CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR

IJRCM

Subject: **SUBMISSION OF MANUSCRIPT IN THE AREA OF**

(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript titled ' _____ ' for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

NAME OF CORRESPONDING AUTHOR :

Designation/Post* :

Institution/College/University with full address & Pin Code :

Residential address with Pin Code :

Mobile Number (s) with country ISD code :

Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :

Landline Number (s) with country ISD code :

E-mail Address :

Alternate E-mail Address :

Nationality :

* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation **etc.** **The qualification of author is not acceptable for the purpose.**

NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. ***pdf. version is liable to be rejected without any consideration.***
 - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**
New Manuscript for Review in the area of (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
 - c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
 - d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
 - e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
 - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
 - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be typed in **bold letters, centered and fully capitalised**.
 3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
 4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
 5. **ABSTRACT:** Abstract should be in **fully Italic printing**, ranging between **150 to 300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA. Abbreviations must be mentioned in full.**
 6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
 7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aea-web.org/econlit/jelCodes.php. However, mentioning of JEL Code is not mandatory.
 8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER. It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
 9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
 10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
 11. **MAIN TEXT:**

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self-explained, and the **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they may follow Harvard Style of Referencing. **Also check to ensure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parenthesis.
 - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders before the references.

ABSTRACT

A cashless economy is one in which all the transactions are done using cards or digital means. The circulation of physical currency is minimal. It is done with the primary aim of covering the nonregistered transactions. This steering of the economy toward becoming digitized now aims at converting everyday cash transactions by citizens into cashless transactions. This paper aims to analyze the knowledge of respondents regarding different modes of digital payments and evaluate the perception of respondents regarding cashless transactions and the challenges faced while transforming to digitalize the transactions. Data have been collected through primary as well as secondary sources. The respondents under the study belong to rural and urban areas and represent the overall state experience regarding cashless transactions and the impact of the Digital India initiative in the state of Himachal Pradesh. The study concludes that a cashless mode of money transfer is more appropriate and beneficial with ease of use. Views regarding the knowledge about different modes of digital payments were positive; people were well-familiarized with the cashless mode of money transactions. The cashless system has undeniably transformed how we handle money and conduct transactions. While it offers convenience, efficiency, and the potential for financial inclusion, it also raises concerns regarding privacy, security, and social equity.

KEYWORDS

cashless economy, digital transactions, digital payments.

JEL CODE

E50

INTRODUCTION

In cashless transactions, payments are made or accepted without the use of hard cash. This includes payments made via credit/debit cards, cheques, Demand Draft, NEFT, RTGS, or any other form of online payment that removes the need for cash. The adoption of cashless payment systems by businesses has the potential to reduce the costs related to handling huge amounts of cash in the market and enhance transaction speed. In this era, we can see a very significant change in the means of making and receiving payments. Due to technological infrastructure and policy changes, there has been an increase in the number of modes of payment. However, India is characterized by diversities and infrastructure facilities are still not reaching everything and everywhere due to which it is not easy to initiate the system successfully. The RBI and the government are making several efforts to reduce the use of cash in the economy by promoting digital/payment devices including prepaid instruments and cards. RBI's efforts to encourage these new varieties of payments and settlement facilities aim to achieve the goal of a 'Less cash' society. With limited cash in hand and an indefinite crunch, most people are rushing to cashless transactions. Digital transactions bring in better transparency, scalability, and accountability. The new move will compel more merchants to accept digital money. Cash may no longer be king. In today's rapidly advancing digital era, the transformation of traditional payment methods has been nothing short of revolutionary. The emergence of cashless systems, facilitated by the widespread adoption of electronic transactions and mobile payment technologies, has reshaped the way we conduct financial transactions. As this transition gathers momentum, it becomes imperative to critically examine the implications and consequences of a cashless society. The transition to a cashless system has been primarily driven by the increasing prevalence of digital payment platforms and the convenience they offer. Cashless transactions offer speed, ease, and efficiency, allowing individuals to make payments anytime, anywhere with just a few taps on their smartphones. This transformation has not only revolutionized personal finance but has also extended its reach to various sectors, including retail, banking, and e-commerce. Proponents argue that a cashless system reduces the risks associated with carrying physical cash, curbs illicit activities, enhances financial inclusion, and boosts economic growth by streamlining transactions and reducing costs. However, amidst the undeniable benefits of a cashless system, concerns have arisen regarding its potential drawbacks and unintended consequences. Privacy and security issues have emerged as key challenges, with the increasing digital footprint leaving individuals vulnerable to identity theft, data breaches, and cybercrimes. Moreover, the exclusion of those who lack access to technology or are unfamiliar with digital platforms raises questions about financial inclusivity and exacerbates existing socio-economic disparities. Additionally, the overreliance on technology and the vulnerability of electronic systems to technical glitches and power outages present a significant risk to the stability and resilience of a cashless society. By examining empirical evidence, case studies, and expert opinions, we will delve into the advantages and disadvantages of a cashless society. The findings of this research will contribute to a nuanced understanding of the challenges and opportunities presented by the ongoing transition to a cashless system, aiding policymakers, businesses, and individuals in making informed decisions about the future of financial transactions.

