## CHIEF PATRON

**PROF. K. K. AGGARWAL**

Chairman, Malaviya National Institute of Technology, Jaipur  
(An institute of National Importance & fully funded by Ministry of Human Resource Development, Government of India)  
Chancellor, K. R. Mangalam University, Gurgaon  
Chancellor, Lingaya's University, Faridabad  
Founder Vice-Chancellor (1998-2008), Guru Gobind Singh Indraprastha University, Delhi  
Ex. Pro Vice-Chancellor, Guru Jambheshwar University, Hisar

## FOUNDER PATRON

**LATE SH. RAM BHAJAN AGGARWAL**

Former State Minister for Home & Tourism, Government of Haryana  
Former Vice-President, Dadri Education Society, Charkhi Dadri  
Former President, Chinar Syntex Ltd. (Textile Mills), Bhiwani

## CO-ORDINATOR

**DR. SAMBHAV GARG**

Faculty, Shree Ram Institute of Business & Management, Urjani

## ADVISORS

**DR. PRIYA RANJAN TRIVEDI**

Chancellor, The Global Open University, Nagaland

**PROF. M. S. SENAM RAJU**

Director A. C. D., School of Management Studies, I.G.N.O.U., New Delhi

**PROF. S. L. MAHANDRU**

Principal (Retd.), Maharaja Agrasen College, Jagadhri

## EDITOR

**PROF. R. K. SHARMA**

Professor, Bharti Vidyapeeth University Institute of Management & Research, New Delhi

## EDITORIAL ADVISORY BOARD

**DR. RAJESH MODI**

Faculty, Yanbul Industrial College, Kingdom of Saudi Arabia

**PROF. PARVEEN KUMAR**

Director, M.C.A., Meerut Institute of Engineering & Technology, Meerut, U. P.

**PROF. H. R. SHARMA**

Director, Chhatrapati Shivaji Institute of Technology, Durg, C.G.

**PROF. MANOHAR LAL**

Director & Chairman, School of Information & Computer Sciences, I.G.N.O.U., New Delhi

**PROF. ANIL K. SAINI**

Chairperson (CRC), Guru Gobind Singh I. P. University, Delhi

**PROF. R. K. CHOUDHARY**

Director, Asia Pacific Institute of Information Technology, Panipat

**DR. ASHWANI KUSH**

Head, Computer Science, University College, Kurukshetra University, Kurukshetra

**DR. BHARAT BHUSHAN**

Head, Department of Computer Science & Applications, Guru Nanak Khalsa College, Yamunanagar

**DR. VIJAYPAL SINGH DHAKA**

Dean (Academics), Rajasthan Institute of Engineering & Technology, Jaipur

**DR. SAMBHAVNA**

Faculty, I.I.T.M., Delhi

**DR. MOHINDER CHAND**

Associate Professor, Kurukshetra University, Kurukshetra

**DR. MOHENDER KUMAR GUPTA**

Associate Professor, P.J.L.N. Government College, Faridabad

**DR. SAMBHAV GARG**

Faculty, Shree Ram Institute of Business & Management, Urjani

**DR. SHIVAKUMAR DEENE**

Asst. Professor, Dept. of Commerce, School of Business Studies, Central University of Karnataka, Gulbarga

**DR. BHAVET**

Faculty, Shree Ram Institute of Business & Management, Urjani

***ASSOCIATE EDITORS***

**PROF. ABHAY BANSAL**

Head, Department of Information Technology, Amity School of Engineering & Technology, Amity University, Noida

**PROF. NAWAB ALI KHAN**

Department of Commerce, Aligarh Muslim University, Aligarh, U.P.

**ASHISH CHOPRA**

Sr. Lecturer, Doon Valley Institute of Engineering & Technology, Karnal

***TECHNICAL ADVISOR***

**AMITA**

Faculty, Government M. S., Mohali

***FINANCIAL ADVISORS***

**DICKIN GOYAL**

Advocate & Tax Adviser, Panchkula

**NEENA**

Investment Consultant, Chambaghat, Solan, Himachal Pradesh

***LEGAL ADVISORS***

**JITENDER S. CHAHAL**

Advocate, Punjab & Haryana High Court, Chandigarh U.T.

