CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR

IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF _____.

(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to their inclusion of names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

NAME OF CORRESPONDING AUTHOR :

Designation :

Institution/College/University with full address & Pin Code :

Residential address with Pin Code :

Mobile Number (s) with country ISD code :

Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :

Landline Number (s) with country ISD code :

E-mail Address :

Alternate E-mail Address :

Nationality :

NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. **pdf. version is liable to be rejected without any consideration.**
- b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**
New Manuscript for Review in the area of (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
- e) **Abstract alone will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
- f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
- g) The author (s) name or details should not appear anywhere on the body of the manuscript, except the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.

2. **MANUSCRIPT TITLE:** The title of the paper should be **bold typed, centered and fully capitalised**.
3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
5. **ABSTRACT:** Abstract should be in **fully italicized text**, ranging between **150 to 300 words**. The abstract must be informative and explain the background, aims, methods, results & conclusion in a **SINGLE PARA. Abbreviations must be mentioned in full.**
6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations.
7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aeaweb.org/econlit/jelCodes.php, however, mentioning JEL Code is not mandatory.
8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER. It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
11. **MAIN TEXT:**

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably range from 2000 to 5000 WORDS.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, horizontally centered with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word should be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section: Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they are supposed to follow Harvard Style of Referencing. **Also check to make sure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parenthesis.
 - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders after the references.

ROLE OF TALENT MANAGEMENT IN BUSINESS STRATEGY

HARDEEP
RESEARCH SCHOLAR
DEPARTMENT OF COMMERCE
M. D. UNIVERSITY
ROHTAK

ABSTRACT

Today Talent management is most significant factors for structure success. we have a tendency to will say talent management is distinctive, attracting, integration, developing, motivating and retentive folks of the organization .The 3 most significant areas were talent management, leadership development and performance management and rewards. in step with The Conference Board (Morton, 2005), "talent" refers to "individuals WHO have the potential to create a major distinction to this and future performance of the corporate." This definition emphasises the necessity to incorporate not solely a read of however staff square measure playing currently, however conjointly their capability to perform within the future to fulfil new industrial demands.

KEYWORDS

talent management, performance appraisal, retention.

INTRODUCTION

Many corporations have enforced talent management systems in recent years, and also the issue has recently been subject to the eye of scientific literature, from totally different theoretical views. specifically, HRD literature advanced few essential views on talent management, discussing its real impact on HRD practices. this text reports the results from case studies on four Indian corporations, focusing the social control practices they enforced for managing talent. The results show that, within the Indian context, talent is managed for terribly totally different structure objectives, with the overall aim to foster a divided approach to the work force and to commit high and line managers to HRD activities. The results square measure compared with existing literature, and each implications for HRD apply and HRD theory square measure highlighted.

LITERATURE ON TALENT MANAGEMENT

Talent management has become a key management issue. many studies showed that business leaders think about finding proficient folks to be the one most significant social control preoccupation for this decade (e.g. Paauwe 2007; Guthridge, Kommand Lawson 2008; Deloitte 2010). These authors expect that the aggravating competition for talent can have a serious result on corporations. Despite the recession, several business leaders square measure adjusting their talent methods to fulfil the future talent shortages (Deloitte 2010). The increasing attention for talent and also the expected talent shortages square measure stricken by many trends and factors, like demographic changes caused by ageing and increasing quality and globalisation (e.g. Basri and Box 2008; Beechler and Woodward 2009; Tarique and Schuler 2010; Schuler, Jackson and Tarique 2011a, 2011b). Transformational changes in business environments conjointly have an effect on the number, quality and characteristics of the talent required (Ashton and jazz musician 2005; Guthridge et al. 2008; Beechler and Woodward 2009; Schuler et al. 2011a, 2011b; Vaiman, servant and Collings 2012). This refers to developments like the shift from product-based to knowledge-based economies, the necessity for workers WHO will handle additional complicated occupations, the changes in structure (for example cooperation and network arrangements) and also the growing importance of building and sustaining relationships. Blass and Apr (2008, p. 48) state that 'the extremely educated worker could be a less malleable supply for the corporate and a additional mobile capitalist of his/her intellectual, social and emotional capital'. Schuler et al. (2011b) claim that the success of corporations nowadays relies on however effectively they determine and manage the (global) talent challenges they're confronted with and adapt to those challenges as they evolve and develop. The question is whether or not the organization is ready to urge the correct folks within the right place at the correct time .These talent challenges are debated extensively in common and professional person adjusted literature, net magazines and on social networking sites. Since 2001, lecturers have conjointly made a substantial quantity of literature on talent management. In 2006, Lewis and Heckman complete that despite the degree of educational literature, talent management was still in its infancy; it lacked a transparent and consistent definition and scope moreover as a abstract framework supported research. In 2009, this was once more confirmed by Collings and Mellahi. Simply 2 years later, Collings, servant and Vaiman (2011) complete that the sphere had touched from infancy to adolescence, due to the contribution of the many, in the main US-based, student's exploitation North yank thinking and analysis. The consequence is, in their read, that the North American country context includes a dominant influence on the talk. Additionally, Powell et al. (2012) state that there's conjointly a powerful specialize in talent management within the personal sector and in multinationals. this is often corresponding to the overall field of human resource management (HRM) (Keegan and Boselie 2006). within the field of HRM, there's a growing awareness of the relevant impact of discourse factors within the shaping of the use relationship and HRM (Paauwe 2004). Therefore, this ideas and assumptions in talent management literature associated with the context of US-based, personal and transnational organizations square measure in all probability but equal to describe and study talent management in organizations in alternative contexts, like public or non-profit organizations or tiny and medium enterprises.

