CONTENTS

Sr. No.	TITLE & NAME OF THE AUTHOR (S)	Page No.
1.	THE LEADERSHIP PRACTICES OF COMBINED ARMY ACADEMY'S DEAN <i>MATEBE TAFERE</i>	1
2.	ELECTRONIC GROCERY SHOPPING: MODELS AND METHODS FOR THE URBAN CONSUMER DELIGHT <i>AMOL RANADIVE & DR. HRUDANAND MISHRA</i>	6
3.	STUDY ON IMPLEMENTING ASSOCIATION RULE MINING IN PARTICLE SWARM OPTIMIZATION <i>T. BHARATHI & DR. P. KRISHNAKUMARI</i>	10
4.	KEY FACTORS TO DEVELOP WOMEN ENTREPRENEURS IN NELLORE (DT), ANDHRA PRADESH <i>A.M.MAHABOOB BASHA, P.SRI SUDHA & V.MADHAVI</i>	18
5.	LAND USE AND LAND COVER DETECTION FOR THREE DECADES USING GIS AND RS -A CASE STUDY OF ERODE DISTRICT <i>C. LALITHA & DR. S. P. RAJAGOPALAN</i>	21
6.	APPRAISAL OF LIQUIDITY PERFORMANCE IN LANCO INDUSTRIES LIMITED: A CASE STUDY <i>N. K. PRADEEP KUMAR & P. MOHAN REDDY</i>	25
7.	ORGANIZATIONAL CULTURE AS A DETERMINANT OF CUSTOMER SERVICE DELIVERY IN LOCAL AUTHORITIES IN KENYA <i>ROBERT K.W. EGESSA, PETER KIBAS & THOMAS CHERUIYOT</i>	30
8.	EMPLOYEE JOB SATISFACTION: A CASE STUDY ON ONGC <i>DR. MEGHA SHARMA</i>	35
9.	SUPPLY CHAIN MANAGEMENT: A STUDY OF PADDY IN ANDHRA PRADESH <i>DR. I. SAI PRASAD</i>	39
10.	PERFORMANCE APPRAISAL PROCESS AT ANDHRA PRADESH STATE ROAD TRANSPORT CORPORATION (APSRTC) <i>RAKHEE MAIRAL RENAPURKAR & DR. SUDHAKAR B INGLE</i>	44
11.	DETECTION OF BRAIN TUMOR USING THRESHOLDING AND MORPHOLOGICAL OPERATIONS <i>SHRIJA MADHU & T.M.SIRISHA</i>	51
12.	ANTECEDENTS OF CUSTOMER RELATIONSHIP MANAGEMENT AND ITS IMPACT ON CUSTOMER LOYALTY IN BANKING SECTOR <i>V.KRISHNAMOORTHY & DR. R. SRINIVASAN</i>	54
13.	ASSESSMENT OF CUSTOMERS' SERVICE EXPECTATIONS AND PERCEPTIONS IN GEM HOSPITAL: GAPS MODEL <i>V. KANIMOZHI & DR. R. ANITHA</i>	60
14.	IMPACT OF CLOUD COMPUTING ON INDIAN SMEs: ADOPTION, BENEFITS AND FUTURE SCOPE <i>NAZIR AHMAD & JAMSHED SIDDIQUI</i>	64
15.	A STUDY ON THE EFFECTIVENESS OF TRAINING AND DEVELOPMENT PRACTICES ON THE BASIS OF LEVEL OF TRUST, COMMUNICATION AND MORALE OF EMPLOYEES AT LIBERTY SHOES LIMITED <i>DR. VANDANA KHETARPAL & REETI ATREJA</i>	67
16.	A SURVEY OF THE DIMENSIONALITY REDUCTION TECHNIQUES IN DATA MINING: A REVIEW PAPER <i>TARANMEET KOUR, AMITPREET KOUR & DR. SANDEEP SHARMA</i>	73
17.	AN IMPERATIVE STUDY ABOUT HUMAN COMPUTER INTERACTION: TRENDS AND TECHNOLOGIES <i>DR. ASHU GUPTA & SAKSHI DUA</i>	76
18.	A REVIEW ON THE COST MANAGEMENT STRATEGIES ADOPTED BY AIRLINES GLOBALLY <i>DR. BINDU NAIR</i>	81
19.	APPLICATION OF ARTIFICIAL BEE COLONY ALGORITHM TO INDEPENDENT COMPONENT ANALYSIS <i>AMRESH KUMAR SINGH</i>	84
20.	ACTIVITY BASED COSTING & TRADITIONAL COST ACCOUNTING SYSTEM: A COMPARATIVE STUDY OF OVERHEAD COST ALLOCATION <i>MONIKA KHEMANI</i>	93
21.	E-MARKETING: CHALLENGES AND OPPORTUNITIES <i>RUCHIKA NACHAAL</i>	97
22.	PERFORMANCE EVALUATION OF TURKISH PENSION FUNDS BY USING ELECTRE METHOD <i>HASAN UYGURTÜRK</i>	100
23.	FROM CHANGE MANAGEMENT TO CHANGE READINESS: KEYS TO SUCCESSFULLY IMPLEMENTING CHANGE <i>AJIT KUMAR KAR & LOPAMUDRA PRAHARAJ</i>	108
24.	A STUDY TO MAXIMIZE INTERPERSONAL EFFECTIVENESS TO OVERCOME GENERATION GAP USING AURA AS A TOOL <i>V. VAIDEHIPRIYAL & DR. N. RAMKUMAR</i>	113
25.	APPLICATION OF ROLE OF PROFESSIONAL MARKETING MANAGERS IN A DYNAMIC BUSINESS ENVIRONMENT <i>DR. ABDULSALAM JIBRIL & DR. MUHAMMAD ISA BAZZA</i>	118
26.	ANALYSIS OF CORPORATE SOCIAL DISCLOSURE PRACTICES IN ANNUAL REPORTS: AN EXPERIENCE WITH THE PRIVATE COMMERCIAL BANKING SECTOR OF BANGLADESH <i>SHARMIN SHABNAM RAHMAN</i>	122
27.	M-LEARNING CONTEXTS COUPLED WITH CONNOTATION OF 4G CONNECTIVITY <i>B.AYSHWARYA & M.DHANAMALAR</i>	130
28.	IMPORTANCE OF OPEN ACCESS IN FLOW OF INFORMATION: WITH SPECIAL EMPHASIS ON RESEARCH <i>A. SIVA KESAVULU & B.DEENADHAYALU</i>	133
29.	VIRTUAL LEARNING ENVIRONMENT: ISSUES AND SUGGESTIONS <i>SUNIL KUMAR SHARMA</i>	136
30.	THE IMPACT OF INTEREST RATES ON THE PERFORMANCE OF BANKS: A CASE STUDY OF CANARA BANK AND HDFC BANK <i>MANASA ELURU, SAHLE YEIBIYO ASGHEDE & SHIFERAW MITIKU TEBEKA</i>	139

CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled '_____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:
Affiliation with full address, contact numbers & Pin Code:
Residential address with Pin Code:
Mobile Number (s):
Landline Number (s):
E-mail Address:
Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION**REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.
- Hunker, H.L. and A.J. Wright (1963), "Factors of Industrial Location in Ohio" Ohio State University, Nigeria.

M-LEARNING CONTEXTS COUPLED WITH CONNOTATION OF 4G CONNECTIVITY**B.AYSHWARYA****LECTURER****DEPARTMENT OF COMPUTER SCIENCE****KRISTU JAYANTI COLLEGE****BANGALORE****M.DHANAMALAR****LECTURER****DEPARTMENT OF COMPUTER SCIENCE****KRISTU JAYANTI COLLEGE****BANGALORE****ABSTRACT**

An immense deal of consideration has been given in recent times to the prospective applications of mobile devices in educational environments. The evolution to 4G (fourth generation mobile technology) with its enhanced technical features and cost efficiency provides a unique opportunity for developing applications focused on the modern requirements of learners and facilitators. It is widely predictable that portability, coverage, and access to mobile networks (among other elements) prove great potential for the exploration of a wide range of applications of this technology in education. At the same time, significant research is necessary in order to understand the psychological, ergonomic, organizational, and social factors that conclude how people interact with and function using these networks in learning environments. This article proposes research strategies intended to integrate the technical, educational, and usability aspects of mobile technology in education and briefly discusses the potential of 4G as a detonator of converging and appropriate m-learning applications.

