CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Econometrics; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. info@ijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled '_____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:
Affiliation with full address, contact numbers & Pin Code:
Residential address with Pin Code:
Mobile Number (s):
Landline Number (s):
E-mail Address:
Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers**, and **email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

INTERNATIONAL JOURNAL OF RESEARCH IN COMMERCE & MANAGEMENT

A Monthly Double-Blind Peer Reviewed (Refereed/Juried) Open Access International e-Journal - Included in the International Serial Directories

<http://ijrcm.org.in/>

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION

REVIEW OF LITERATURE

NEED/IMPORTANCE OF THE STUDY

STATEMENT OF THE PROBLEM

OBJECTIVES

HYPOTHESES

RESEARCH METHODOLOGY

RESULTS & DISCUSSION

FINDINGS

RECOMMENDATIONS/SUGGESTIONS

CONCLUSIONS

SCOPE FOR FURTHER RESEARCH

ACKNOWLEDGMENTS

REFERENCES

APPENDIX/ANNEXURE

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

ABSTRACT

Performance management is one of the most researched area in the domain of human resource management .It is critical in terms of affecting the organizational performance on one side and employees' motivation on the other. Present conceptual article aims at discussing the factors which can make the performance management work for the organization and produce the intended results. The factors discussed are based on literature review and experts opinion and may be subjected to validation in further research.

KEYWORDS

Performance Management System, Effectiveness.

INTRODUCTION

Performance management is a comprehensive process of identifying, encouraging, motivating and rewarding the employees' performance (Mathis and Jackson, 2007). It essentially includes whatever is done to improve the performance of employees. The researcher has identified factors of effectiveness of performance management. These factors are mainly related to five aspects of performance management system (PMS) including organizational factors, characteristics of PMS, factors related to design of appraisal tool, factors related to processes of PMS and the factors related to use of appraisal results. A comprehensive literature survey was conducted to identify these factors. Following sections discuss these factors along with the considerations to make all these factors work to make the organizational performance management effective.

FACTORS OF EFFECTIVENESS OF PMS

Category wise factors of effectiveness of PMS are as discussed below:

ORGANIZATIONAL FACTORS

EFFECTIVE LEADERSHIP: The leadership can make or break the organizations. It is the leadership which provides direction to the entire organization and help the organizational systems to work in its favour. Performance management system in any organization is one of the most important aspects of organizational performance as it is linked to almost all the other systems and aspects of human resource management. Be it recruitment and selection, training and development, compensation management, career growth and development or even statutory compliances. The role of leadership therefore is very important in terms of envisioning organization's future performance and formulating and implementing strategies to achieve the same. All this is possible by having a motivated and engaged work force which is a part of performance management. The organizations therefore should have a system of nurturing leadership at all levels through appropriate initiatives on a continuous basis to ensure availability of effective leadership.

MANAGEMENT'S COMMITMENT AND SUPPORT FOR PMS: For the performance management system to work in favour of the organization, it is necessary that management is fully committed and supportive to the system. It can become possible by convincing the management about the impact PMS can have on other systems of the organization with the help of facts and figures. Once the management is convinced, it will lend its support for the performance management and commit the resources required to implement it.

EXISTENCE OF PERFORMANCE ORIENTED CULTURE: The organizational values, beliefs and working habits of its employees make its culture. The organizational culture plays an important role in its success. If the employees have working habits supported by the organizational values, it always positively affects the employees' performance which is the ultimate objective of any performance management system. The organizations therefore should strive to build and maintain a performance oriented culture by ensuring a motivational environment and transparent system.

INVOLVEMENT OF STAKE HOLDERS IN PMS: It is a well known fact that the sense of ownership makes the human beings feel close to any system in the organizations. The line managers and workforce are the stake holders in any organization and if they are involved in design, development and maintenance of performance management system, they are likely to feel the ownership which can result into enhanced employee performance. The stake holders can be involved in designing the appraisal tool, setting the performance goals and communication among other aspects.

ADEQUATELY TRAINED AND PREPARED EVALUATORS: One of the views to look at the performance management is that it will become effective if the appraisal related problems can be resolved. Majority of appraisal related problems arise out of mishandling the appraisal in terms of inaccurate assessment of performance, ineffective feedback and impersonal approach. It all happens due to the fact that the managers are not adequately trained to handle the performance appraisal. So if the raters are appropriately trained in both appraising skills and relevant behaviour, it can be made more effective so as to yield the desired results.

