# CONTENTS

Sr. No.	TITLE & NAME OF THE AUTHOR (S)	Page No.
1.	DEVELOPMENT OF WOMEN ENTREPRENEURS IN KARNATAKA: SCHEMES AND MEASURES <i>SUNANDA.V.M. &amp; DR. HIREMANI NAIK R.</i>	1
2.	EMPIRICAL ANALYSIS AND FINANCIAL IMPLICATIONS OF THE IMPACT OF OUTAGES ON THE REVENUE LOSS: A CASE OF RELIANCE COMMUNICATIONS <i>MANMEET KAUR CHATHA, SANCHARI DEBGUPTA &amp; BRIG. RAJIV DIVEKAR</i>	4
3.	IMPACT OF DERIVATIVE TRADING ON STOCK MARKET VOLATILITY IN INDIA: A STUDY OF BSE-30 INDEX <i>R KANNAN &amp; DR. T. SIVASHANMUGUAM.</i>	15
4.	THE DYNAMIC OF TRADING VOLUME AND ITS IMPACT ON SECTORAL RETURN AND VOLATILITY: EMPIRICAL ANALYSIS OF THE IDX SECTORAL INDEX <i>WENNY ARIYANTI, DR. NOER AZAM ACHSANI &amp; DR. DWI RACHMINA</i>	18
5.	DIVIDEND SIGNALLING & IMPACT ON SHARE PRICES: AN EVENT STUDY OF INDIAN INFORMATION TECHNOLOGY SECTOR <i>ANJALI RANE &amp; DR. GUNTUR ANJANA RAJU</i>	24
6.	EMPLOYEE RETENTION: A WAY TO SUSTAINABLE ORGANIZATIONAL GROWTH <i>DR. SUNIL D. ZAGADE &amp; ALEKHA CHANDRA PANDA</i>	28
7.	MANAGEMENT OF WORKING CAPITAL IN SMALL AND MEDIUM ENTERPRISES IN SPSR NELLORE DISTRICT, AP <i>K. BHAGYALAKSHMI &amp; DR. P. MOHAN REDDY</i>	30
8.	CONSUMERS INVOLVEMENT IN BUYING GREEN PRODUCTS: A STUDY IN COIMBATORE CITY <i>K. VIDHYAKALA &amp; DR. P. SANTHI</i>	33
9.	STUDY OF INDICATORS AND OSCILLATORS FOR STOCK LISTED ON NSE <i>CHITRA K. DESHPANDE &amp; DR. ZARAJ KASMI</i>	37
10.	ROLE OF TRANSFORMATIONAL AND TRANSACTIONAL LEADERSHIP ON JOB SATISFACTION <i>KAMALPREET KAUR &amp; DR. MAJOR SINGH</i>	44
11.	LABOUR WELFARE MEASURES IN HOTEL INDUSTRIES REFERENCE TO KANYAKUMARI <i>DR. E. MUTHUKUMAR, S. VIDHYA &amp; G. ANEES FATHIMA</i>	47
12.	HUMAN RESOURCE ACCOUNTING & AUDITING <i>HARISH H N, JAGADEESH B P &amp; GIRISHA H.J</i>	50
13.	RISK MANAGEMENT PRACTICES OF MICRO FINANCE INSTITUTIONS: A BRIEF EMPIRICAL LITERATURE REVIEW <i>PAGADALA SUGANDA DEVI</i>	54
14.	ONLINE RECRUITMENT & HUMAN RESOURCE MANAGEMENT: AS CHALLENGE IN THE WORLD <i>MEGHA P. NANHE</i>	59
15.	INTERNATIONAL ENTREPRENEURSHIP: A STUDY WITH REFERENCE TO MICRO, SMALL AND MEDIUM ENTERPRISES IN KERALA <i>DITTY JOHNSON, DR. AMBILY A.S. &amp; DR. SURESH P.R.</i>	61
16.	A STUDY ON: ANALYSIS OF EXPENSES IN RELATION TO BANGALORE CITY <i>PRAMOD A V</i>	64
17.	IMPLICATION OF MGNREGA IN INDIA: AN OVERVIEW <i>KHEM RAJ</i>	66
18.	RELATIONSHIP BETWEEN QUALITY ASSURANCE AND CUSTOMER SATISFACTION IN HOTEL INDUSTRY: A CASE STUDY OF JORDAN HOTEL <i>MAJED MASSAD ALRAWASHDEH</i>	70
19.	IMPACT OF PERFORMANCE OF TANGIBLE AND INTANGIBLE ASSETS ON THE PROBABILITY OF SELECTED COMPANIES <i>MUGDHA S</i>	74
20.	ENTREPRENEURSHIP IN UNITED ARAB EMIRATES: A REVIEW ON INSTITUTIONAL PERSPECTIVE <i>SALEEM MUSHTAQ</i>	81

