CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the area of Computer, Business, Finance, Marketing, Human Resource Management, General Management, Banking, Education, Insurance, Corporate Governance and emerging paradigms in allied subjects like Accounting Education; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Monetary Policy; Portfolio & Security Analysis; Public Policy Economics; Real Estate; Regional Economics; Tax Accounting; Advertising & Promotion Management; Business Education; Management Information Systems (MIS); Business Law, Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labor Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; Public Administration; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism, Hospitality & Leisure; Transportation/Physical Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Digital Logic; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Multimedia; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic and Web Design. The above mentioned tracks are only indicative, and not exhaustive.

Anybody can submit the soft copy of his/her manuscript **anytime** in M.S. Word format after preparing the same as per our submission guidelines duly available on our website under the heading guidelines for submission, at the email address: infoijrcm@gmail.com.

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled '_____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:

Affiliation with full address, contact numbers & Pin Code:

Residential address with Pin Code:

Mobile Number (s):

Landline Number (s):

E-mail Address:

Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers**, and **email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION

REVIEW OF LITERATURE

NEED/IMPORTANCE OF THE STUDY

STATEMENT OF THE PROBLEM

OBJECTIVES

HYPOTHESES

RESEARCH METHODOLOGY

RESULTS & DISCUSSION

FINDINGS

RECOMMENDATIONS/SUGGESTIONS

CONCLUSIONS

SCOPE FOR FURTHER RESEARCH

ACKNOWLEDGMENTS

REFERENCES

APPENDIX/ANNEXURE

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

JADAVPUR UNIVERSITY
KOLKATA

ABSTRACT

The study of corporate finance is one of the major areas of finance which looks into the financial problems of firms and their solution. Corporate finance deals with long-term and short-term decisions and techniques relating to monetary decisions that business enterprises make and the tools and analysis used to make these decisions. The primary goal of corporate finance is to maximize shareholder value thereby making Dividend Decision one of the important aspects of corporate finance. In the above context I have studied the relationship between the Dividend Payout Ratio, Gross Profit Margin, Net Profit Margin and ROCE of 2 companies Jindal Steel & Power & SAIL over a period of 2008 to 2012. The study is based on secondary data collected from the authentic websites of these companies. I have used Pearson's Correlation Coefficient (2 Tailed test, 5% Level of Significance) to see whether there is any significant correlation between the above mentioned variables. It also needs to be seen whether there are any major fluctuations in the above variables over the period of study and to what extent.

KEYWORDS

Corporate Finance, Dividend Payout Ratio, Gross Profit Margin, Investment Decisions.

INTRODUCTION

Corporate finance is the area of finance dealing with monetary decisions that business enterprises make and the tools and analysis used to make these decisions. The primary goal of corporate finance is to maximize shareholder value. The study of corporate finance is applicable to the financial problems of all kinds of firms. Short-term issues include the management of current assets and current liabilities, inventory control, investments and other short-term financial issues. Long-term issues include new capital purchases and investments. Thus corporate finance is associated with transactions in which capital is raised in order to create, develop, grow or acquire businesses. One of the major areas of Corporate Finance is Capital Investment Decision which looks into long-term corporate finance decisions relating to fixed assets and capital structure. Decisions are based on several inter-related criteria. (1) Corporate management seeks to maximize the value of the firm by investing in projects which yield a positive net present value when valued using an appropriate discount rate in consideration of risk. (2) These projects must also be financed appropriately. (3) If no such opportunities exist, maximizing shareholder value dictates that management must return excess cash to shareholders (i.e., distribution via dividends). Capital investment decisions thus comprise an investment decision, a financing decision, and a dividend decision.

LITERATURE REVIEW

In their paper "Financing-Motivated Acquisitions", *Isil Erel, Yeejin Jang, Michael S. Weisbach*, evaluated the extent to which acquisitions lower financial constraints on a sample of 5,187 European acquisitions occurring between 2001 and 2008. Each of these targets remains a subsidiary of its new parent, so they observed the target's financial policies following the acquisition. They examined whether these post-acquisition financial policies reflect improved access to capital. They found that the level of cash target firms hold, the sensitivity of cash to cash flow, and the sensitivity of investment to cash flow all decline significantly, while investment significantly increases following the acquisition. These effects are stronger in deals more likely associated with financing improvements. These findings are consistent with the view that easing financial frictions is a source of value that motivates acquisitions.

Kay Giesecke, Francis A. Longstaff, Stephen Schaefer, Ilya Strebulaev, in their paper "Macroeconomic Effects of Corporate Default Crises: A Long-Term Perspective", studied the macroeconomic effects of bond market crises and contrast them with those resulting from banking crises. During the past 150 years, the U.S. has experienced many severe corporate default crises in which 20 to 50 percent of all corporate bonds defaulted. Although the total par amount of corporate bonds has often rivaled the amount of bank loans outstanding, they found that corporate default crises have far fewer real effects than do banking crises. These results provide empirical support for current theories that emphasize the unique role that banks and the credit and collateral channels play in amplifying macroeconomic shocks.

Raghuram Rajan studied the nature of the firm and its linkage with financing in his paper "The Corporation in Finance". To produce significant net present value, an entrepreneur has to transform her enterprise into one that is differentiated from the ordinary. To achieve the control that will allow her to execute this strategy, she needs to have substantial ownership, and thus financing. But it is hard to raise finance against differentiated assets. So an entrepreneur has to commit to undertake a second transformation, standardization, that will make the human capital in the firm, including her own, replaceable, so that outside financiers obtain control rights that will allow them to be repaid. He argued that the availability of a vibrant stock market helps the entrepreneur commit to these two transformations in a way that a debt market would not. This helps explain why the nature of firms and the extent of innovation differ so much in different financing environments.

