DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to their inclusion of names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

NAME OF CORRESPONDING AUTHOR :

Designation :

Institution/College/University with full address & Pin Code :

Residential address with Pin Code :

Mobile Number (s) with country ISD code :

Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :

Landline Number (s) with country ISD code :

E-mail Address :

Alternate E-mail Address :

Nationality :

NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. **pdf. version is liable to be rejected without any consideration.**
 - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**
New Manuscript for Review in the area of (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
 - c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any **specific message w.r.t.** to the manuscript.
 - d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
 - e) **Abstract alone will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
 - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
 - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be **bold typed, centered and fully capitalised**.
 3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
 4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
 5. **ABSTRACT:** Abstract should be in **fully italicized text**, ranging between **150 to 300 words**. The abstract must be informative and explain the background, aims, methods, results & conclusion in a **SINGLE PARA. Abbreviations must be mentioned in full.**
 6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations.
 7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aeaweb.org/econlit/jelCodes.php, however, mentioning JEL Code is not mandatory.
 8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER. It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
 9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
 10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
 11. **MAIN TEXT:**

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably range from 2000 to 5000 WORDS.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, horizontally centered with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word should be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section: Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they are supposed to follow Harvard Style of Referencing. **Also check to make sure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parenthesis.
 - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders after the references.

ABSTRACT

This study examines the relationship between gross domestic savings and total investment and compare their trend behaviour in both India and china. Secondary data from 2001 to 2013 of gross domestic savings and total investment have been collected from World Development Indicators and World Economic Outlook Database. Statistical techniques like correlation, trend analysis have been used for analysis purpose. It concludes the highly positive correlation between total investment and gross national savings in both India and china. It also concludes that total investment is in surplus over gross national savings in India whereas situation is reverse in case of china. It indicates that India's investment is the outcome of both gross domestic savings and net foreign sources whereas china is the exporting its surplus savings to other countries. Besides, total investment and gross national savings of china have always been upper than of India.

KEYWORDS

saving, gross domestic saving, investment.

INTRODUCTION

Both saving and investment are important factors that affect economic growth of a country. Saving is that part of income which is not spend on final consumption. In other words, saving is the sacrifice of present consumption for more future consumption. In fact, income after taxes can be used for saving and consumption. More consumption will lead to less saving and vice versa.

$S = Y - C$

(Here S=saving, Y= income after taxes, C= consumption expenditure)

Major source of gross domestic savings in India are household sector savings, public sector savings and corporate sector savings.

Gross domestic savings= GDP-Final consumption

When saving is used for purchasing buildings, roads, factories, new machines, stock of finished goods, transport, forestry etc., then it is called investment. More Investment leads to more capital formation which results in more employment, production and economic growth of the country. Investment does not depend on only savings but it can take place through other foreign sources also like net loan received by households, corporate sector and government from foreign government, net foreign investment etc. Sources of Investment can be separated into two parts:

1) Domestic saving

2) Foreign sources

Net foreign sources= Net foreign liabilities- Net foreign assets

OBJECTIVES OF THE STUDY

The objectives of the study are as under:

- 1) To study the trend and relationship between saving and investment
- 2) To compare saving and investment behaviour of India and china

RESEARCH METHODOLOGY

This study is based on secondary data of Total investment (% of GDP) and Gross domestic saving (% of GDP) collected from World Economic Outlook Database and world Development Indicators. Relationship between Two variables, i.e., Total investment (% of GDP) and Gross domestic saving (% of GDP) has been computed by means of coefficient of correlation and coefficient of determination techniques of statistics. Two way tables and graphs also have been used to present data more unambiguously.