The terms less cash society and cashless transaction economy indicate the same thing of reducing cash transactions and settlements rather than doing transactions digitally. A cashless transaction economy does not mean a shortage of cash rather it indicates a culture of people settling transactions digitally. In a modern economy, money moves electronically. Hence the spread of digital payment culture along with the expansion of infrastructure facilities is needed to achieve the goal. On 8th November 2016 government withdrew Rs 500 and Rs 1000 notes- the two highest denominations in circulation. The main objective was to fight counterfeit money and black money. The action has given a tremendous boost to cashless transactions as card-based and digital payments were not hindered when all high-denomination cash transactions suffered because of the absence of high-denomination currencies.

REVIEW OF LITERATURE

Khan (2009) a limited number of cashless transaction studies addressed the issue that the mode of payment affects perceptions of money and purchase behavior, the majority of research is in the area of the credit card payment mode. Credit card-based research has shown that when a credit card-based payment is used, the volume, value, and type of products purchased increase. The discussion paper suggests that under the condition of cash, there is awareness (conscious/unconscious) that a possession of value is transferred and this perception may well have a direct impact on people's perception of money and their spending behavior.

Pulina (2011) in her case study, "Consumer Behavior in the Credit Card Market: A Banking Case Study", observed that the payment product choice is influenced by many determinants: gender, age, location, type of circuit, card ownership, credit line and type of expenditure. Younger customers were found to be more likely to use revolving credit cards and this probability tends to decrease with age. On the contrary, older customers are more likely to acquire a gold credit card. This finding highlights that younger customers may be less risk-averse, need credit, and are likely to use more complex products.

Gupta and Kumar (2017) in their research paper, "An Analytical Study of Demonetization and its Impact on Indian Economy", concluded that the cashless transaction system is reaching growth day by day. Demonetization pushed millions of new users onto the country's digital economic grid by virtual fiat. "The Prime Minister's move to incentivize digital payments will offer strong support to our ongoing efforts in helping the country leapfrog the cash generation to digital payment solutions," added Deepak Abbot, the senior vice president of Paytm. "This will not only help millions of Indians overcome the hassles of dealing in cash but also act as a significant step towards propelling India to emerge as a truly cashless economy.

Kaur (2019) in his research paper, "Cash to Cashless Economy: Challenges & Opportunities" the study concludes that the need to move towards a cashless economy in India is immense. One, it will save a huge amount of money that is spent annually on printing and maintaining currency. Currently, less than 1% of all consumption expenditure is incurred through cashless instruments. The arrival of malls, multiplexes, online shopping stores, and shopping complexes encourages customers to make use of plastic cards. The government needs to take the necessary steps and make some policy considerations when they are preparing for a cashless economy. The payment systems have to be protected from the cyber-attacks. Going cashless provides a lot more benefits than just convenience to people, businesses, and the government in particular. Increasing the use of electronic payments boosts consumption and GDP.

Hasan et. al. (2020) in their study "Cashless Economy in India: Challenges Ahead" In an attempt to curb black money, and money laundering, and to have a sound economy, the central government of India has embarked on the cashless economy. It is the birth of a new era in the nation with life with digital money. This paper is going to conceptualize the meaning of a cashless system, explain online banking techniques in India, schemes by the government to spread the cashless system in India, and highlight the challenges of the cashless economy and electronic payment systems. The objective of this study is to examine the significant challenges that are faced by Indians on the way towards cashless. To achieve the objectives of this exploratory type of personal study, interviews will be conducted.

