## **CALL FOR MANUSCRIPTS**

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## **GUIDELINES FOR SUBMISSION OF MANUSCRIPT**

### 1. **COVERING LETTER FOR SUBMISSION:**

DATED: \_\_\_\_\_

**THE EDITOR**  
IJRCM

**Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF**

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

**DEAR SIR/MADAM**

Please find my submission of manuscript entitled '\_\_\_\_\_ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

#### **NAME OF CORRESPONDING AUTHOR:**

Designation:  
Affiliation with full address, contact numbers & Pin Code:  
Residential address with Pin Code:  
Mobile Number (s):  
Landline Number (s):  
E-mail Address:  
Alternate E-mail Address:

#### **NOTES:**

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:  
**New Manuscript for Review in the area of** (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers**, and **email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

## **INTERNATIONAL JOURNAL OF RESEARCH IN COMMERCE & MANAGEMENT**

A Monthly Double-Blind Peer Reviewed (Refereed/Juried) Open Access International e-Journal - Included in the International Serial Directories

<http://ijrcm.org.in/>

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

**INTRODUCTION**

**REVIEW OF LITERATURE**

**NEED/IMPORTANCE OF THE STUDY**

**STATEMENT OF THE PROBLEM**

**OBJECTIVES**

**HYPOTHESES**

**RESEARCH METHODOLOGY**

**RESULTS & DISCUSSION**

**FINDINGS**

**RECOMMENDATIONS/SUGGESTIONS**

**CONCLUSIONS**

**SCOPE FOR FURTHER RESEARCH**

**ACKNOWLEDGMENTS**

**REFERENCES**

**APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
  - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use (ed.) for one editor, and (ed.s) for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parentheses.
  - The location of endnotes within the text should be indicated by superscript numbers.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**

global crisis, Indian Business.

**INTRODUCTION**

The Indian economy is experiencing a downturn after a long spell of growth. Industrial growth is faltering, the current account deficit is widening, foreign exchange reserves are depleting, and the rupee is depreciating.

The crisis originated in the United States but in Indian government had reasons to worry because there was a potential adverse impact of the crisis on the Indian banks. Lehman brothers and Merrill Lynch had invested a substantial amount in Indian banks, who in turn had invested the money in derivatives, leading to exposure of even the derivatives market to these investment bankers.

Public sector unit (PUC) banks of India like bank of Baroda had significant exposure towards derivative. ICICI faced the worst hit with Lehman brothers having filed for bankruptcy in the US, ICICI (India's largest private bank), survived a rumor during the crisis which argued that the giant bank was slated to lose \$80million (Rs.375 cores), invested in Lehman's bonds through the bank's UK subsidiary. Even axis bank was affected by the meltdown.

The impact of the crisis on the Indian economy has been studied here forth and the study is chiefly focused on 4 major factors which affect the Indian economy as a whole. These are as per following:

1. Availability of global liquidity
2. Decreased consumer demand affecting exports
3. The financial crisis and the Indian IT industry
4. The financial crisis and India's financial markets

**AVAILABILITY OF GLOBAL LIQUIDITY FOR INDIA IN TIMES OF FINANCIAL CRISIS**

The main source of Indian prosperity had been foreign direct investment (FDI). American and European companies were bringing in truck-loads of dollars and Euros to get a piece of pie of Indian prosperity. Less inflow of foreign investment will lead to a dilution of the element of GDP driven growth. India is in no position to ever return this money because it has used the same in subsidizing the petroleum products and building low quality infrastructure.

Liquidity is the major driving force of the stock market performances observed in emerging markets. Markets such as those of India are especially dependent on global liquidity and international risk appetite. The initial stage of the crisis witnessed rising interest rates across global economies. Rising interest rates tend to have a negative impact on global liquidity, and subsequently equity prices, as funds may move into bonds or other money market instruments.

Even though there are threats for the Indian economy due to the global liquidity crunch, they are all oriented for the long term. Any short term liquidity concern will be taken care of by the high rate of household and corporate savings in the country. The Indian economy can certainly rely on its 'piggy bank' to address its short-term liquidity demands as the government is taking measures to channelize large sums of household savings lying unused in physical assets into the more productive financial sector. Thus, the Indian economy will be relatively unaffected by the global liquidity crunch.

Indian companies which had access to foreign for financing their trading activities are the worst hit. Foreign funds will be available at huge premiums but will be limited to the blue-chip companies, thus leading to

- Reduced capacity of expansion leading to supply pressure.
- Increased interest rates which will affect corporate profitability
- Increased demand for domestic liquidity which will put interest rates under pressure

**DECREASED CONSUMER DEMAND AFFECTING EXPORTS**

Consumer demand has plummeted drastically in developed economies, leading to a reduced demand for Indian goods and services, thus affecting Indian exports.

- Exports oriented units are the worst hit; thus impacting employment
- Trade gap has been widening due to the reduced exports, leading to pressure on the rupee exchange rate.
- In India, IT companies, with nearly half of their revenues coming from financial and banking service segment, are close monitors of the financial crisis across the world. The IT giants who had Lehman brothers and Merrill Lynch (ML) as their clients are Tata consultancy services (TCS), Wipro, Satyam, and Infosys Technologies. HCL escaped the loss to a great extent because neither Lehman brothers nor ML was its client.