**CHANDER BHUSHAN SHARMA**

Advocate & Consultant, District Courts, Yamunanagar at Jagadhri

***SUPERINTENDENT***

**SURENDER KUMAR POONIA**

## CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## GUIDELINES FOR SUBMISSION OF MANUSCRIPT

### 1. **COVERING LETTER FOR SUBMISSION:**

DATED: \_\_\_\_\_

**THE EDITOR**  
IJRCM

**Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF**

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

**DEAR SIR/MADAM**

Please find my submission of manuscript entitled '\_\_\_\_\_ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

#### **NAME OF CORRESPONDING AUTHOR:**

Designation:  
Affiliation with full address, contact numbers & Pin Code:  
Residential address with Pin Code:  
Mobile Number (s):  
Landline Number (s):  
E-mail Address:  
Alternate E-mail Address:

#### **NOTES:**

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:  
**New Manuscript for Review in the area of** (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
  - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use (ed.) for one editor, and (ed.s) for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parentheses.
  - The location of endnotes within the text should be indicated by superscript numbers.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:****BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.
- Hunker, H.L. and A.J. Wright (1963), "Factors of Industrial Location in Ohio" Ohio State University, Nigeria.

**CONTRIBUTIONS TO BOOKS**

**ABSTRACT**

Software quality is well understood by a software developer through his prolonged exposure to the SDLC (Software Development life Cycles). The quality till now is taken up to be a non-quantifiable entity. The quality itself is defined as "satisfaction of customer in many perspectives as per his requirements generated at the beginning of the development cycle". The definition clearly states it to be purely dependent upon the end-users discretion. The quality has been a factor which hasn't been quantified yet and varies upon the requisite of the customer evaluating it. The customer may have set a HIGH, MEDIUM or LOW standard as per developer's perspective; but, it may turn out to be sufficient as per his personal requirements. Due to standards followed by the developer as per his knowledge or techniques, the product developed may come out to be different as per user's requirements. This may cost him in terms of TIME, MONEY, WORK, TRAINING and even MAINTENANCE. This paper discusses how to overcome this problem of varying standards; we can set the requirements by QUANTIFYING QUALITY AS PER THE END USER of the software. However, as discussed earlier the Quality is an aspect which is non-quantifiable. However, the soft computing holds a technique in form of FUZZY LOGICS which allows one to quantify the quality.

**KEYWORDS**

SDLC, ISO

**PROBLEM**

The different perspectives of users lay down basis of my problem statement. The software under quality check has to go through rigorous testing to meet the standards set as per the ISO or SEI. Also, it should be noted that with growing quality standard of the software the cost of testing increases and so does the need of risk estimation; which in itself is one time consuming as well as cost incurring process. The risk estimation is brought into consideration for security against failures at any given step of software use cycle. This should also be noted that, risk estimation and testing incur maximum time. These two processes if minimized could be minimized in terms of duration and cost.

However, the basic question lies with the fact: when to stop testing?

If testing is closed in haywire junction of SDLC, it may lead to project failure itself. Thus there has to be few heuristics for determination of what AMOUNT OF QUALITY is to be achieved from software. These heuristics should be directly dependent upon the satisfaction of end-user. And for any end-user Quality is function of desired performance of the software as per his requirements.

**BACKGROUND****ISO 9126 QUALITY MODEL**

ISO 9126 quality model is an extension of the work done by McCall (1977), Boehm (1978), FURPS and others in defining a set of software quality characteristics. ISO 9126 represents the latest (and ongoing) research into characterizing software for the purposes of software quality control, software quality assurance and software process improvement (SPI).