KEYWORDS

M-Learning; 4G Networks; Educational Technology

I INTRODUCTION

The hi-tech development of wireless networks and their fiery penetration in practically all regions of the world has shaped opportunities, not previously available, for exploring applications of mobile devices in communal, cultural, economic, and educational contexts. The consumption of 3G (third generation technology) is advancing and fueled by converging applications that consist of multi-functional features which enable the user to capture advantage of services such as MMS (Multimedia Messaging Services), mobile video and more importantly, mobile Internet, that allow access to social network applications and other related services. With the emergence of 3G and its evolution to 4G, the mobile device is seen more as a platform rather than just a telephone, creating challenges for its usability and acceptance by ordinary users. On the other hand, service providers and device manufacturers are in the hunt for strategies to facilitate the adoption of mobile telephones as worldwide terminals for communication and access to the Internet.

The fiery penetration of mobile technology, pooled with its portability and technical capabilities for Internet access, has captured the attention of educators fascinated in exploiting these capacities in learning environments. The ubiquity and mobility features have been considered as key assets for elevating personal learning environments (PLE) in which handheld devices with 3G and ultimately 4G connectivity are key components. The promising control of mobile learning, coined as m-learning and primarily conceived as an extension to e-learning, has been the theme of pilot projects and initiatives designed to discover the use of mobile devices in education in many parts of the world. Even though the fact that the number and scope of such projects is increasing, it is accepted that significant research on the educational aspects of m-learning is necessary. The use of additional advanced mobile technologies with enhanced technical capabilities such as 4G does not guarantee the implementation and penetration or the successful application of mobile devices in educational contexts.

II ADVANCEMENT TO 4G AND ITS RELATIVE TO M-LEARNING

In the evolution of 3G to 4G (fourth generation mobile technology), two key technologies contend for power in the market: WiMax (Worldwide Interoperability for Microwave Access) and LTE (Long term Evolution). It is anticipated that both technologies resolve converge and become parallel in operational features. WiMax is paying attention on open systems, while LTE, offered by the major cellular incumbents, will still have to make major adjustments to obtain the degree of openness WiMax providers already offer. In both cases the applications are centered on IP technology, while their broadband capabilities are enhanced in comparison to 3G. It is most likely that firmware and integrated chips with both technologies embedded in the mobile terminals will provide worldwide and flawless access to the mobile Internet, despite of the type of 4G involved.

The main technical differences between 3G and 4G are that 4G offers higher data rates (in the order of 100Mbps compared to a peak 3 Mbps of 3G) and better quality of service and security. 4G will also provide global mobility, service portability, and ubiquitous and smooth roaming with expected lower cost. Various technology experts consider 4G more as a conceptual framework, given that it integrates different kinds of technologies with efficient standards in order to provide services and applications in a faultless and transparent fashion. We will have at our disposal a powerful technological tool with great potential for impacting the value and exposure of education.

III EDUCATIONAL IMPLICATIONS OF 4G EVOLUTION

Taking into consideration the market dynamics in the evolution toward 4G and the surplus of mobile devices available, increasingly better informed and knowledgeable users will take benefit of the fast moving mobile technology situation. This is part of a "mobile divide" created by fiery technology growth in which teachers, more than students, are affected. New generations - termed digital natives - will be better able to manage with this divide due to their skills, orientation, and natural adoption of digital technologies. Teachers will face the challenge of requiring constant attention and training, not only so they will be able to use the new generation mobile technologies, but more prominently, in order to contribute to the progress of applications relevant to education.

The accelerated pace at which mobile technologies are evolving has created a space of basic research regarding m-learning. As an end result, we can observe that in order to create a notional framework for m-learning, researchers sketch on existing learning theories such as behaviorism, constructivism, situated learning and others. In many instances the resulting contributions become only theoretical in nature with realistic implications of m-learning limited to the teachers' or researchers' interpretations.

Undoubtedly 3G and 4G technologies create encouraging circumstances to acquire, operate, represent, process, and understand information. However, as Coll mentions, information *per-se* is not synonymous to knowledge, nor does the efficient reception and access to such information guarantee learning. The key is to generate an environment or context for learning supported by semiotic resources conducive to the construction of meanings.

The word "mobile" has been connected with technology, learning, telephone and quite a few other concepts and devices. However, the importance must be placed on the mobility of the person - the student or teacher - more than on the mobility of the device. It is the learning activity connected with a "moving person" who is supported by an m-device that distinguishes m-learning from other types of learning. Mobility of individuals and devices in conjunction with wireless Internet connectivity grant the platform where models of interactivity and interactions must be developed.