OBJECTIVE OF STUDY

Objective of study is to present the role of Talent management.

RESEARCH METHODOLOGY

This paper presenting roll of talent management in business strategy. After go through journals ,various papers and various web search engines I found that talent management is very important for any organization .

TALENT INSUFFICIENCY AND ACCOMPLISHMENT

Technology advances have pushed businesses forward however they've conjointly given new challenges: finding the correct folks to assist you get the correct merchandise to plug — particularly before your competition — is more durable than ever. this is often combined by the appearance of on-line skilled networks. Where as these networks will facilitate recruiters additional simply realize new talent, they conjointly create it doable for high performers to be found by alternative hungry recruiters and cherry choose talent for his or her next nice job. Some jobs square measure simply crammed, however only too usually the talent the organization desires is scarce and also the talent of recruiters in quickly finding and appeal that talent is crucial. this is often a matter of strategic importance to the company's bottom line. Open essential positions result in delayed comes, lost targets and overextended groups. And a delayed project isn't simply Associate in Nursing inconvenience—it will mean the distinction between obtaining a product out before competitors and being late to plug. These vacancies will ultimately contribute to reduced revenue and loss of market share. Given the impact vacancies will wear the organization, recruiters should perpetually explore new techniques to cut back the time to fill openings. therefore what works?

In this study, results varied. Simply over common fraction of corporations purpose to higher sourcing because the darling plan of action in decreasing time to fill . ligature for second place were the utilization of social tools and improved screening and assessments. Some corporations conjointly noted enhancements

attributable to higher package and processes. Solely seven-member of corporations aforesaid that additional competitive compensation and edges created a distinction. This might be as a result of organizations square measure unwilling to extend pay or haven't thought-about exploitation non-financial rewards to draw in talent. Corporations falling into the "other" class reported techniques like being flexible in adhering to job descriptions once sourcing new recruits and looking forward to their firm's success and name to draw in talent. The takeaway is that there's no remedy once it involves decreasing time to fill. Additional likely, it's a mix of higher sourcing, effectively investing social media tools, rising screening and streamlining package applications and processes. As we'll see later, some corporations are turning to non-financial rewards. Finally, one plan of action not mentioned by those surveyed is employing a holistic, analytical approach to higher anticipate vacancies—via foreseen retirement or attrition—and prepare before there's an instantaneous would like.

RETENTION, COMPENSATION AND LEARNING

If finding the simplest folks is crucial to a company's success, keeping them is even additional necessary. Even as with customers, finding new high talent is longer and resource-consuming than keeping the highest talent you have already got. Compensation and learning square measure primary factors in worker satisfaction, that ultimately ends up in retention, and that they are examined during this section. once search regarding general retention methods, eightieth of study rumoured that specialize in one among 2 tactics: higher worker engagement through clear goals and communication, and higher career and succession management. within the book on the far side HR: The New Science of Human Capital, John Boudreau and Pete Ramstad create a case for cheater focus, like higher desires analysis once it involves worker retention. After all, organizations aim to retain high performers and high potentials, not all staff. solely 100 percent of respondents listed desires analysis as a high focus, that is in line with general survey findings relating to talent management application integration and also the embracement of unit of time analytics. At this time, unit of time remains seemingly to be centred on programs for the overall worker population. Respondents WHO answered "other" named techniques like employing a combination of those ways (rather than focusing effort on one) or exploitation higher choice as the simplest way to boost retention. whereas limiting choice to those anticipated to remain may match once there's an oversized pool of qualified candidates, in times of talent insufficiency, it's going to be impractical.