## CHIEF PATRON

**PROF. K. K. AGGARWAL**

Chairman, Malaviya National Institute of Technology, Jaipur  
(An institute of National Importance & fully funded by Ministry of Human Resource Development, Government of India)  
Chancellor, K. R. Mangalam University, Gurgaon  
Chancellor, Lingaya's University, Faridabad  
Founder Vice-Chancellor (1998-2008), Guru Gobind Singh Indraprastha University, Delhi  
Ex. Pro Vice-Chancellor, Guru Jambheshwar University, Hisar

## FOUNDER PATRON

**LATE SH. RAM BHAJAN AGGARWAL**

Former State Minister for Home & Tourism, Government of Haryana  
Former Vice-President, Dadri Education Society, Charkhi Dadri  
Former President, Chinar Syntex Ltd. (Textile Mills), Bhiwani

## FORMER CO-ORDINATOR

**DR. S. GARG**

Faculty, Shree Ram Institute of Business & Management, Urjani

## ADVISORS

**PROF. M. S. SENAM RAJU**

Director A. C. D., School of Management Studies, I.G.N.O.U., New Delhi

**PROF. S. L. MAHANDRU**

Principal (Retd.), Maharaja Agrasen College, Jagadhri

## EDITOR

**PROF. R. K. SHARMA**

Professor, Bharti Vidyapeeth University Institute of Management & Research, New Delhi

## EDITORIAL ADVISORY BOARD

**DR. RAJESH MODI**

Faculty, Yanbu Industrial College, Kingdom of Saudi Arabia

**PROF. PARVEEN KUMAR**

Director, M.C.A., Meerut Institute of Engineering & Technology, Meerut, U. P.

**PROF. H. R. SHARMA**

Director, Chhatrapati Shivaji Institute of Technology, Durg, C.G.

**PROF. MANOHAR LAL**

Director & Chairman, School of Information & Computer Sciences, I.G.N.O.U., New Delhi

**PROF. ANIL K. SAINI**

Chairperson (CRC), Guru Gobind Singh I. P. University, Delhi

**PROF. R. K. CHOUDHARY**

Director, Asia Pacific Institute of Information Technology, Panipat

**DR. ASHWANI KUSH**

Head, Computer Science, University College, Kurukshetra University, Kurukshetra

**DR. BHARAT BHUSHAN**

Head, Department of Computer Science & Applications, Guru Nanak Khalsa College, Yamunanagar

**DR. VIJAYPAL SINGH DHAKA**

Dean (Academics), Rajasthan Institute of Engineering & Technology, Jaipur

**DR. SAMBHAVNA**

Faculty, I.I.T.M., Delhi

**DR. MOHINDER CHAND**

Associate Professor, Kurukshetra University, Kurukshetra

**DR. MOHENDER KUMAR GUPTA**

Associate Professor, P. J. L. N. Government College, Faridabad

**DR. SHIVAKUMAR DEENE**

Asst. Professor, Dept. of Commerce, School of Business Studies, Central University of Karnataka, Gulbarga

**DR. BHAVET**

Faculty, Shree Ram Institute of Engineering & Technology, Urjani

***ASSOCIATE EDITORS***

**PROF. ABHAY BANSAL**

Head, Department of Information Technology, Amity School of Engineering & Technology, Amity University, Noida

**PROF. NAWAB ALI KHAN**

Department of Commerce, Aligarh Muslim University, Aligarh, U.P.