FACTORS RELATED TO CHARACTERISTICS OF PMS

PMS BEING CONSISTENT WITH THE STRATEGIC MISSION OF THE ORGANIZATION: Strategies are the game plans for any organization to achieve its goals and objectives. The organization's vision can be realized only by formulating and implementing proper strategies to achieve its goals and objectives by involving the employees (Bhattacharya, 2006). The goals are converted into objectives which percolate down from top level to the lowest level. The goal setting process as a part of performance management should ensure alignment of individual and departmental goals with the organizational goals. These goals then can be accomplished following the organizational strategy which may be organization specific.

CLARITY OF PMS OBJECTIVES: Any system in an organizational context can't be successful unless its purpose is not clarified to all the stake holders. So while designing and drafting the performance management system document, its objectives should be clearly defined so that the employees do not have any doubts and apprehensions. The performance management system should be 'sold' to its stake holders so that they feel its ownership.

COST EFFECTIVE AND LESS TIME CONSUMING PMS: The cost of designing, implementing and maintaining the performance management system and the time spent to do it should be justifiable.

OBJECTIVITY OF PMS: A biased appraisal may result into employees' dissatisfaction which in turn may result into grievances. So it is very important that the ratings are objective. The ratings may be biased due to either favoritism by the raters or their inadequate training. Taking care of these aspects can increase the objectivity of appraisals.

PMS BEING A CONTINUOUS PROCESS: In spite of volumes of literature and practical experience about the performance management advocating frequent appraisals, majority of the organizations even today have annual appraisals. It has two fold problem; one, it does not provide any opportunity for mid course correction in performance and relooking at the objectives and two, it is not possible to remember the unrecorded performance if any till the end of year.

PMS PROVIDING EQUAL OPPORTUNITY FOR ALL: The performance management system of the organization should ensure equal opportunity to all the employees in terms of availability of resources and working conditions. There should not be any discrimination on these two aspects of performance.

PMS PROMOTING TEAM WORK AND COOPERATION: Due to complexities in working and technological advancement, no individual or department can work in isolation. The organizational success depends a lot on the team work and collaborations. Therefore the PMS should help in promoting the team work. One of the possible ways to do this may be team appraisals wherever possible.

LEGALLY DEFENSIBLE PMS: An ineffective PMS in terms of biased ratings and inadequate linkage to appropriate rewards may result into litigations. Though this problem is more severe in western countries as compared to rest of the world, it is however important that the performance management system is legally defensible in terms of content and procedures both, apart from objective ratings.

FACTORS RELATED TO DESIGN OF APPRAISAL TOOL

Many a times the appraisal form is too complicated for the employees to understand and fill it correctly. A good appraisal form should be simple to understand with appropriate weightage for all the performance dimensions in the job. It should measure what is performed. The measurement criteria of performance should be clearly defined with a clear rating scale discriminating good performance from the poor performance. It should also specify the expected standard of performance in each performance dimension with a focus on results rather than personalities.

FACTORS RELATED TO PROCESSES IN PMS

The processes in performance management include 'goal setting', 'performance appraisal', 'communication', 'feedback' and 'grievance redressal'. This section discusses how the PMS processes can be made more effective:

GOAL SETTING: Achieving the preset goals becomes easy and effective if the stake holders are involved in the process of goal setting. Management by Objective (MBO) approach goes handy in the process. It enhances the clarity about the goals as well as the sense of ownership is high. Goal setting by mutual agreement includes deciding on performance standards, criteria for measurement and weightage for various dimensions of performance in the given job role. Each employee in the organization has his/her own goals for career progress along with the organizational goals to achieve. If the individual goals are aligned with the organizational goals, it becomes a win-win situation for both the parties, the organization and the employees. In such situation, the employees would feel more belonging to organization, the sense of ownership of goals will be higher and urge to achieve would therefore be higher which would ultimately result into higher contribution of individuals in achieving the organizational goals. Good organizations allow revision of goals in between depending upon the experience about employees' performance, working conditions and business needs. However it is possible only where the frequency of appraisal is more than once in a year.