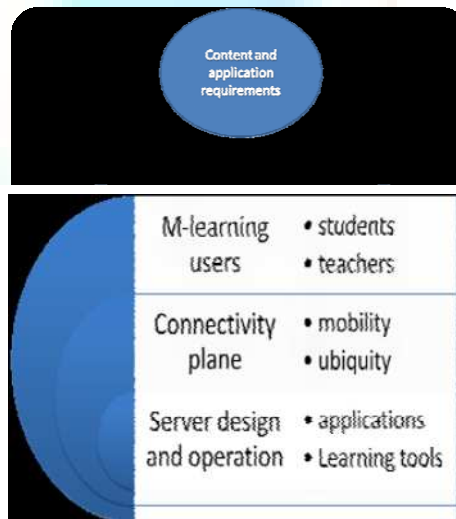

It is also suitable to point out that the educational modalities or formats are favorable toward the differentiated use of mobile technologies. Thus, the traditional in-classroom format makes use of mobile technology out of the conservative educational environment to allow for the contact between teacher-student-teacher and student-student and providing the option of conforming social networks among all of them. In the case of the on-line and hybrid formats, the use of mobile devices is extended and enhanced to allow for a higher degree of communication and collaboration. The use of advanced handheld devices with 4G connectivity will play an important role providing a more efficient communications channel and an improved user experience based on the design of relevant and pertinent content that includes, among others, the involvement of pedagogues, information technology experts, psychologists, and instructional designers.

The accessibility of a more vigorous and improved communications channel with wide coverage allowing ubiquitous and mobile communications will have an impact in a location-dependent, time-dependent and situation-dependent traditional educational system. In this circumstance the role of the teachers will evolve transitioning from topic experts to facilitators and coaches. In order to take advantage of the benefits of 4G connectivity, the handheld device must have the capacity of processing and managing major flows of information.

Concerning the above mentioned ideas, an approach to the educational process that involves the triad teacher-student-content from the perspective of the potential support of 3G and 4G technologies is presented in Table 1. The Triad Teacher-Student(s)-Content

Relation	Characteristics
Teacher-Content	The teacher can have right to use and transport content connected to his or her course at several time and any place. The availability of superior data rates provided by 4G and the emergence of additional resourceful processors and operating systems will be crucial for content management and creation as well as for mobile videoconferencing applications. The knowledge gained in e-learning can be extrapolated to m-learning; however, screen size, memory, and processing capacities of handheld devices are important restrictions.
Student-Content	The student can contact and transport content at any time and any place. This communication takes place out of the habitual educational context; the emergence of 4G (LTE and WiMax) might offer a universal multifunctional device that, in conjunction with standardized tools, could bear content management and creation for the m-learning context.

A layered structure (shown in Figure 2) considers the following elements as part of this framework:

Capability of Instant Communication: This communication capacity in the form of voice or text messaging, mobile video, and Internet connectivity provides the access and provides social networks with potential to maintain the learning process in the form of interactions with teachers and students, relatives, and friends regarding academic or daily life concerns. 4G will improve the user's experience, enhancing in this way the quality and quantity of interactions and interactivity involved in the educational processes.

Message size restriction: Handheld devices have imperfect processing capacities compared to laptops or other computers. This limitation, connected with the screen size, restrains the kind of content to be managed by the devices. 4G will get better communications features (coverage and connectivity) and extra powerful devices are currently available. On the other hand, the size of the devices is still an important concern for developing significant educational applications.

- **Context management:** Context is a key factor connected with learning. Students and teachers can practice and speak about the different types of information when moving during the length of a voyage or in route to school or home. The management and understanding of interactions and interactivity with the contexts using mobile technology becomes critical to establish a relevant framework for m-learning. Context personalization is another important factor to consider.

- **Impulsiveness:** The portability and accessibility of handheld devices with 3G and 4G connectivity provide immediate opportunity to communicate with other parties or to set up a social network for solving a specific academic need. It will be important to identify which applications are applicable and relevant for taking full gain of this capacity.

- **Informal learning:** The use of mobile devices in non-traditional academic environments using m-learning applications provides opportunities for informal learning experiences. There are many pilot projects all over the world that have exploited the technological benefits of m-learning in informal settings using 3G technology. These projects have created an important platform to identify the main challenges involved in developing relevant applications of m-learning in different academic environments.