The ISO 9126 software quality model identifies 6 main quality characteristics, namely:

- Functionality
- Reliability
- Usability
- Efficiency
- Maintainability
- Portability

Each characteristic can further be divided into various sub-characteristics, defined as follows:

**Functionality** - A set of attributes that bear on the existence of a set of functions and their specified properties. The functions are those that satisfy stated or implied needs.

- ✓ Suitability
- ✓ Accuracy
- ✓ Interoperability
- ✓ Security
- ✓ Functionality Compliance

**Reliability** - A set of attributes that bear on the capability of software to maintain its level of performance under stated conditions for a stated period of time.

- ✓ Maturity
- ✓ Fault Tolerance
- ✓ Recoverability
- ✓ Reliability Compliance

**Usability** - A set of attributes that bear on the effort needed for use, and on the individual assessment of such use, by a stated or implied set of users.

- ✓ Understandability
- ✓ Learnability
- ✓ Operability
- ✓ Attractiveness
- ✓ Usability Compliance

**Efficiency** - A set of attributes that bear on the relationship between the level of performance of the software and the amount of resources used, under stated conditions.

- ✓ Time Behaviour
- ✓ Resource Utilization
- ✓ Efficiency Compliance

**Maintainability** - A set of attributes that bear on the effort needed to make specified modifications.

- ✓ Analyzability
- ✓ Changeability
- ✓ Stability
- ✓ Testability
- ✓ Maintainability Compliance

**Portability** - A set of attributes that bear on the ability of software to be transferred from one environment to another.

- ✓ Adaptability
- ✓ Installability
- ✓ Co-Existence
- ✓ Replaceability
- ✓ Portability Compliance

**FUZZY LOGIC**

Fuzzy logic can be defined as a form of knowledge representation suitable for notions that cannot be defined precisely, but which depend upon their contexts. Fuzzy logic provides an alternative way to represent linguistic and subjective attributes of the real world in computing. It's a three step process which is well understood in following steps:

- 1) Fuzzification (Using membership functions to graphically describe a situation)
- 2) Rule evaluation (Application of fuzzy rules)
- 3) Defuzzification (Obtaining the crisp or actual results)

Fuzzy logic is a superset of conventional (Boolean) logic that has been extended to handle the concept of partial truth- truth values between "completely true" and "completely false". As its name suggests, it is the logic underlying modes of reasoning which are approximate rather than exact. The importance of fuzzy logic derives from the fact that most modes of human reasoning and especially common sense reasoning are approximate in nature. The essential characteristics of fuzzy logic as founded by Zadeh Lotfi are as follows.

In fuzzy logic, exact reasoning is viewed as a limiting case of approximate reasoning.

In fuzzy logic everything is a matter of degree.

Any logical system can be fuzzified

In fuzzy logic, knowledge is interpreted as a collection of elastic or, equivalently, fuzzy constraint on a collection of variables

Inference is viewed as a process of propagation of elastic constraints.

The third statement hence, defines Boolean logic as a subset of Fuzzy logic.

The whole idea of fuzzification/Defuzzification is based upon membership function. A membership function provides a measure of the degree of similarity of an element to a fuzzy set. The membership function of a fuzzy set is a generalization of the indicator function in classical sets. In fuzzy logic, it represents the degree of truth as an extension of valuation. Degrees of truth are often confused with probabilities, although they are conceptually distinct, because fuzzy truth represents membership in vaguely defined sets, not likelihood of some event or condition.

**ISO 9126 QUALITY MODEL AND FUZZY**

Both the terms comes from two different computing environments but if combined together can achieve better results. ISO 9126 has defined 6 quality characteristics, namely functionality, usability, maintainability, portability, reliability and efficiency. As we are concerned with end-user, so, we will consider only three quality characteristics that are more important for a user than others and will estimate quality based upon those three factors. These three factors are: Functionality, Usability and maintainability respectively. We will use fuzzy logic to estimate quality based upon these three factors.