Rias et. al. (2022) in their research paper "Cashless Society in Campus: student's Usage and Level of Awareness" This paper aim to determine the factors behind the use of cashless transactions among university students and to investigate their level of awareness of information security of this transaction. The findings from a sample of 373 university students in Seremban showed that convenience and speed were the main factors in using cashless payment while an e-wallet was the most favorable mode of transaction. Meanwhile, students indicated a high level of awareness regarding the threat and risk, privacy and security of software, the risk of using public Wi-Fi, and the use of One-Time Password (OTP) to secure digital payment.

NEED OF THE STUDY

The need for the cashless economy is that every shady transaction that is left unrecorded will now come into the picture making India one of the fastest-growing economies in the world. A cashless system is a new initiative in India, however in Himachal Pradesh 90 percent of the population lives in rural areas and they do not have infrastructure like networks in remote areas, computers, Wi-Fi facilities, etc. In such circumstances, there is a possibility that people may not be able to access the technologies required for a cashless system. This is the reason that people may not be aware of the latest modes of cashless transactions and their uses. A major chunk of the students and research scholars studying in higher educational institutions at Shimla undertaken in the present study belong to different parts of the state. The study is based on the data collected from college and university students and research scholars which is helpful in gaining an insight into the overall state experience towards cashless transactions and initiatives of the digital India movement. So, in order to know the level of awareness of people towards the latest and existing modes of cashless transactions and their views towards the digital India movement, the present study is significant to be conducted in this context.

SCOPE OF THE STUDY

The research is mainly based on primary data conducted in the district Shimla of Himachal Pradesh and the duration of the survey was taken from February to April 2023. The data for the present study was collected from three higher educational institutions including one state university situated at Shimla in Himachal Pradesh. The present study confines itself to analyzing the perceptions of people towards cashless transactions and its impact on the awareness level of people in the state and their views on initiatives of the digital India movement.

OBJECTIVES OF THE STUDY

1. To examine the awareness level of respondents regarding different modes of digital payments.
2. To analyze the perception of respondents regarding cashless transactions.

RESEARCH METHODOLOGY

SOURCE OF DATA

The present study is based on both primary as well as secondary sources of data. However, more part of the Research is based on primary data.

A) PRIMARY DATA

Primary data are original in character and are collected afresh for some specific purpose. Primary Data was generated from the respondents and key information with the help of a pre-tested questionnaire. The primary data has been collected through the under-mentioned methods:

- ❖ **Questionnaire**- A well-structured schedule of questions containing different aspects of the study was developed and circulated to the persons concerned.
- ❖ **Interview**- The interview method has also been used to obtain information related to the impact of the cashless system on the people of urban and rural areas.
- ❖ **Personal Observation**- Certain information has been collected through personal observation. There are some incomplete questionnaires, which give ambiguous information. Therefore, personal observation is made to reveal the hidden and relevant information from the data collected.
- ❖ **Discussion**- Discussion with people belonging to the study area has been used as a primary source of information for analyzing the research problem.

B) SECONDARY DATA

Secondary data or information is generated through a review of relevant literature in the form of books, journals, reports, internet sources, and other published materials.

SAMPLING DESIGN AND SAMPLE SIZE

District Shimla and Shimla being the Capital of Himachal Pradesh has been taken as the universe of the study. Sampling has been used to obtain the required information. At the first stage, three higher educational institutions including one state university situated at Shimla were chosen for the study.

From these higher educational institutes, 300 students and research scholars belonging to different parts of the state were selected (i.e., 100 each) by using random sampling.

TABLE NO. 1: SAMPLE SIZE AND DESIGN

Institute	Number of Respondents
Rajiv Gandhi Government Degree College, Chaura Maidan (Kotshera) Shimla.	100
Centre of Excellence, Govt. College Sanjauli, Shimla.	100
Himachal Pradesh University Summer Hill, Shimla	100
TOTAL	300

TOOLS FOR ANALYSIS

The data collected from different sources have been classified and arranged in tables in one or more forms according to the requirements of analysis. For the analysis of results, the following statistical techniques have been applied:

- a) Descriptive Statistical Methods
- b) Chi-Square Test
- c) T-test

DATA ANALYSIS AND INTERPRETATION

AGE-WISE DISTRIBUTION OF RESPONDENTS

Age is considered as a determining factor in the relevant response’s generation to the questionnaire. In the selection of the sample size due consideration was given to the age distribution of the respondents.