**ASHISH CHOPRA**

Sr. Lecturer, Doon Valley Institute of Engineering & Technology, Karnal

***FORMER TECHNICAL ADVISOR***

**AMITA**

Faculty, Government M. S., Mohali

***FINANCIAL ADVISORS***

**DICKIN GOYAL**

Advocate & Tax Adviser, Panchkula

**NEENA**

Investment Consultant, Chambaghat, Solan, Himachal Pradesh

***LEGAL ADVISORS***

**JITENDER S. CHAHAL**

Advocate, Punjab & Haryana High Court, Chandigarh U.T.

**CHANDER BHUSHAN SHARMA**

Advocate & Consultant, District Courts, Yamunanagar at Jagadhri

***SUPERINTENDENT***

**SURENDER KUMAR POONIA**

## CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## GUIDELINES FOR SUBMISSION OF MANUSCRIPT

### 1. **COVERING LETTER FOR SUBMISSION:**

DATED: \_\_\_\_\_

#### **THE EDITOR**

IJRCM

**Subject:** SUBMISSION OF MANUSCRIPT IN THE AREA OF \_\_\_\_\_.

**(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)**

#### **DEAR SIR/MADAM**

Please find my submission of manuscript titled ' \_\_\_\_\_ ' for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

#### **NAME OF CORRESPONDING AUTHOR**

Designation/Post\* :

Institution/College/University with full address & Pin Code :

Residential address with Pin Code :

Mobile Number (s) with country ISD code :

Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :

Landline Number (s) with country ISD code :

E-mail Address :

Alternate E-mail Address :

Nationality :

\* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation etc. **The qualification of author is not acceptable for the purpose.**

**NOTES:**

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. ***pdf. version is liable to be rejected without any consideration.***
  - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**  
**New Manuscript for Review in the area of** (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
  - c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
  - d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
  - e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
  - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
  - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be typed in **bold letters, centered and fully capitalised**.
  3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
  4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
  5. **ABSTRACT:** Abstract should be in **fully italic printing**, ranging between **150 to 300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA**. **Abbreviations must be mentioned in full**.
  6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
  7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at [www.aea-web.org/econlit/jelCodes.php](http://www.aea-web.org/econlit/jelCodes.php). However, mentioning of JEL Code is not mandatory.
  8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. **It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
  9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
  10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
  11. **MAIN TEXT:**

**THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:****INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self-explained, and the **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they may follow Harvard Style of Referencing. **Also check to ensure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use (ed.) for one editor, and (ed.s) for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parenthesis.
  - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders before the references.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**

**BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.

**AURANGABAD**

## ABSTRACT

*The task of mobilization and allocation of savings could be attempted in the old days by a much less specialized institution than the stock exchanges. But as business and industry expanded and the economy assumed more complex nature, the need for 'permanent finance' arose. Entrepreneurs needed money for long term whereas investors demanded liquidity – the facility to convert their investment into cash at any given time. The answer was a ready market for investments and this was how the stock exchange came into being. Stock exchanges are intricacy inter-woven in the fabric of a nation's economic life. Without a stock exchange, the saving of the community- the sinews of economic progress and productive efficiency- would remain underutilized.*

## KEYWORDS

indicators, oscillators, stock market, technical analysis.

## INTRODUCTION

**T**echnical analysis is analysis of securities to forecast the direction of pricing by studying past data of the securities such as the price and volume. Technical analysis is based solely on the data generated by the market and by the actions of people in the market.