Aswath Damodaran, in his paper 'Dividends and Taxes: An Analysis of the Bush Dividend Tax Plan' studied the implications of making dividends tax free to investors. Investors and corporate finance practitioners contemplated about this after President Bush proposed it as part of his economic package in early 2003. While much of the debate has concentrated on the consequences of the tax law change for the stock market and budget deficits, the real effects may be in how companies raise money (debt versus equity), how much cash they choose to accumulate and how they return this cash to stockholders (dividends versus stock buybacks). If the tax law changes occur as proposed, it will profoundly alter the terms of the debate and require us to rewrite much that we take for granted in corporate finance today. In particular, companies will become more (if not entirely) equity financed, a decrease in cash balances and a dramatic surge both in the number of companies that pay dividends and in how much they pay. This asymmetric treatment of debt and equity has formed the basis for much of the debate in corporate finance on whether firms should use debt or equity and how much firms should pay out to their stockholders in dividends. In this paper, he considered the implications of the tax law change for both valuation and corporate finance practice.

OBJECTIVE AND METHODOLOGY OF THE STUDY

In this paper I have analysed the relationship between the Dividend Payout Ratio, Gross Profit Margin, Net Profit Margin and ROCE of 2 companies Jindal Steel & Power & SAIL over a period of 2008 to 2012. The study is based on secondary data collected from the authentic websites of these companies. I have used Pearson's Correlation Coefficient (2 Tailed test, 5% Level of Significance) to see whether there is any correlation between the above mentioned variables. It also needs to be seen whether there are any major fluctuations in the above variables over the period of study and to what extent. The dividend decision of these companies has also been compared over the period of study.

Null Hypothesis 1: There is no correlation between Dividend Payout Ratio & Gross Profit Margin of the companies being studied.

Alternate Hypothesis 1: There is correlation between Dividend Payout Ratio & Gross Profit Margin of the companies being studied.

Null Hypothesis 2: There is no correlation between Dividend Payout Ratio & Net Profit Margin of the companies being studied.

Alternate Hypothesis 2: There is correlation between Dividend Payout Ratio & Net Profit Margin of the companies being studied.

Null Hypothesis 3: There is no correlation between Dividend Payout Ratio & ROCE of the companies being studied.

Alternate Hypothesis 3: There is correlation between Dividend Payout Ratio & ROCE of the companies being studied.

INFERENCES AND RESULTS

a) In the case of Jindal Steel & Power there is a negative correlation between Dividend Payout and Gross Profit Margin (-0.485). This makes it obvious that the Gross Profit & Dividend Payout move in the reverse direction over the years. This is evident from March 2008 to March 2010, as the Gross profit Margin decreased, the Dividend Payout did not.

There is a negative correlation between Dividend Payout and Net Profit Margin (-0.386). This makes it obvious that the Net Profit & Dividend Payout move in the opposite direction over the years. This is evident in the initial part of the study period, as the Net Profit Margin decreased, the Dividend Payout did not.

There is a significant negative correlation between Dividend Payout and ROCE (-0.876). This makes it obvious that the Dividend Payout & ROCE move in the same direction over the years.

The Dividend payout has been more or less similar in the study period making it a stable series.

b) In the case of SAIL there is a significant positive correlation between Dividend Payout and Gross Profit Margin (-0.452). This makes it obvious that the Gross Profit & Dividend Payout move in the opposite direction over the years. This is evident from March 2008 to March 2010

There is a negative correlation between Dividend Payout and Net Profit Margin (-0.506). This may be because the fluctuations in the Net Profit Margin are very negligible. Thus the correlation is not that well defined.

There is a negative correlation between Dividend Payout and ROCE (-0.419). This makes it obvious that the Dividend Payout & ROCE move in the reverse direction over the years. This may be because the fluctuations in the Net Profit Margin are very negligible. Thus the correlation is not that well defined.

There is very little fluctuation in the Dividend payout over the period of study similar to the marginal fluctuations in GP & NP Margin & ROCE.

Thus the 3 Null Hypotheses are rejected as there is a correlation between Dividend Payout and Gross Profit Margin, Net Profit Margin, ROCE. Whether positive or negative there is a relation between the above. Thus GP, NP and ROCE affect the Dividend Payout Ratio. Thus the companies Tata Steel, Tata Power & Tata Motors relate their Dividend decisions with their Profit margins & ROCE.

CONCLUSION

Dividend decision is an important area of any Company especially while taking relevant corporate decisions or formulating critical corporate strategies. Every company puts in a lot of thought behind the same to somehow maximize the returns & also look into share holders' interest. Through this study one can conclude that there is a correlation between Dividend Payout and Gross Profit Margin, Net Profit Margin, ROCE. The two companies studied out here look into this area effectively. The decisions of Jindal Steel & Power & SAIL are somewhat similar being, their Dividend Payout increased with the increase in GP Margin, NP Margin and ROCE. Irrespective of the direction, one cannot rule out the correlation between the above. Also the Dividend payout had less variability for Jindal Steel & Power & SAIL. The same can be said about their respective GP & NP Margin & ROCE. Thus one can conclude that Dividend decision being one of the important decisions of Corporate Finance is influenced by GP & NP Margin & ROCE of the companies studied here which are Jindal Steel & Power & SAIL.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail i.e. **infoijrcm@gmail.com** for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
