: QUALITY LEVEL V/S COMPRESSION TIME OF MANDRILL IMAGE CHART

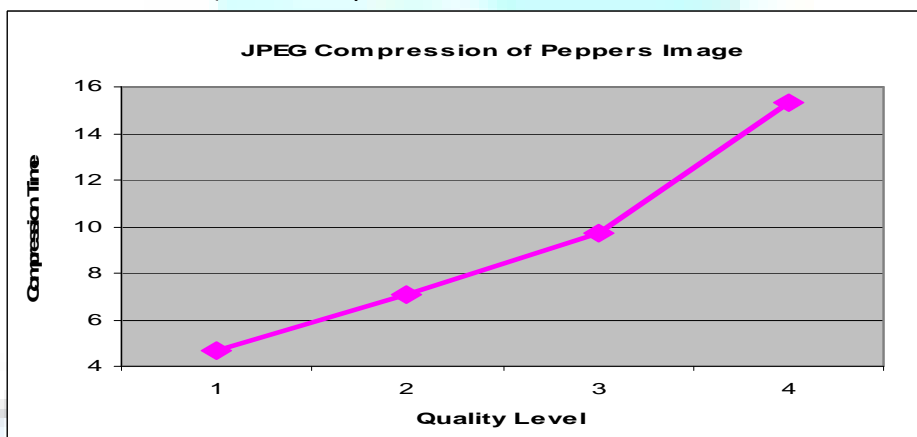

FIG-15: QUALITY LEVEL V/S COMPRESSION TIME OF PEPPERS IMAGE CHART

In above chart quality level-1 represent 20% quality; level-2 represent 40% quality; level-3 represent 60% quality and level-4 represent 80% quality level.

**5. CONCLUSION**

From the experimental study of different images at different image quality level, it concludes that when you increase the image quality level, the compressed image size is also increase which is shown in above table. When you increase the image quality level, the image compression time required is also increase which is shown in above table.

As per user requirement the size and quality of the final image or compressed image can be determined. Image can highly compressed with less quality or less compressed with high quality. Here the quality and size are the opposite of each other.

## **REQUEST FOR FEEDBACK**

**Dear Readers**

At the very outset, International Journal of Research in Computer Application and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com).

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