Now what one needs to know is that the Technical Analysis Indicators are the basis for technical analysis, they are used to determine the future trends of stocks. Technical Analysis Indicators help the investor to know when to enter or exit a trade, in order to make profit. Technical Analysis Indicators look at price information and translates it into simple, easy-to-read signals. These signals help the investor determine the correct time to buy or sell.

Technical analysis indicator provides clues to the investor, helping them to interpret the market patterns and the future behavior of the price. Thus combinations of price, volume and time sensitive Technical Analysis Indicators are used to maximize profits.

The two main ways that indicators are used to form buy and sell signals are through Crossovers and Divergence.

Crossovers occur when the indicator moves through an important level or a moving average of the indicator. It signals that the trend in the indicator is shifting and that this trend shift will lead to a certain movement in the price of the underlying security.

For example, if the relative strength index crosses below the 70-level it signals that security is moving away from an overbought situation, which only will occur when the security declines.

The second way indicators are used is through Divergence, which occurs when the direction of the price trend and the direction of the indicator trend are moving in the opposite direction. This signals that the direction of the price trend may be weakening as the underlying momentum is changing.

## REVIEW OF LITERATURE

1. **Wall Street Courier** (The E-Book of Technical Market Indicators) Over the years, investors have developed literally, hundred thousand of different technical market indicators in their efforts to predict stock market. Nowadays every investor finds loads of different kinds of technical market indicators available for free on every financial site on the internet. Unfortunately, for the unwary, there are many misleading, untested, overstated or just plain wrong indicators. Additionally, different kind of indicators may contradict to each other. Therefore, such a situation will only lead to a more difficult process for investors to apply a successful and traceable trading approach. Finally, the investors own emotional basis does interfere too often with the desired goal of maximizing trading returns although disciplined trading decisions are as important as accurate knowledge in actually making money. Since there is no indicator which is right all the time, a combination of different kinds of technical market indicators is the best method to understand the "big picture" plus the best way to beat the market in the long run. A clear and understandable investment process will deliver more predictable results and allows traders to improve their approach over time.
2. **Jan Ivar Larsen** (Predicting Stock Prices Using Technical Analysis and Machine Learning) Historical stock prices are used to predict the direction of future stock prices. The developed stock price prediction model uses a novel two-layer reasoning approach that employs domain knowledge from technical analysis in the first layer of reasoning to guide a second layer of reasoning based on machine learning. The model is supplemented by a money management strategy that use the historical success of predictions made by the model to determine the amount of capital to invest on future predictions. Based on a number of portfolio simulations with trade signals generated by the model, we conclude that the prediction model successfully outperforms the Oslo Benchmark Index (OSEBX)
3. **Wing-Keung Wong** (How rewarding is technical analysis? Evidence from Singapore stock market) This paper focuses on the role of technical analysis in signalling the timing of stock market entry and exit. Test statistics are introduced to test the performance of the most established of the trend followers, the Moving Average, and the most frequently used counter-trend indicator, the Relative Strength Index. Using Singapore data, the results indicate that the indicators can be used to generate significantly positive return. It is found that member firms of Singapore Stock Exchange (SES) tend to enjoy substantial profits by applying technical indicators. This could be the reason why most member firms do have their own trading teams that rely heavily on technical analysis
4. **Monica Lam** (Neural network techniques for financial performance prediction) This research project investigates the ability of neural networks, specifically, the backpropagation algorithm, to integrate fundamental and technical analysis for financial performance prediction. The predictor attributes include 16 financial statement variables and 11 macroeconomic variables. The rate of return on common shareholders' equity is used as the to-be-predicted variable. Financial data of 364 S&P companies are extracted from the CompuStat database, and macroeconomic variables are extracted from the Citibase database for the study period of 1985–1995. Used as predictors in Experiments 1, 2, and 3 are the 1 year's, the 2 years', and the 3 years' financial data, respectively. Experiment 4 has 3 years' financial data and macroeconomic data as predictors. Moreover, in order to compensate for data noise and parameter misspecification as well as to reveal prediction logic and procedure, we apply a rule extraction technique to convert the connection weights from trained neural networks to symbolic classification rules. The performance of neural networks is compared with the average return from the top one-third returns in the