ANALYSIS AND INTERPRETATION**1) GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENT IN INDIA****TABLE 1: GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENT IN INDIA**

Description	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Total investment(% of GDP)	24.244	24.75	26.831	32.818	34.65	35.659	38.114	34.305	36.48	36.502	38.936	36.297	32.522
Gross Domestic savings (% of GDP)	24.7	24	25.5	30.7	31.5	32.7	34	30.5	30.9	32.2	32.5	29.5	29.6

Source: World Economic Outlook Database and World Development Indicators

Table 1 indicates that gross domestic savings in India has shifted from 24.7% to 29.6% since 2001 to 2013 whereas total investment has also increased from 24.244 per cent to 32.522 per cent. It also points out that investment has always been higher than gross domestic savings in India. Hence India has marked up only 19.84 % increase in gross domestic savings from 2001 to 2013 This table also lays down the fact that total investment in India is increasing at a high pace in comparison of gross domestic savings.

GRAPH 1: GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENTS OF INDIA

The above graph 1 reflects high positive correlation between gross domestic savings and total investment in India as both trend lines are very close to each other. It also pinpoints that the total investment of India has always been remained higher than gross domestic savings which indicates that India has been using foreign sources to finance investment. The gap between total investment and gross national savings is becoming more wider which signifies augmented net foreign sources in India. Net foreign sources are the surplus of net foreign liabilities over net foreign assets.

2) GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENTS OF CHINA

TABLE 2: GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENTS OF CHINA

Description	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Total investment	36.017	36.62	40.165	42.408	40.858	40.373	40.902	42.683	45.801	46.959	47.011	46.504	46.627
Gross Domestic Savings	37.8	39.7	42.7	44.7	46.4	49.2	49	50.3	51.5	50.4	49.2	50.1	50.4

Source: World Economic Outlook Database and World Development Indicators

Table 2 reveals gigantic changes in total investment and gross domestic savings since 2001 to 2013 In 2001, total investment is 36.017 per cent of GDP which has augmented up to 46.627 per cent of GDP in 2013 while gross domestic savings also have increased from 37.8 per cent to 50.4 per cent from 2001 to 2013 China has marked up 33.33% rise in gross domestic savings from 2001 to 2013 The above table also indicates that pace of increment in saving in china is higher than the pace of total investment.

GRAPH 2: GROSS DOMESTIC SAVINGS AND TOTAL INVESTMENTS OF CHINA

The graph 2 reflects that total investment has always been lower than gross national savings in China. It indicates that china is indulged in exporting its saving to other countries. Net foreign assets of china is in excess of net foreign liabilities which leads to net foreign sources to be negative. This negative net foreign source specifies that part of gross domestic savings which is in excess of total investment. This graph also indicates high positive correlation between total investment and gross domestic savings in china.

3) RELATIONSHIP BETWEEN SAVING AND INVESTMENT IN INDIA AND CHINA

TABLE 3

Description	India	China
Coefficient of correlation(r)	0.9478	0.84185
Coefficient of determination(r ²)	89.83	70.87

The above table 3 pinpoints that gross domestic savings and total investment in both India and China are high positive correlated but this relationship exists slightly more in India in comparison of China. Moreover, r^2 indicates that 89.83% variation in total investment is explained by gross domestic savings and rest of the variation i.e., (100-89.83)10.17% is by other unexplained variables. On another side, 70.87% change in total investment is due to gross domestic savings and 29.13 % variation by other unexplained variables. It wraps up that investment's behaviour of China is less responsive towards gross domestic savings in comparison of India.

CONCLUSION

There is highly positive correlation between total investment and gross domestic savings in both India and china but it is slightly more i.e., 0.9478 in India in comparison of China i.e., 0.84185. But total investment has been more than gross national savings in India whereas situation is reverse in china. This indicates that

India's investment is the outcome of both gross domestic savings and net foreign source where China is a country having huge amount of saving specially from corporate sector and government sector which is more than sufficient to finance its investment. Moreover, total investment and gross domestic savings of china have always been much superior than of India but the rate of increase in investment in India is greater than in china whereas saving rate is higher in china than in India. That is why china is the exporter of its saving outside the country. This study also wraps up that investment's behaviour of China is less responsive towards gross domestic savings in comparison of India.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail **infoijrcm@gmail.com** for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
