SURENDER KUMAR POONIA

CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography: Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in <u>M.S. Word format</u> after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. <u>infoijrcm@gmail.com</u> or online by clicking the link **online submission** as given on our website (<u>FOR ONLINE SUBMISSION, CLICK HERE</u>).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. COVERING LETTER FOR SUBMISSION:

DATED: _____

THE EDITOR

IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript titled '_____' for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

NAME OF CORRESPONDING AUTHOR	:
Designation/Post*	:
Institution/College/University with full address & Pin Code	:
Residential address with Pin Code	:
Mobile Number (s) with country ISD code	:
Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No)	:
Landline Number (s) with country ISD code	:
E-mail Address	:
Alternate E-mail Address	:
Nationality	:

* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation etc. <u>The qualification of</u> <u>author is not acceptable for the purpose</u>.

NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. <u>**pdf.**</u> <u>**version**</u> is liable to be rejected without any consideration.
- b) The sender is required to mention the following in the SUBJECT COLUMN of the mail:

New Manuscript for Review in the area of (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)

- c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is expected to be below 1000 KB.
- e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
- g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
- 2. **MANUSCRIPT TITLE**: The title of the paper should be typed in **bold letters**, **centered** and **fully capitalised**.
- 3. **AUTHOR NAME (S) & AFFILIATIONS**: Author (s) **name**, **designation**, **affiliation** (s), **address**, **mobile/landline number** (s), and **email/alternate email address** should be given underneath the title.
- 4. **ACKNOWLEDGMENTS**: Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
- 5. **ABSTRACT**: Abstract should be in **fully Italic printing**, ranging between **150** to **300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA**. *Abbreviations must be mentioned in full*.
- 6. **KEYWORDS**: Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
- 7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aeaweb.org/econlit/jelCodes.php. However, mentioning of JEL Code is not mandatory.
- 8. **MANUSCRIPT**: Manuscript must be in <u>BRITISH ENGLISH</u> prepared on a standard A4 size <u>PORTRAIT SETTING PAPER</u>. It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.
- 9. HEADINGS: All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
- 10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
- 11. MAIN TEXT:

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:

INTRODUCTION REVIEW OF LITERATURE NEED/IMPORTANCE OF THE STUDY STATEMENT OF THE PROBLEM OBJECTIVES HYPOTHESIS (ES) RESEARCH METHODOLOGY RESULTS & DISCUSSION FINDINGS RECOMMENDATIONS/SUGGESTIONS CONCLUSIONS LIMITATIONS SCOPE FOR FURTHER RESEARCH REFERENCES APPENDIX/ANNEXURE

The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.

A Monthly Double-Blind Peer Reviewed (Refereed/Juried) Open Access International e-Journal - Included in the International Serial Directories

- 12. **FIGURES & TABLES**: These should be simple, crystal **CLEAR**, **centered**, **separately numbered** & self-explained, and the **titles must be above the table/figure**. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.
- 13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
- 14. **ACRONYMS**: These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
- 15. **REFERENCES**: The list of all references should be alphabetically arranged. *The author (s) should mention only the actually utilised references in the preparation of manuscript* and they may follow Harvard Style of Referencing. Also check to ensure that everything that you are including in the reference section is duly cited in the paper. The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
- Use (ed.) for one editor, and (ed.s) for multiple editors.
- When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
- Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
- The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
- For titles in a language other than English, provide an English translation in parenthesis.
- *Headers, footers, endnotes and footnotes should not be used in the document.* However, you can mention short notes to elucidate some specific point, which may be placed in number orders before the references.

ORGANISATIONAL CONFLICT AND MOST PREFERRED CONFLICT MANAGEMENT STYLES (A RESEARCH STUDY CONDUCTED AT NTPC, PATNA)

KIRTI

JUNIOR RESEARCH FELLOW DEPARTMENT OF APPLIED ECONOMICS & COMMERCE PATNA UNIVERSITY

ABSTRACT

Conflicts are inevitable; indeed they are everyday phenomenon not only in each organisation but in every individual's work life. In this era of 'Emotional Intelligence' understanding the existence and importance of conflict is vital. The management of organisational conflict involves the diagnosis of the styles (strategies) used to handle conflict arising at workplace. The aim of this study was to find out the most preferred Conflict Management Styles to effectively manage conflict and deal with conflict situations efficiently. This research contributes to the body of existing literature; specifically, it will inspire the managers to manage conflict in the organisations. A survey of 104 managers of NTPC, Patna (ER-HQ1) a Public Sector Company shows that which out of Five different 'Conflict Management Styles' are most preferred. Bar graphs and pie-charts have been used to represent the results of a 5 Point – Likert Scale based Questionnaire. Albeit, (however/even though) most out of five Conflict Management Styles. Three Styles come out to be most adopted ones by the managers and other employee; these include: integrating, dominating and compromising.