TABLE NO. 2: AGE-WISE DISTRIBUTION OF RESPONDENTS

Sr. No.	Age Group	No. of Respondent	Percentage
1	Below 21	116	38.7
2	21-25	140	46.7
3	Above 25	44	14.6
	Total	300	100

Source: Data collected through a questionnaire

FIGURE 1: AGE-WISE DISTRIBUTION OF RESPONDENTS

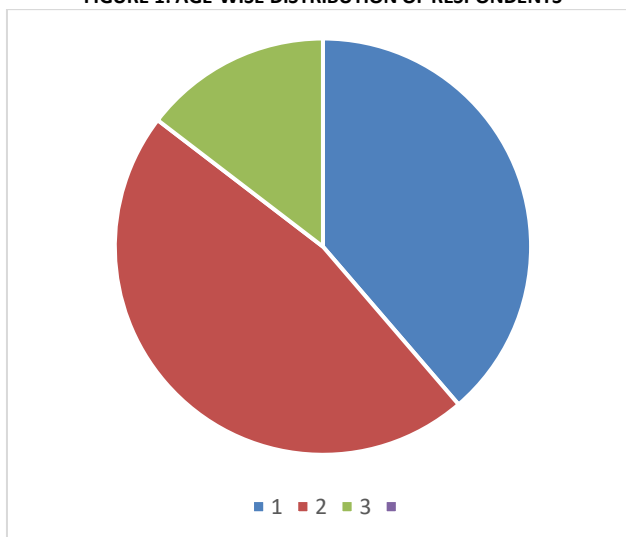

Table No. 2 and Figure 1 show that there are 38.7 percent of respondents belong to the age group below 21 years and 46.7 percent of respondents between the age group of 21-25 whereas 14.6 percent of respondents are above 25. Analysis of the table shows that in the sample, the majority of the respondents are from the age group 21-25, and the minority of the respondents are from the age group above 25.

TABLE NO. 3: GENDER-WISE DISTRIBUTION OF RESPONDENTS

Sr. No.	Gender	No. of respondents	Percentage
1	Male	128	42.7
2	Female	172	57.3
	Total	300	100.0

Source: Data collected by questionnaire

FIGURE 2: GENDER-WISE DISTRIBUTION OF RESPONDENTS

Table No. 3 and Figure 2 indicate that in the total sample, 42.7 percent of respondents are male and 57.3 percent are female. Analysis of the above table reveals that more respondents are female.

TABLE NO. 4: DISTRIBUTION OF RESPONDENTS BY THEIR EDUCATIONAL QUALIFICATIONS

Sr. No.	Educational Qualification	No. of Respondents	Percentage
1	Pursuing Graduation	96	32.0
2	Pursuing post-Graduation	154	51.3
3	Pursuing Research	50	16.7
	Total	300	100.0

Source: Data collected by questionnaire

FIGURE 3: EDUCATIONAL QUALIFICATION-WISE DISTRIBUTION OF RESPONDENTS

Table No. 4 and Figure 3 indicate that in the total sample, 32 percent of respondents are pursuing graduation 51.3 percent are pursuing post-graduation and 16.7 percent of respondents are pursuing research. Analysis of data shows that the majority of the respondents in the sample are pursuing post-graduation.

TABLE NO. 5: RESIDENTIAL STATUS-WISE DISTRIBUTION OF RESPONDENTS

Sr. No.	Residential status	No. of Respondents	Percentage
1	Urban	140	46.7
2	Rural	160	53.3
	Total	300	100.0

Source: Data collected by questionnaire

FIGURE 4: RESIDENTIAL STATUS-WISE DISTRIBUTION OF RESPONDENTS

Table No 5 and Figure 4 indicate that 46.7 percent belong to an urban area and 53.3 percent belong to a rural area. Analysis of the above table and figure indicates that more respondents belong to rural areas.