**IMPACT ON FINANCIAL MARKETS**

The outflow of foreign institutional investment from the equity market has been the most immediate effect of the crisis on India. Foreign institutional investors (FIIs) have been major sellers in Indian markets as they need to retrench asset in order to cover losses in their home countries, thus being forced to seek havens of safety in an uncertain environment.

The financial crisis has reinstated the notion that in the globalised world, no country can exist as an island, insulated from the twists and turns of the global economy; growth prospects of emerging economies have been undermined by the cascading financial crisis, though there certainly exist significant variations across the countries.

## BACKGROUND OF THE CRISIS

A disorderly contraction in wealth and money supply in the market is the basic cause of a financial crisis, also known as a credit crunch. The participants in an economy lose confidence in having loans repaid by debtors, leading them to limit further loans as well as recall existing loans.

Credit creation is the lifeblood of the financial/banking system. Credit is created when debtors spend the money and which in turn is 'banded' and loan to other debtors. Due to this, a small contraction in lending can lead to a dramatic contraction in money supply.

The present global meltdown is a culmination of several factors, the most important being irrational and unsustainable consumption in the west particularly in the United States disproportionate to its income by consistent borrowings fueled by savings and surpluses of the east particularly China and Japan.

The second important factor is the greed of the investment bankers who induced housing loans by uncontrolled leveraging on an optical illusion of increasing prices in the housing sector.

The third important factor is the failure of the regulating agencies who ignored the warning signals arising out of the ballooning debts, derivatives and financial innovation on the assumption that the Collateral Debt Obligation(CDO), the Credit Default Swapping(CDS) and Mortgaged Backed Securities(MBS) would continue to remain safe with the mortgage guarantees provided by Government Sponsored Enterprises(GSEs) namely Fannie Mae and Freddie Mac which had enjoyed the political patronage since inception.

There are other several factors including shadow banking system, financial leveraging by the investment bankers and lack of adequate disclosure in the financial statements leading to fallacious rating by the rating agencies.

## CAUSE OF THE CRISIS

The current crisis has been linked to the sub-prime mortgage business, in which US banks give high-risk loans to people with poor credit histories.

These and other loans, bonds, or assets are bundled into portfolios or Collateralized Debt Obligations(CDOs) and sold to investors across the globe.

Falling housing price and rising interest rates led to high numbers of people who could not repay their mortgages. Investors suffered losses and hence became reluctant to take on more CDOs. Credit markets froze and banks became reluctant to lend to each other, not knowing how many bad loans and non-performing asset could be on their rival's books.

The crisis began with the bursting of the United States housing bubble and high default rates on sub-prime mortgages and adjustable rate mortgages (ARM).

The foreclosures exceeded 1.3 million during 2007 up 79% for 2006 which increased to 2.3 million in 2008, an 81% increase over 2007.

## EFFECT THE FINANCIAL CRISIS IN INDIA

The global financial crisis has not left India unscathed. Over the last seven months, growth has slipped dramatically – to 5.3% in the last quarter of calendar year 2008- from over 9% in the previous four years. The contagion of the crisis has spread to India through all the channels- the financial channel, the real channel, and importantly, as happens in all financial crises, the confidence channel.

The slowdown is likely to have a large and immediate impact on employment and poverty informal surveys suggest significant job losses. Job creation is likely to remain a key concern as new entrants to the labor force- relatively better educated and with higher aspirations- continue to put pressure on the job market.

The country has the option of turning the crisis into an opportunity. The most binding constraints to growth and inclusion will need to be addressed: improving infrastructure, developing the small and medium enterprises sector, building skills, and targeting social spending at the poor. Systemic improvement in the design and governance of the public programs are crucial to get result from public spending.

## GLOBAL LIQUIDITY CRUNCH AND THE INDIAN ECONOMY

The Indian banking system was gauged as being relatively immune to the factors that have led to the turmoil in the global banking industry. The problems of the global banks arose mainly due to the sub-prime mortgage lending and investments in complex collateralized debt obligations (CDOs) whose values were sharply eroded. Confidence-related issues had also affected banks across the globe due to the freeze in the inter-bank market. Indian banks had limited vulnerability on both counts.

The reasons for tight liquidity conditions in the Indian markets during the earlier stages of the crisis were quite different from the factors driving the global liquidity crisis. Large selling by foreign institutional investors (FIIs) and the subsequent interventions by the Reserve Bank of India (RBI) in the foreign currency market, continuing growth in advances, and earlier increases in the cash reserve ratio (CRR) to contain inflation are some of the reasons that accelerated the Indian liquidity crunch.

Thousands of investors, big and small, have been hurt by the downward plunge of the Indian stock market. It will also have broader implication for India's financial system and the future savings and investment patterns.

Cautious investors had started to diversify away from bank deposits and cash over the past few years, and had moved to equities, mutual funds and insurance products. The financial crisis also struck the company at a time when there were growing suspicions related to the Maytas issue.

## CONCLUSION

As the contagion of the financial system collapse across the world spread towards India, and into it, the government and the Reserve Bank of India (RBI) responded to the challenge in close coordination and consultation. The main plank of the government's response was fiscal stimulus while the RBI's action comprised monetary accommodation and counter cyclical regulatory forbearance.

The RBI policy response was to keep the domestic money and credit markets functioning normally and see that the liquidity stress did not trigger solvency cascades. RBI targets can be classified into two prime directions:

- To maintain a comfortable rupee liquidity position
- To augment foreign exchange liquidity

## **REQUEST FOR FEEDBACK**

**Dear Readers**

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com).

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

**Academically yours**

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