COMMUNICATION: The organizations which have an effective communication mechanism are likely to succeed more than those which lack it. Effective communication is characterized by clarity and timeliness. If the employees are clearly communicated about the performance expectations including the performance standards; the chances of their being successful in achieving the goals are higher than others. Communication also includes giving feedback in an objective manner with a positive mindset. Two channels of communication are suggested, One Making the deliverables structured and measurable and two, Including the employees in performance management process (Shubha Sharma, 2012)

FOCUSED APPRAISAL PROCESS: Appraisal of performance is the process of assessing the employees' performance against the preset goals and making the employees aware of the same. There are different methods of appraisals with their own pros and cons along with their suitability and applicability in particular situations. However the basic process remains the same. To enhance effectiveness of appraisal; it is important that the performance parameters are quantifiable as far as possible, so that there are no rating problems and goals are clear from the beginning to avoid surprises at the end. It should measure what is performed. Another aspect of appraisals is that it should be completed on time. Delayed appraisals result into impatience and anxiety among employees. While completing the appraisals, the supervisors should ensure that the appraisals are accurate with minimum rating errors and bias. The focus of appraisal process should be on winning human values viz. integrity, commitment etc and not merely completing a mechanical process. Skill sets of the employees should be given due weightage while assessing the performance. It is something which is 'portable' from one organization to another (Rumjhum Chatterjee, 2012). On the employees part, to deal with poor appraisal ratings, they should first accept the ratings and then set clear development goals for themselves, identify a mentor and take his help time to time and keep meeting the supervisor to review the progress (Bhatia and Nair, 2012)

FEEDBACK PROCESS: The feedback can either be formal process undertaken at the time of appraisal or informal and continuous. In a formal feedback process the employee and the supervisor seat together to discuss the employee's performance and the employee is given the feedback about his/her performance during the appraisal period. The problem with this approach is that it is just a post mortem of past performance and thus does not provide any opportunity to the employee for improvement. In a continuous feedback process on the other hand, the employees are given the feedback on a continuous basis mostly in an informal manner. In case of continuous feedback being practiced, there is hardly any thing which remains to be discussed at the time of appraisal meetings. But continuous feedback process also has got its own shortcomings like difficulty in monitoring, complication in making decisions about rewards and perceived lack of motivation without yearly targets (Sengupta, 2012). In most of the organizations they also discuss the rewards of good performance in terms of salary revisions, promotions etc during the performance feedback sessions which is not good. These two things should always be kept separate so that the supervisors don't feel embarrassed and pressurised. To make the process of feedback effective, the frequency of appraisal should be higher and the feedback ideally should not be a one way process but it should also provide for taking employees' feedback about various aspects of performance management while they are working as practiced in Maruti Udyog Limited (MUL) in form of "Stay Interviews".

APPEAL PROCESS: A performance management system having provision for a well defined appeal process will be more effective than the one without it. The employees should always be given due hearing about their grievances particularly the grievances related to performance appraisal.

FACTORS RELATED TO USE OF APPRAISAL RESULTS

At the outset it is presumed that the appraisals are done to make decisions about revision of salaries, providing for bonus and incentives etc. Whereas the fact is that it goes way beyond merely the financial compensation. Good performance management system would provide for rewarding not only the tangible outputs but also the efforts put in by the employee in pursuit of achieving the goals (Priya Nair and Yasmin Taj, 2012) because some times the employees put in best of their efforts but without being able to convert them into tangible results due to various constraints like unavailability of resources on time, working conditions etc. The attitude of the employees as reflected in their behavior should also be given due weightage. The appraisals should not focus only on numbers (Grote Dick, 2011). An effective performance management system should allow mid course correction in the performance goals if required particularly during down times, it should link the appraisal results with assessment of employees' potential and training need identification. The appraisal results should also be used for identifying the performance related problems if any apart from development of subordinates as a part of supervisor's responsibility in addition to documentation and compliances.

OUTCOMES OF PMS: There are different approaches to look at the net outcome of the organizational performance management system. It could be performance improvement and employee development which is generally the case, It could be Increased employee satisfaction which is likely to result into enhanced performance or it could even be development of positive relationships between appraisers and appraisees. The objective of the performance

management system may vary with the organizations and industries. However, the basic aim should be to improve the employees' performance and help in providing a good happy, healthy and pleasant work environment to them.

CONCLUSION

Various strategies and efforts required to be made to enhance the effectiveness of performance management system in the organizations have been discussed. By taking care of all the aspects, one can expect the performance management system to be effective enough to meet the expectations of the stakeholders. But one thing to remember here is that in spite of taking all care about the performance management system, its acceptability should be checked time to time through surveys and necessary changes may be incorporated as per the suggestions received from the stakeholders.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail i.e. **infoijrcm@gmail.com** for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