KEYWORDS

conflict, conflict management, substantive/functional conflict, affective/dysfunctional conflict, conflict management style.

1. INTRODUCTION

onflict means different things to different people, for some it's meant war, fight, or may be trade embargos (an official ban on trade or other commercial activity) where as for some concept of conflict may be difference of opinion, perspective or personality and it might be possible that one party may feel that they are in a conflict situation, when the other party feels that they are just discussing opposing view so when discussing about conflict a lot depends upon a person's 'take' on the existing situation. Conflict in organisation is considered healthy if there is diametrically opposed of ideas pertaining to the nature of the business and the advantage is for the improvement, but when it comes to the context of personal conflicts the organisation is faced with great predicament that requires to be managed. This research study comprises of the determination of those conflicting management styles that are mostly adopted by the employees and managers that describes the techniques of decision making styles to combat and resolve the critical situation of conflict and so to ensure the optimal level of work productivity and work performance in the organization.

2. RESEARCH PROBLEM STATEMENT

Conflicts may arise from the contradictory goals and interests and the results may deteriorate the organization. The need for the relevant conflict management techniques must be projected whenever there is a hint of conflict present in the workplace. In order to analyse the behaviour of employees at the Managerial level in various conflict scenarios and to seek out the most prominent behavioural outcome in the pursuit of Conflict Management; following research questions tends to seek an in depth knowledge about the research topic. Thus, the Research Problem Statement is:

- 1. 'What are the most preferred Conflict Management Style by the Managerial Personnel at National Thermal Power Corporation, Patna (Eastern-Region HQ1)?'
- 2. Is there any relationship between Gender and Conflict Management Style?
- 3. Is there any relationship between Managerial Level and selection of Conflict Management Style?

3. RESEARCH OBJECTIVES

Since, growing competency due to globalization needs continuous organizational development, and it will be sheer wastage of valued resource in terms of time spend on useless unmanaged conflict and doing so will not only lead to losing employees moral but also bring demise of the organisation. To be more precise it is important that the organization values different relationships of its people. Hence, the 'Objective' of the study is:

- To contribute to the existing literature of Conflict and Conflict Management Styles and to assess the behaviour of managers in conflict situations and help them understand various strategies to handle conflict better way.
- To find out the most significant Conflict Management Style at Managerial Level and to establish a relationship between gender, management level to that of the selection of Conflict Management Style.

4. RESEARCH HYPOTHESIS

a)	Part I					
\triangleright	H0:	There is no existence of common dominant conflict management style out of 'Five types of Conflict Management Styles' that is being preferred				
		by the managers at NTPC Ltd., Patna (ER-HQ1).				
\triangleright	H1:	There is an existence of common dominant conflict management style out of 'Five types of Conflict Management Style' that is being preferred by				
		the managers at NTPC Ltd., Patna (ER-HQ1).				
b)	Part II	1				
	> H0: There is no significant relationship between gender and the preferred Conflict Management Style.					
		> H1: There is a significant relationship between gender and the preferred Conflict Management Style.				
c)	Dort III					

c) Part III

≻	H0:	There is no significant relationship between management level of the employee and preferred conflict management style.
≻	H1:	There is no significant relationship between management level of the employee and preferred conflict management style.

5. LITERATURE REVIEW

- 1) Conflict
- a) Concept

"People tend to be very effective at managing relationships when they can understand their own emotions and can empathize with the feeling of others" (Golman, 1998)¹ so the need arises to understand not only ones own behaviour but also of others it is then only possible that theses rising conflicts could be dealt and managed effectively for the reason that if unhealthy conflict is allowed to creep and develop, the spin off effects can result in lasting damage to relationships as well as the organisational performance. Well managed conflict can bring enormous benefits to people and companies; in fact conflict management is one of the

biggest drivers of change. Properly managed conflict with application of the most effective conflict management styles can not only help people to be more innovative but also creates stronger bonds and effective team cohesion.