market (maximum benchmark) that approximates the return from perfect information as well as with the overall market average return (minimum benchmark) that approximates the return from highly diversified portfolios. Paired t tests are carried out to calculate the statistical significance of mean differences. Experimental results indicate that neural networks using 1 year's or multiple years' financial data consistently and significantly outperform the minimum benchmark, but not the maximum benchmark. As for neural networks with both financial and macroeconomic predictors, they do not outperform the minimum or maximum benchmark in this study

5. **Tyler Yell** (Four Highly Effective Trading Indicators Every Trader Should Know) When your forex trading adventure begins, you'll likely be met with a swarm of different methods for trading. However, most trading opportunities can be easily identified with just one of four chart indicators. Once you know how to use the Moving Average, RSI, Stochastic, & MACD indicator, you'll be well on your way to executing your trading plan like a pro. You'll also be provided with a free reinforcement tool so that you'll know how to identify trades using these indicators every day. Traders tend to overcomplicate things when they're starting out in this exciting market. This fact is unfortunate but undeniably true. Traders often feel that a complex trading strategy with many moving parts must be better when they should focus on keeping things as simple as possible.

**NEED/IMPORTANCE OF THE STUDY**

Investment is one of the important part in life of person, if he fails to do proper investment he has to face consequences. So there is need for the study of indicators and oscillators for making investors aware about the terms and how decisions are taken for investment.

**OBJECTIVES**

1. To study different types of Indicators and Oscillators.
2. To find whether investors investing in derivatives market have knowledge about Indicator and Oscillators.
3. To find whether Indicators and Oscillators used by investors are used in a combination or not?
4. To study and analyze the top five Indicators and Oscillators used by investors using data from the stock market.

**HYPOTHESIS (ES)**

Ho : investors have knowledge about indicators and oscillators.

H1 : Investors use combination of indicators and oscillators for investing in stock market.

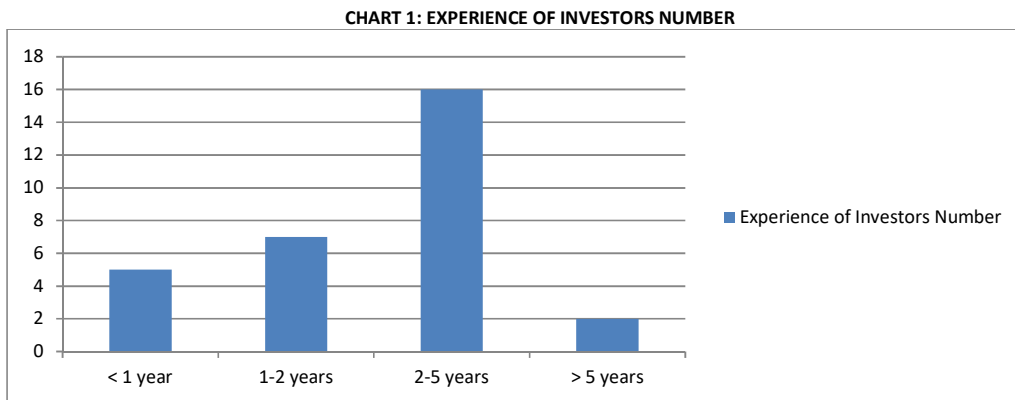

**RESEARCH METHODOLOGY**

Two type of data used, primary data and secondary data. Primary data was taken through a questionnaire to know about the investor knowledge about Oscillators and Indicators and their usage. Secondary data was taken to explain the Oscillators and Indicators which the investors preferred most while making their investment decisions. Thus, stock trend of ICICI Bank was taken from NSE for three months for doing further analysis of the topic.