- **Technology skills:** In order to take gain the full potential of 4G mobile devices, it is important to understand their main capacities, functions, and applications. The common contact of teachers and students with mobile devices allows the development of skills to properly operate such devices. Teachers who might practice the "mobile divide" perhaps reject the use of mobile technology and will face important challenges for adopting or participating in m-learning educational efforts.

FIG: FRAMEWORK OF M-LEARNING

Fig. 3. WML wap site.

Fig. 4. Mobile learning application architecture.

IV THE ROLE OF CONNECTIVITY AND COVERAGE

Connectivity and coverage are essential factors in m-learning environments. It is accredited that with the first generations of wireless technologies (1G and 2G), m-learning applications were incomplete. The emergence of 3G and 4G provides a platform to get better the transport and exchange of content, also enhancing the possibilities of meaningful interactions and interactivity. Wireless providers and device manufacturers, on their part, are developing dominant tools that allow for a better user experience; however, there is still a lot to do in the processes of establishing and putting into practice effective contexts. Given the complication of the mobile development, our present research suggests a multivariate and integrated approach to better understand the new models of interactivity emerging from mobile personal learning environments.

Definitively-improved connectivity and coverage allow flexibility in the interactions and interactivity processes, making the use of handheld mobile devices more gorgeous. The screen size is still an important constraint, but it is predicted that the development of new mobile interfaces and healthier understanding of human-terminal-human interaction will bring about enhanced tools to support education and learning. With all the elements in place, the m-learning scenario will progress from its exploratory stage to a more established situation.

V THE CHALLENGES AND RISKS OF A TECHNOLOGY-CENTRIC APPROACH

The diffusion of mobile technology in practically all endeavors of society and the fiery growth of wireless technologies present special challenges and risks for educational processes and contexts. On the one hand, it is tempting to apply the evident and immediate benefits of mobility and Internet connectivity in the learning environment in an effort to increase the coverage, efficiency, and effectiveness of education in all social strata. On the other hand, the vertiginous pace of technology development necessitates notice to factors that, if not considered, may render mobile broadband and connectivity technologies such as 3G and 4G intangible tools for supporting learning. Some of these factors are:

The need to develop strategies and programs for training teachers and administrators in the use and application of emerging wireless technologies. This aspect is key if we wish to mitigate the effects of an ever-increasing mobile digital divide.

- The importance of stressing the educational elements of m-learning by creating frameworks that focus on the mobility and interactivity of learners and educators, rather than just on the portability features and technical capabilities of current and future converging devices.
- The challenge of developing suitable and pertinent content for handheld devices, considering the limiting factors of screen size, memory capacity, processing speed, and data rate connectivity. One element observed in our current research is that handheld technology centric designs may become extremely intrusive and not necessarily conducive to supporting learning.
- Applications should stress simplicity and usability, while taking into consideration real scenarios regarding student ownership of 3G and 4G handheld devices and the connected fees of local wireless providers. The structure and fees of wireless plans, the plethora of handheld devices available in the market, and technical compatibility issues, as well as a lack of standardized frameworks and platforms for interoperability, may become limiting factors to deploying significant applications to support learning.
- Security and ethical issues are factors that are increasingly relevant in relation to the use of mobile devices. The improper use of handheld devices in the educational environment is more and more becoming an important concern of teachers, students, administrators, and parents. This is an area that needs special attention, and not only requires more research and development, but also a higher degree of collaboration and multidisciplinary focus to understand all the issues involved.

VI CONCLUSIONS

With the evolution toward 4G, it is anticipated that the improved technical capabilities of mobile devices will afford a greatly improved experience for users. The case in point of this paper is that technical progress is not enough, since due to the lack of substantial research there are still countless challenges to be faced in developing comprehensive theoretical frameworks for m-learning. There is also a courseware space with relevant and pertinent content for the m-learning context. To what amount will the development to 4G overlay the way for better and more insightful m-learning experiences? The answer to this question requires a multidisciplinary vision and focus. To date, content for entertainment and communications capture the attention of students all over the world, as 4G provides better connectivity and the potential of a better user experience. on the other hand, the urgent need now is to develop adoption and usability strategies and to create educational content suited for specific m-learning environments, taking into account the cultural, social, and human development issues involved.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Computer Application and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