**IMPLICATION**

Fuzzy logic system goes through three main steps or procedures which are as follows:

- Fuzzification
- Fuzzy Inference
- De-Fuzzification

The inputs for the fuzzification process will be Functionality, Maintainability and usability.

**FUZZIFICATION**

Three input variable to be fuzzified as mentioned are Functionality, Usability and maintainability. The terms LOW, MED, HIGH are used to depict INPUT and terms VLOW, LOW, MED, HIGH, VHIGH are used to depict OUTPUT in form of triangular membership functions.

The following figures i.e Figure 13, Figure 14, Figure 15 presents the input membership functions for the linguistic variables Functionality, Usability and maintainability respectively. The membership functions are divided into linguistic terms of LOW, MED, HIGH with the ranges as follows for the each:

LOW {0, 0, 0.5}

Med {0, 0.5, 1}

High {0.5, 1, 1}

It should be noted that when we talk of Functionality, Usability and maintainability, the above mentioned variables have standard meaning of the terms used as linguistic.

**FIGURE 1: INPUT FOR "FUNCTIONALITY"**

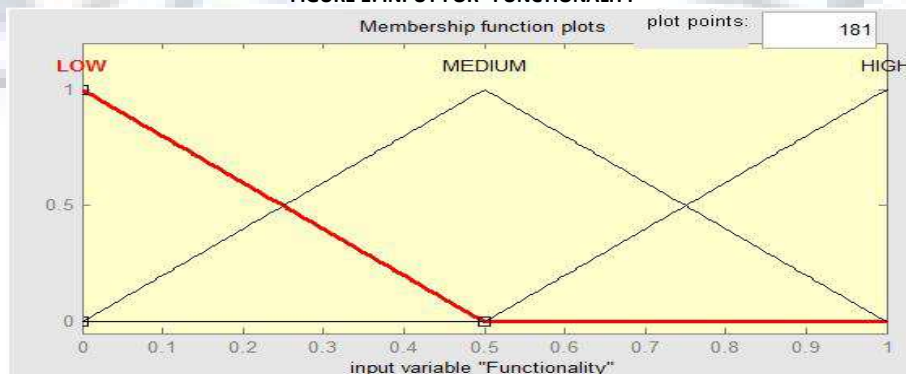

FIGURE 2: INPUT FOR "USABILITY"