Marry Parker Follett once said "I should like to ask you to agree for the moment to think of conflict as neither good nor bad; to consider it without ethical prejudgment; to think of it not as warfare, but as the appearance of difference, difference of opinions, of interests. For that is what conflict means—difference. ... As conflict is here in the world, as we cannot avoid it, we should, I think, use it. Instead of condemning it, we should set it to work for us."²

"Conflicts are inevitable part of organisational life since the goals of different stakeholders such as managers and staffs are often incompatible."³ So differences are bound to arise and leading to disagreement on various issues. Adding to these views of Jones GR, George JM (2000), Henry O (2009) suggests that "Conflict is an unpleasant fact in any organisation as longer as people compete for jobs, resources, power, recognition and security. Organisational Conflict can be regarded as a dispute that occurs when interest, goals or values of different individuals or group are incompatible with each other."⁴ Moreover, Weilrich (1992) opines that "Conflict is a part of organisational life and may occur between individuals and the group, and between groups."⁵

But unfortunately, the term 'conflict' has only the connotation of 'bad' for many people; so much that they think principally in terms of suppression, giving little or no attention to its more positive side. Rico (1964) emphasizes this by stating that "it seems entirely likely that many, if not most, organizations need more conflict, not less."⁶ Pondy (1992) also stated that the "absence of conflict may indicate autocracy, uniformity, stagnation, and mental fixity; the presence of conflict may be indicative of democracy, diversity, growth, and self-actualization."⁷ And Tjosvold complements this statement by arguing that "conflict is not the opposite of cooperation but a mechanism that allows to perceive benefits of cooperative work.

Furthermore, conflict is considered psychologically and socially healthy. It is psychologically healthy because it provides a breather for frustrations and enables a feeling of participation and even of joy. And it is sociable healthy because it encourages opposition to the status quo and provides conditions for social chances and democracy stemming from pluralism and respect to diversity."⁸ Therefore, according to Butler AF (1973), "conflict is ubiquitous, not necessarily dysfunctional and can be required to defy people to perform and stimulate progress."⁹

b) Definition

According to Roloff (1987), "Organisational conflict occurs when members engage in activities that are incompatible with those of colleagues within their network, members of other collectivities, or unaffiliated individuals who utilize the services or products of organisation"¹⁰

Rahim, Broadens this definition by saying that "conceptualizing conflict as an interactive process manifested in incompatibility, disagreement, or dissonance within or between social entities (i.e. individual, group, organisation, etc.). Calling conflict an interactive process does not preclude the possibilities of intra-individual conflict, for it is known that a person often interacts with self. Obliviously, one also interacts with others."¹¹

2) Conflict Management

Conflicts are part of human consciousness it exists in all aspects of life knowingly or unknowingly. We cannot avoid conflict, whether we are at home, or at work, and not to forget that even if we are alone we it might happen that we find conflict arising within ourselves over different matters of life. The consequences of organizational conflict reach further today than ever before as the interface between work and home blurs and organizations experiment with flatter and more decentralized structures. In addition, the complexity of conflict increases as organizations become more open and diverse. Conflict is inevitable and even desirable. Parker (1974) argued that "if conflicts arise and are not managed properly, it will lead to delays of work, disinterest and lack of action and in extreme cases it might lead to complete breakdown of the group. Unmanaged conflict may result in withdrawal of individuals and unwillingness on their part to participate in other groups or assist with various group action programs in the organization."¹²

Conflict can be managed in different ways, some focusing on interpersonal relationships and others on structural changes. Robinson (1974) *et al* advocates that "managing conflict toward constructive action is the best approach in resolving conflict in organization. When conflict arises, we need to be able to manage them properly, so that it becomes a positive force, rather than a negative force, which would threaten the individual or group."¹³

"To work in an organization is to be in conflict. To take advantage of joint work requires conflict management."¹⁴ Tjosvold(2008). It is no wonder that conflict management is receiving increasing attention from top managers and policymakers across major corporations and non-profit organizations.

Lipsky and Seeber (2006), note that "during the past 25 years, organizations have changed their orientation towards conflict management. In particular, organizations are more inclined to adopt —a proactive, strategic approach to managing organizational conflicts". The prevalence of conflict has various implications for organizations. It has been noted that managers may spend up to 42 percent of their time dealing with conflict-related issues.