PERFORMANCE MANAGEMENT AND TALENT REVIEWS

End-to-end talent management encompasses 3 main pillars: accomplishment, learning and performance management. Performance management could be a crucial part of maintaining the simplest doable work force because it allows corporations to spot high performers and high potentials whereas conjointly understanding problems with under-performance. From there, corporations will higher strategize benefit will increase, retention efforts and additional. Organizations indicated that coaching managers in performance management has brought them the foremost success; this is often conjointly the world of greatest focus for continuing improvement. the opposite 2 productive practices are higher alignment between goals and higher goal setting. Respondents WHO answered "other" pointed to the importance of constructing performance management a part of the culture and in progress employee-manager communication. one among the foremost necessary parts of talent management is to travel on the far side the individual performance appraisals and appearance closely at the talent pool to spot and develop key talent. This method is usually known as a talent review, and is handled by a committee of senior managers. simply over 2 hundredth of organizations rumoured that they failed to use talent reviews. If we have a tendency to specialize in the nearly eightieth that did, we discover that near 1/2 those solely use paper-based reviews. Given the benefit with that talent review committees will type through Associate in Nursingd appraise a worldwide work force exploitation an integrated talent management system, it looks seemingly the quantity exploitation manual processes can shrink within the years ahead. complete technology (instead of integrated technology) is amazingly prevalent; it's utilized by run over 1/2 the organizations that use technology for talent reviews.

THE APPEARANCE OF INTEGRATION

Soon when adopting new talent management applications, most organizations notice the necessity for integration. Technology investments square measure usually created to contour processes and improve information accuracy. however the total power of technology can not be realised once corporations have multiple systems of record with disconnected information streams and conflicting processes. Moving information from one system to a different and ultimately wanting to method the data in an exceedingly manual application, sort of a programme, ends up in inaccuracies, frustration and wasted force. Study shows that unit of time includes a great distance to travel once it involves integration. the bulk of organizations surveyed report poor to moderate integration of their talent management applications. Performance management could be a bit additional seemingly to be integrated than the opposite pillars of talent management, though even there the quantity with poor integration greatly outnumbers those with sensible integration. Talent management is more and more turning into a priority for corporations and CEOs have new, additional strategic expectations of their unit of time leadership. At constant time, unit of time leaders attempt to be seen as over transactional contributors and push for a seat at the manager designing table. To elevate their roles and gift CEOs with the thoughtful, verified talent intelligence demanded, unit of time leaders can got to create systems integration and clean, consistent information bigger priorities.

CONCLUSION

The talent management ply necessary role in trade growths. Slower economic process combined with a insufficiency of talent to fill crucial positions, the appearance of social networking and a replacement generation of digital natives, AND raised expectation from the highest, mean that the times of transactional unit of time have long passed. unit of time leaders need a seat at the strategic table and CEOs need to relinquish it to them. however to be ready to create this leap from transactional to strategic, unit of time leaders got to place bigger specialize in tools, method and integration and stop addressing talent management in silos. whereas techniques for decreasing time to fill, maximising the effectiveness of compensation and rewards, and retentive high performers vary among corporations, one factor is constant: easy accessibility to work force intelligence is essential. while not access to wash, consistent information, unit of time leaders cannot act with the knowledge and speed to urge the simplest folks at very cheap price and make sure the best performance and lowest attrition. Moreover, unit of time can lose the chance to be true leaders within the business and facilitate guide the CEO in choices supported future business impact. what percentage high performers can you lose to retirement within the next 5 or 10 years? What talent demands square measure on the rise? that regions, classes and functions would like bigger attention? what is going to be very cheap line impact of giving benefit will increase to high performers solely vs. all employees? {this is|this is often|this will be} all insight that the unit of time leader can and may give. one among the 3 crucial parts of a productive business has the simplest folks within the world. it's a war to seek out, develop and retain the simplest folks, however it's one which will be won with the correct tools at hand.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

DISCLAIMER

The information and opinions presented in the Journal reflect the views of the authors and not of the Journal or its Editorial Board or the Publishers/Editors. Publication does not constitute endorsement by the journal. Neither the Journal nor its publishers/Editors/Editorial Board nor anyone else involved in creating, producing or delivering the journal or the materials contained therein, assumes any liability or responsibility for the accuracy, completeness, or usefulness of any information provided in the journal, nor shall they be liable for any direct, indirect, incidental, special, consequential or punitive damages arising out of the use of information/material contained in the journal. The journal, neither its publishers/Editors/Editorial Board, nor any other party involved in the preparation of material contained in the journal represents or warrants that the information contained herein is in every respect accurate or complete, and they are not responsible for any errors or omissions or for the results obtained from the use of such material. Readers are encouraged to confirm the information contained herein with other sources. The responsibility of the contents and the opinions expressed in this journal are exclusively of the author (s) concerned.

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