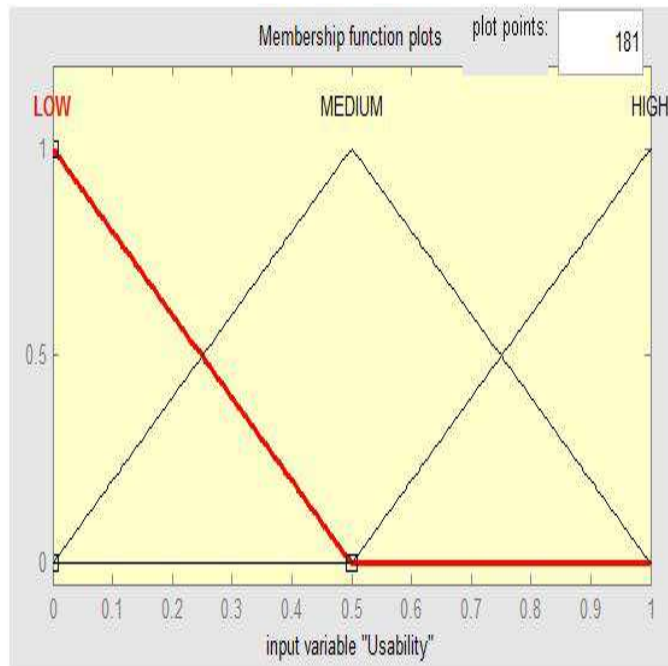

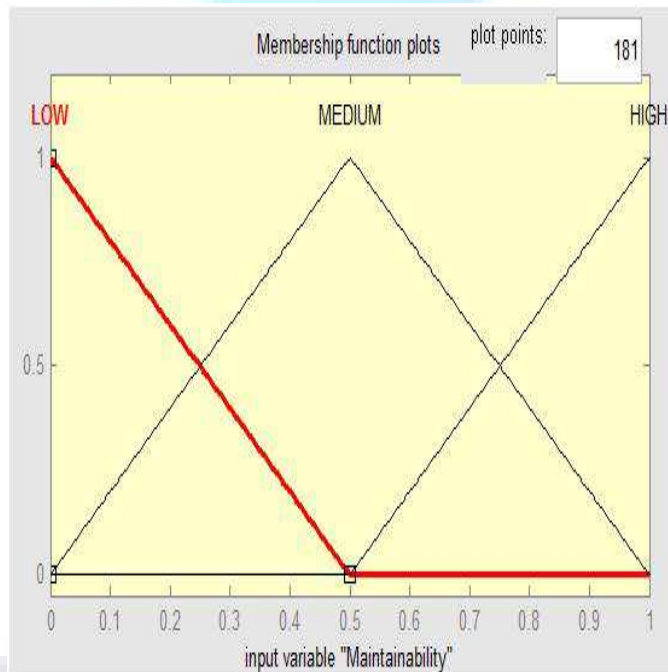

FIGURE 3: INPUT FOR "MAINTAINABILITY"

**FUZZY INFERENCE**

The input to the fuzzy systems are worked upon using Mamdani's mom method wherein "AND" operator is set to minimum such that each input variable contribute to the output created by the inference mechanism. The following rule base presents the base of simulation for the proposed fuzzy based method of quality estimation.

The following table presents the complete rule base designed for the fuzzy inference mechanism.

INPUTS			OUTPUT
FNTC.	USB.	MNTN.	QUALITY
LOW	LOW	LOW	VLOW
LOW	LOW	MEDIUM	VLOW
LOW	LOW	HIGH	LOW
LOW	MEDIUM	LOW	LOW
LOW	MEDIUM	MEDIUM	LOW
LOW	MEDIUM	HIGH	MEDIUM
LOW	HIGH	LOW	MEDIUM
LOW	HIGH	MEDIUM	MEDIUM
LOW	HIGH	HIGH	HIGH
MEDIUM	LOW	LOW	LOW
MEDIUM	LOW	MEDIUM	LOW
MEDIUM	LOW	HIGH	MEDIUM
MEDIUM	MEDIUM	LOW	MEDIUM
MEDIUM	MEDIUM	MEDIUM	MEDIUM
MEDIUM	MEDIUM	HIGH	HIGH
MEDIUM	HIGH	LOW	HIGH
MEDIUM	HIGH	MEDIUM	HIGH
MEDIUM	HIGH	HIGH	VHIGH
HIGH	LOW	LOW	MEDIUM
HIGH	LOW	MEDIUM	MEDIUM
HIGH	LOW	HIGH	HIGH
HIGH	MEDIUM	LOW	HIGH
HIGH	MEDIUM	MEDIUM	HIGH
HIGH	MEDIUM	HIGH	VHIGH
HIGH	HIGH	LOW	VHIGH
HIGH	HIGH	MEDIUM	VHIGH
HIGH	HIGH	HIGH	VHIGH
HIGH	MED	LOW	VHIGH
HIGH	HIGH	HIGH	HIGH
HIGH	HIGH	MED	VHIGH
HIGH	HIGH	LOW	VHIGH