3) Conflict resolution and conflict management

Conflict resolution involves the reduction, elimination, or termination of all forms and types of conflict. When people talk about conflict resolution they tend to use terms like negotiation, bargaining, mediation, or arbitration.

Businesses can benefit from appropriate types and levels of conflict. That is the aim of conflict management, and not the aim of conflict resolution. "Conflict management does not imply conflict resolution. Conflict management minimizes the negative outcomes of conflict and promotes the positive outcomes of conflict with the goal of improving learning in an organization"¹⁵ (Rahim, 2002, p. 208).

"Organizational learning is important. Properly managed conflict increases learning by increasing the amount of questions asked and encourages people to challenge the status quo"¹⁶(Luthans, Rubach, & Marsnik, 1995).

4) Conflict Management Styles

Models of Conflict Management

There have been many styles of conflict management behavior that have been researched in the past century. One of the earliest, Mary Parker Follett (1926/1940)¹⁷ found that conflict was managed by individuals in three main ways: domination, compromise, and integration. She also found other ways of handling conflict that were employed by organizations, such as avoidance and suppression.

Blake and Mouton (1964)¹⁸: were among the first to present a conceptual scheme for classifyingthe modes (styles) for handling interpersonal conflicts into five types: forcing, withdrawing, smoothing, compromising, and problem solving.

According to Robert, and James (1969) "Avoidance of the situation that causes the conflict is an example of an interpersonal approach. Another way of coping with conflict is through *smoothing*, emphasizing the areas of agreement and common goals and de-emphasizing disagreements. A third way according to him is *forcing*, pushing one's own view on others; this, of course, will cause overt or covert resistance."¹⁹

In the 1970s and 1980s, researchers began using the intentions of the parties involved to classify the styles of conflict management that they would include in their models. Both Thomas (1976)²⁰ and Pruitt (1983)²¹ put forth a model based on the concerns of the parties involved in the conflict. The combination of the parties concerns for their own interests (i.e. assertiveness) and their concern for the interests of those across the table (i.e. cooperativeness) would yield a particular conflict management style. Pruitt called these styles yielding (low assertiveness/high cooperativeness), problem solving (high assertiveness/high cooperativeness). Pruitt argues that problem-solving is the preferred method when seeking mutually beneficial options.

Khun and Poole's Model: Khun and Poole (2000)²² established a similar system of group conflict management. In their system, they split Kozan's confrontational model into two sub models: distributive and integrative.

- Distributive Here conflict is approached as a distribution of a fixed amount of positive outcomes or resources, where one side will end up winning and the other losing, even if they do win some concessions.
- Integrative Groups utilizing the integrative model see conflict as a chance to integrate the needs and concerns of both groups and make the best outcome possible. This model has a heavier emphasis on compromise than the distributive model. Khun and Poole found that the integrative model resulted in consistently better task related outcomes than those using the distributive model.

DeChurch and Marks's Meta-Taxonomy: DeChurch and Marks (2001) ²³examined the literature available on conflict management at the time and established what they claimed was a "meta-taxonomy" that encompasses all other models. They argued that all other styles have inherent in them into two dimensions - activeness ("the extent to which conflict behaviors make a responsive and direct rather than inert and indirect impression") and agreeableness ("the extent to which conflict

behaviors make a pleasant and relaxed rather than unpleasant and strainful impression"). High activeness is characterized by openly discussing differences of opinion while fully going after their own interest. High agreeableness is characterized by attempting to satisfy all parties involved

In the study they conducted to validate this division, activeness did not have a significant effect on the effectiveness of conflict resolution, but the agreeableness of the conflict management style, whatever it was, did in fact have a positive impact on how groups felt about the way the conflict was managed, regardless of the outcome. Conflict management 4