**RESULTS & DISCUSSION**

**TO FIND TOTAL EXPERIENCE OF INVESTORS OF INVESTING INTO STOCK MARKET**

- From the questionnaire, clients were asked to fill their overall experience of doing trading into stock markets.
- Data of 30 investors was taken.
- The data was later on entered into a table in MS Excel and with the graph optioned, inference were made. The graph obtained was as follows:

**TO KNOW WHETHER THEY HAD RECEIVED ANY FORMAL TRAINING OR NOT**

- This was basically a question to understand whether the investors dealing in derivative market had any prior training or not.
- The same procedure as above was followed. The graph obtained was:

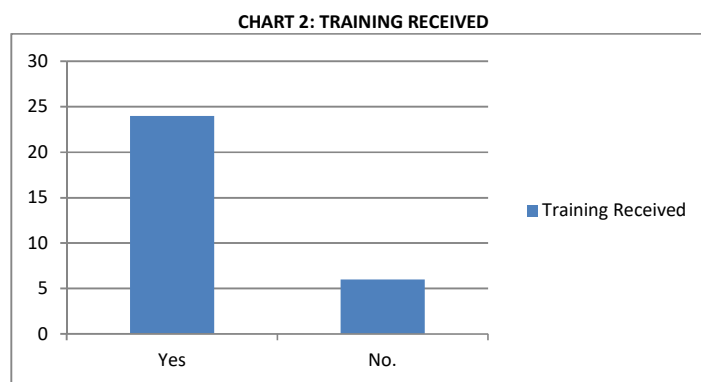

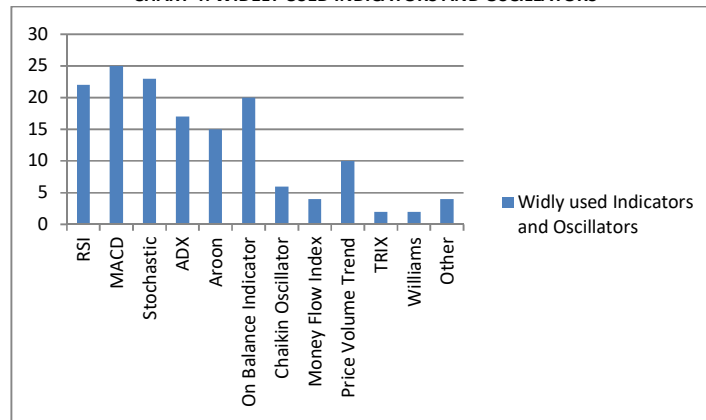

CHART 3: USAGE OF INDICATOR AND OSCILLATORS

TO KNOW WHICH ARE THE MOSTLY USED INDICATOR AND OSCILLATORS BY THE INVESTORS

- A list of many Indicators and Oscillators was included in the questionnaire.
- The investors were asked to tick the mostly used Indicators and Oscillators by them.

CHART 4: WIDELY USED INDICATORS AND OSCILLATORS

TO KNOW WHETHER THE INDICATOR AND OSCILLATORS USED WERE INDIVIDUALLY USED OR USED IN A COMBINATION

- This data was taken to basically understand whether a combination of indicator and oscillators were being used by investors or not.
- The same procedure as above was followed again. The graph obtained was:

CHART 5: WAY OF USE

SECONDARY ANALYSIS

For doing the secondary analysis, a stock of ICICI Bank was taken. The stock movement of previous three months was taken and then the analysis was carried out. The top 5 Indicators and Oscillators used by the investors from primary data was taken and then those were understood and analysed using the stock of ICICI Bank. The analysis done was as follows:

1. AVERAGE DIRECTIONAL INDEX (ADX)

- The Average Directional Index (ADX) can be used to determine if a security is trending or not. This determination helps traders choose between a trend following system or a non-trend following system.
- A weak trend is present when ADX is below 20 and a positive trend is present when ADX is above 40, but there is no trend present when between 20 to 40.
- The +DI line (Green) indicates a positive strength while the -DI line (Red) indicates a weak trend. These two measures together plot the ADX line (Blue).
  - Now as we can see in the above chart, On 1st January the ADX line was below 20 or almost 20, thus it shows that there was weak trend in the ICICI Bank stock.
  - On 19th January the stock picked up its strength and went above 40, that represents a strong strength in the stock of ICICI Bank.
  - So when there is weak trend or no trend in stock i.e. 1st January and thus there was no point in investing in this stock.
  - But an opportunity arises on 19th January when the trend picks up, thus we could see a profit potential there.
  - Again later on the stock trend dips and then is range bound 1st Feb onwards. This suggests that there is no point in investing in this stock as of now.

2. ON BALANCE VOLUME (OBV)

- On Balance Volume (OBV) measures buying and selling pressure.
- A rising OBV reflects positive volume pressure that can lead to higher prices, so if the OBV line is rising we can expect the prices to move upwards.
- A falling OBV reflects negative volume pressure that can lead lower prices, so if the OBV line is falling then we can expect the prices to move downwards.
  - As we can see here, from December 1 till January 26 the trend was range-bound, i.e. not much changes in volume pressure is seen.
  - But then post 26th January, the OBV line starts to fall which means the trading volume in ICICI bank is decreasing. We can also see that with the decrease in volume the stock price also felt drastically.
  - Then from 23rd February, the OBV line started moving upwards representing a pick in volume in the stock. With that, we can also see that the stock prices were also moving up.

3. MOVING AVERAGE CONVERGENCE (MACD)

- MACD measures whether a stock is having an upward momentum or a downward momentum.
- If the 12-day moving average line (green) is above the 26-day moving average line (Pink), it indicates a positive MACD. Positive value increases as the shorter 12 day line diverges further from the longer 26 day line.
- If the 12-day moving average line (Green) is below the 26-day moving average line (Pink), it indicates a negative MACD. Negative value increases as the shorter 12 day line diverges further below the longer 26 day line.
- This helps traders identify entry and exit points for investing in the particular stock.
  - As we can see in the graph, the stock of ICICI picked up momentum on 23<sup>rd</sup> December. A good entry point was available when 12 day moving average line crossed 26 day moving average line on 30<sup>th</sup> December.
  - Then the momentum started decreasing and on 7<sup>th</sup> January the 2 day moving average line went below 26 day line, this was a perfect time to go short in the market or remove our long position.
  - Since then the stock never picked up momentum and has remained below the 26 day average line, thus there has not been a good window to enter into this stock.
  - But on 29<sup>th</sup> February we can see that the divergence between 12 day average line is decreasing and it is showing a sign of revival. This can be an opportunity, but we can only be sure once it crosses the 26 day slow moving line.

4. STOCHASTIC OSCILLATOR

- The Stochastic Oscillator is used to determine whether a security is overbought or oversold.
- We set up range and down range as per our analysis, if the Stochastic line crosses the upper range it represents the stock is overbought and if the Stochastic line goes below the lower range then it is oversold.
- If a stock is oversold it signals an upturn, thus is a good sign to enter into the script and if the stock is overbought it means there is not much scope for it to go upwards, thus we should come out of it.
  - Here we can see that the stock was mostly oversold throughout.
  - The portion highlighted in yellow represents the stock was in a normal position, i.e. not overbought nor oversold.

- At the remaining places the stock is trending mostly oversold only.
- When it breaches the 20 mark and goes above, it has a upward momentum, so we can enter into this script.
- When the stock starts trending down, it means it is losing its upward momentum and is trending downward, it is a signal to get out of the script.