1. If (Functionality is LOW) and (Usability is LOW) and (Maintainability is LOW) then (QUALITY is VLOW) (1)
2. If (Functionality is LOW) and (Usability is LOW) and (Maintainability is MEDIUM) then (QUALITY is VLOW) (1)
3. If (Functionality is LOW) and (Usability is LOW) and (Maintainability is HIGH) then (QUALITY is LOW) (1)
4. If (Functionality is LOW) and (Usability is MEDIUM) and (Maintainability is LOW) then (QUALITY is LOW) (1)
5. If (Functionality is LOW) and (Usability is MEDIUM) and (Maintainability is MEDIUM) then (QUALITY is LOW) (1)
6. If (Functionality is LOW) and (Usability is MEDIUM) and (Maintainability is HIGH) then (QUALITY is MEDIUM) (1)
7. If (Functionality is LOW) and (Usability is HIGH) and (Maintainability is LOW) then (QUALITY is MEDIUM) (1)
8. If (Functionality is LOW) and (Usability is HIGH) and (Maintainability is MEDIUM) then (QUALITY is MEDIUM) (1)
9. If (Functionality is LOW) and (Usability is HIGH) and (Maintainability is HIGH) then (QUALITY is HIGH) (1)
10. If (Functionality is MEDIUM) and (Usability is LOW) and (Maintainability is LOW) then (QUALITY is LOW) (1)
11. If (Functionality is MEDIUM) and (Usability is LOW) and (Maintainability is MEDIUM) then (QUALITY is LOW) (1)
12. If (Functionality is MEDIUM) and (Usability is LOW) and (Maintainability is HIGH) then (QUALITY is MEDIUM) (1)
13. If (Functionality is MEDIUM) and (Usability is MEDIUM) and (Maintainability is LOW) then (QUALITY is MEDIUM) (1)
14. If (Functionality is MEDIUM) and (Usability is MEDIUM) and (Maintainability is MEDIUM) then (QUALITY is MEDIUM) (1)
15. If (Functionality is MEDIUM) and (Usability is MEDIUM) and (Maintainability is HIGH) then (QUALITY is HIGH) (1)
16. If (Functionality is MEDIUM) and (Usability is HIGH) and (Maintainability is LOW) then (QUALITY is HIGH) (1)
17. If (Functionality is MEDIUM) and (Usability is HIGH) and (Maintainability is MEDIUM) then (QUALITY is HIGH) (1)
18. If (Functionality is MEDIUM) and (Usability is HIGH) and (Maintainability is HIGH) then (QUALITY is VHIGH) (1)
19. If (Functionality is HIGH) and (Usability is LOW) and (Maintainability is LOW) then (QUALITY is MEDIUM) (1)
20. If (Functionality is HIGH) and (Usability is LOW) and (Maintainability is MEDIUM) then (QUALITY is MEDIUM) (1)
21. If (Functionality is HIGH) and (Usability is LOW) and (Maintainability is HIGH) then (QUALITY is HIGH) (1)
22. If (Functionality is HIGH) and (Usability is MEDIUM) and (Maintainability is LOW) then (QUALITY is HIGH) (1)
23. If (Functionality is HIGH) and (Usability is MEDIUM) and (Maintainability is MEDIUM) then (QUALITY is HIGH) (1)
24. If (Functionality is HIGH) and (Usability is MEDIUM) and (Maintainability is HIGH) then (QUALITY is VHIGH) (1)
25. If (Functionality is HIGH) and (Usability is HIGH) and (Maintainability is LOW) then (QUALITY is VHIGH) (1)
26. If (Functionality is HIGH) and (Usability is HIGH) and (Maintainability is MEDIUM) then (QUALITY is VHIGH) (1)
27. If (Functionality is HIGH) and (Usability is HIGH) and (Maintainability is HIGH) then (QUALITY is VHIGH) (1)