TABLE NO. 6: AWARENESS AMONG RESPONDENTS REGARDING VARIOUS MODES OF DIGITAL PAYMENTS

Sr. No.	Mode of Digital Payment	Total	Mean	Standard deviation	Skewness	Kurtosis	Chi-square	P-value
1	Debit card	300	3.7800	1.02891	-.520	-.383	55.867	.000
2	Credit card	300	2.7667	1.10773	.024	-.707	35.133	.000
3	USSD	300	2.6200	1.05976	.091	-.639	44.733	.000
4	AEPS	300	2.2933	.99358	.505	-.068	63.733	.000
5	UPI	300	2.6133	1.18030	.395	-.570	29.533	.000
6	Mobile wallets	300	3.7133	1.03843	-.640	.087	59.800	.000
7	Internet Banking	300	3.7467	1.03746	-.680	.017	61.467	.000
8	Micro ATMs	300	3.4400	1.18424	-.396	-.576	30.400	.000
9	Paytm	300	3.9600	1.03548	-1.022	.511	89.933	.000

Source: Data collected by questionnaire

Table No. 6 highlights the knowledge about the various modes of digital payment. Views regarding the knowledge about different modes of digital payments were positive; respondents were well-familiarized with the cashless mode of money transactions. Respondent students are going cashless with the help of mobile wallets such as Paytm, Airtel money, Google Pay, Phone Pay, and many more applications from their phones in their daily lives from paying bills to recharging with great ease anywhere and anytime.

TABLE NO. 7: PERCEPTIONS OF RESPONDENTS REGARDING BENEFITS OF CASHLESS TRANSACTION

Sr. No.	Mode of Digital payment	Total	Mean	Standard Deviation	Deviation	Skewness	Kurtosis	Chi-square	P-value
1	Convenient	300	3.6467	1.03065		-.364	-.552	50.267	.000
2	Discount and cashback reward	300	3.7533	.85872		-.531	.402	103.400	.000
3	Easy Tracking Spends	300	3.8733	.95043		-.694	.292	78.467	.000
4	Prevention in money laundering and corruption	300	3.2533	1.00460		-.206	-.341	58.133	.000
5	Helpful in Nations Growth in the Financial Sector	300	2.4067	1.08124		.228	-.970	39.133	.000
6	Price and Economic Stabilization	300	3.1200	.94066		-.047	-.444	68.733	.000
7	Check on Counterfeiting currency notes	300	3.1933	1.00800		-.278	-.468	57.667	.000

11	Unavailability of Non-Cash Payment System	300	3.4667	.88740	-.073	-.722	34.000	.000
12	Widely Acceptance	300	3.8067	.98782	-.745	.289	75.533	.000

Source: Data collected by questionnaire

Table 8 highlights the perception of respondents related to the problems of cashless transactions. The cashless system has undeniably transformed how we handle money and conduct transactions. While it offers convenience, efficiency, and the potential for financial inclusion, it also raises concerns regarding privacy, security, and social equity.

CONCLUSION

The study concludes that a cashless mode of money transfer is more appropriate and beneficial with ease of using them. Views of respondents regarding the knowledge about different modes of digital payments were positive; respondents were well-familiarized with the cashless mode of money transactions. People in the state are going cashless with the help of mobile wallets such as Paytm, Airtel money, Google Pay, Phone Pay, and many more applications from their phones in their daily lives from paying bills to recharging with great ease anywhere and anytime. The majority of respondents find cashless transactions more convenient as it provides discount and cash-back rewards. It is easy to track spending. The majority of respondents agree that using cashless modes of transaction is less time-consuming and it is also helpful in the reduction of carrying huge amounts of cash resulting in a growing cashless economy and growth in business sectors preventing money laundering and corruption. The cashless system has undeniably transformed how we handle money and conduct transactions. While it offers convenience, efficiency, and the potential for financial inclusion, it also raises concerns regarding privacy, security, and social equity. This research study also seeks to explore the nuances of the cashless system, shedding light on its potential as a boon for modern society or a bane that requires careful consideration. By analyzing the various aspects surrounding the cashless system, we can pave the way for a balanced approach to the future of financial transactions, ensuring that the benefits are maximized while mitigating the risks and challenges associated with a cashless society.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue, as well as on the journal as a whole, on our e-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our e-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward to an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