5. RELATIVE STRENGTH INDEX (RSI)

- RSI is a momentum oscillator that measures the speed and change of price movements for a particular stock.
- The oscillator fluctuates between 0 to 100 which represents prices of a stock are going up or down during a particular point.
- RSI also determines whether a stock is overbought or oversold. On the scale of 0 to 100, if the oscillator line goes below 20 it means the stock is oversold and if the line goes above 80 then it means the stock is overbought.
- $RSI = 100 - (100 / (1 + RS))$ , where  $RS = \text{Average gain} / \text{Average Loss}$
- We usually take a 14-period RSI, zero RSI value will mean prices have moved lower all 14 periods, thus there was no gain. RSI value 100 means prices gave moved higher all 14 periods, thus there were no losses.
  - Here as we can see in the chart, the red highlighted portion shows an overbought position, when the oscillator lines come below 80 then it may be the right time to enter.
  - When the line breaches below 20, which is highlighted in blue, it will indicate an oversold position and thus we should not enter during this period.

FINDINGS

After conducting the survey and analyzing the data collected, the findings were as follows:

- Mostly all the investors had an experience of 1 year to 5 years investing in stock markets.
- Almost everyone had received a proper and formal training for the derivatives segment.
- Everyone who had received training had a knowledge about Indicators and Oscillators while the rest who did not had training did not know about Indicators and Oscillators.
- Mostly, a combination of two or three Indicators and Oscillators were used by investor for making any investment decision.
- It was found that there were five Indicators and Oscillators that were widely used: Relative Strength Indicator (RSI), Moving Average Convergence (MACD), Stochastic Oscillator, Average Directional Index (ADX), On Balance Volume.
  - RSI: It was found that whenever the RSI line crossed 80 mark, the stock price fell and when the RSI line fell below 20 the stock price rose after some time.
  - MACD: It was noted that whenever the 12 day moving average line was above the 26 day moving average line, the stock price went up every time when this happened.
  - Stochastic Oscillator: It was found that whenever the stock is oversold, the price of stock took a decline and when the stock started moving upward i.e. trade volume in it increased, the stock price also increased.
  - ADX: It was seen that whenever the +DI line (green) went above the -DI (red) line, the stock price went up and vice versa.
  - On Balance Volume: Whenever the OBV line went up, the stock price went up and whenever the OBV line went down the stock price went down.

RECOMMENDATIONS/SUGGESTIONS

- One should have a proper knowledge and experience of equity market before entering the derivatives market, as it helps us get a better understanding of the price movements and our accuracy of decision making increases, thus reducing our losses.
- As derivatives is a complex market, one should get adequate and proper training.
- Though, Indicators and Oscillators do not show you right time and opportunity to enter or exit a script, they guide you in taking such decisions by supporting you with up to date and accurate data.
- Always a combination of Indicators and oscillators should be used to get a better and accurate result.

While using widely used Indicators and Oscillators is not a bad decision, but creating one’s own unique strategy and combination of tools for assisting you in decision making is always a wise choice

CONCLUSIONS

With this research it can be concluded that Ho hypothesis has been rejected as investors requires training and then only they got knowledge about indicators and oscillators, Whereas H1 Hypothesis was accepted as from the study it revealed that investors use combination of indicators and oscillators for investing in stock market.

**LIMITATIONS**

Due to constraints of time & resources the present study is likely to suffer from certain limitations some of these are mentioned so that study can be understood in a proper perspective:

- The research was carried out in a short period,
- Some of the respondents were unwilling to give information.
- Sometimes wrong information was provided by respondents which needed to be cross checked & verified.
- Chances of biasness are there because of the use of convenient sampling.
- Some respondents were not available and thus needed data could not be found.
- Some respondents were reluctant to divulge personal information which can affect the validity of all responses.

**SCOPE FOR FURTHER RESEARCH**

There is further scope for Research by taking few more different indicators and oscillators and derive the results and compare with the current. Researcher can also take other investment avenues and go with similar parameter and see the results, compare and suggest investors for the best option.

## REQUEST FOR FEEDBACK

**Dear Readers**

At the very outset, International Journal of Research in Computer Application & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue, as well as on the journal as a whole, on our e-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our e-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com).

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward to an appropriate consideration.

With sincere regards

Thanking you profoundly

**Academically yours**

Sd/-

**Co-ordinator**

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