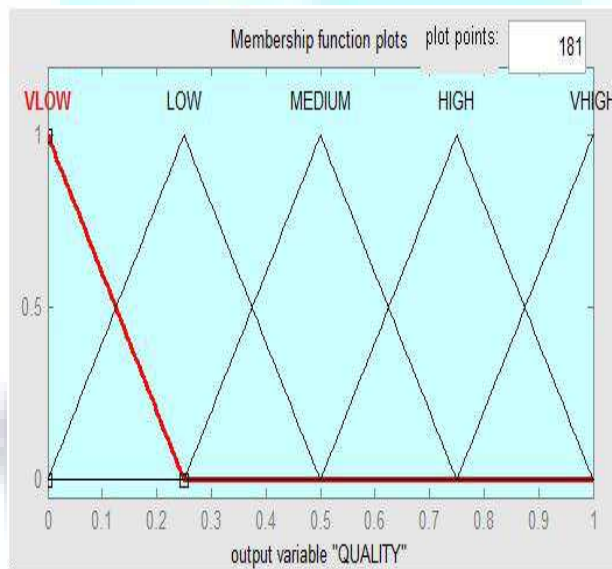

**FUZZY RULE BASE DESIGN AS PER TRIANGULAR MEMBERSHIP FUNCTION PLOT**

If Functionality is LOW, Usability is LOW and Maintainability is HIGH then quality LOW.

As we are having three INPUT states to every fuzzy input, therefore the total no of possible inference rule could be 27 (3\*3\*3).

**DEFUZZIFICATION**

It's a process where we extract crisp values from the output parameter in the knowledge base.

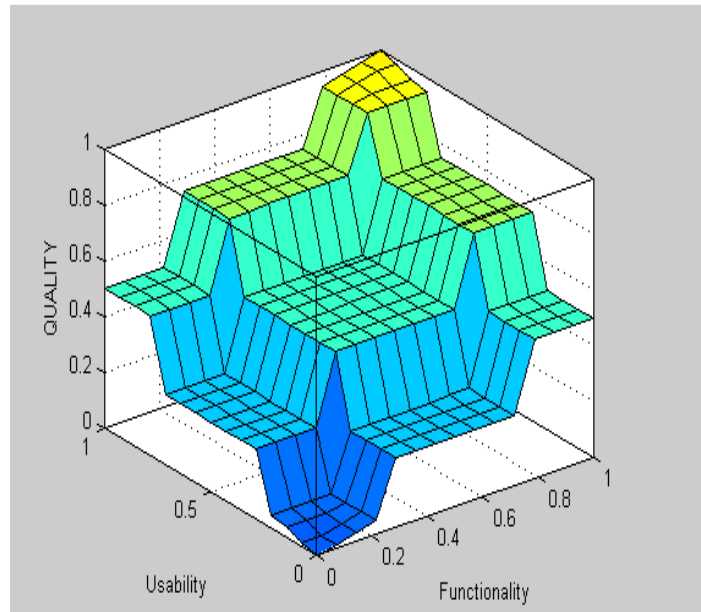

**OUTPUT AS "QUALITY"**

The output membership function is generated while the fuzzification process however, is depicted and referenced in this section as Figure 18 for a clear understanding of the output result evaluation. The Linguistic Variable Quality is generated with Linguistic Terms VERY LOW, LOW, MED, HIGH, VERY HIGH with the following fuzzy sets:

- VERY LOW {0, 0, 0.25}
- LOW {0, 0.25, 0.5}
- MED {0.25, 0.5, 0.75}
- HIGH {0.5, 0.75, 1}
- VERY HIGH {0.75, 1, 1}

RESULT

The following output shows the effect of usability and functionality on quality when maintainability is kept constant.

The following output shows the effect of maintainability and functionality on quality when usability is kept constant.

The following output shows the effect of maintainability and usability on quality when functionality is kept constant.

**FUTURE SCOPE**

In future all the 6 factors of ISO 9126 and their subparts can also be considered to determine the quality of software being delivered.

## **REQUEST FOR FEEDBACK**

**Dear Readers**

At the very outset, International Journal of Research in Computer Application & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com).

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

**Academically yours**

Sd/-  
**Co-ordinator**

The journal, nor its publishers/Editors/Editorial Board, nor any other party involved in the preparation of material contained in the journal represents or warrants that the information contained herein is in every respect accurate or complete, and they are not responsible for any errors or omissions or for the results obtained from the use of such material. Readers are encouraged to confirm the information contained herein with other sources. The responsibility of the contents and the opinions expressed in this journal is exclusively of the author (s) concerned.

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