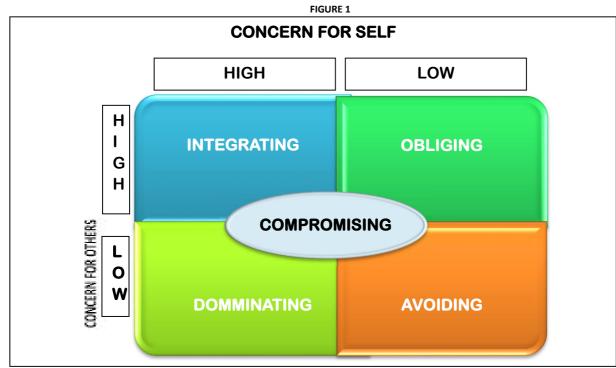

Rahim's meta model: Rahim (2002)²⁴ noted that there is agreement among management scholars that there is no one best approach to how to make decisions, lead or manage conflict. In a similar vein, rather than creating a very specific model of conflict management, Rahim created a meta-model (in much the same way that DeChurch and Marks, 2001, created a meta-taxonomy) for conflict styles based on two dimensions, concern for self and concern for others. Within this framework are five management approaches: integrating, obliging, dominating, avoiding, and compromising. Integration involves openness, exchanging information, looking for alternatives, and examining differences so solve the problem in a manner that is acceptable to both parties. Obliging is associated with attempting to minimize the differences and highlight the commonalities to satisfy the concern of the other party. When using the dominating style one party goes all out to win his or her objective and, as a result, often ignores the needs and expectations of the other party. When avoiding a party fails to satisfy his or her own concern as well as the concern of the other party. Lastly, compromising involves give-and-take whereby both parties give up something to make a mutually acceptable decision. (Rahim, 2002).

6. RESEARCH DESIGN/ MODEL

This research paper is based on the 'Five Styles of Handling Interpersonal Conflict' model being developed by Rahim and Bonoma (1979, this model differentiated the styles of handling conflict on two basic dimensions:

b) Concern for others: the degree explains the degree (high or low0 to which a person attempts to satisfy the concern for others.

The motivational orientation of a given individual during conflict has been portrayed by theses two dimensions, which is not only been accepted but also supported by the studies conducted by Ruble and Thomas (1976) along with Van de Vliert and Kabanoff (1990). Results of the combination of these two dimensions come out in specific 'Five Styles of Handling Interpersonal Conflict'. As shown in figure (1), being taken from Rahim and Bonoma, (1979, p. 1327)²⁵

- Dominance it occurs when the cooperation is extremely low, and the persistence in satisfying of personal interests high. By this strategy conflict is resolved in a way to satisfy the needs of one party damaging the other party involved in the conflict.
- Integration cooperation is high, as well as the persistence in satisfying of one's own needs, so there is to be sought for the appropriate solution for all parties involved in the conflict.
- Compromise there is an equal wish for medium level of cooperation and persistence in satisfying of one's personal needs, so the conflict is resolved so that each party involved in conflict gives up the part of the value.
- Avoiding when the cooperation as well as persistence in satisfying of one's personal needs is very low. In that case the conflict resolution will be solved by withdrawal or repression of conflict.
- > Cooperativeness/ obliging- the readiness for cooperation is extremely high, and the conflict is resolved by putting the other party's interests before its own.
- It is stated that different people employ distinct strategies for managing conflicts. Such strategies are learned, usually in childhood, and seem to function automatically. Sometimes individuals are not aware at the time of how they must act in conflict situations. They usually do whatever seems to come naturally.

Individuals do have a personal strategy; and because it was learned, they can always change it by learning new and more effective ways of managing conflicts. Whenever one becomes engaged in a conflict, there are two major concerns one has to take into consideration:

- Concern for Self/Achieving the personal goals one is involved in a conflict because he/she has a goal that conflicts with another person's goal. His/her goal
 may be highly important to him/her, or it may be of little importance.
- Concern for others/ maintaining good relationship with the other person one may require to be able to interact effectively with the other person in the
 future. The relationship may be very important to the individual, or it may be of little importance. The importance of these two areas will influence the ways
 in which one act in any given conflict.

7. DATA ANALYSIS, HYPOTHESIS TESTING, RESULTS, AND DISCUSSION

Hypothesis Testing: Modified hypothesis to get the better results Part-I

The basic research was aimed at finding if there is a dominant strategy followed by employees of NTPC Ltd. Patna (ER-HQ-1) to tackle conflict situation. To test this we had formulated the following hypothesis:

a) Concern for self: the degree (high or low) to which a person attempts to satisfy his or her own concern

On finding the frequency distribution we got the following pie chart:

This chart indicates that Compromising is the most preferred approach amongst the respondents whereas Accommodating is the least. But we cannot conclude statistically on the frequency distribution. To conclude statistically we will need to carry out hypothesis testing. When we started hypothesis testing we modified the Null and Alternate hypothesis to suit the data at hand. The modified hypothesis became:

\triangleright	H₀:	The proportion of Collaborating, Accommodating, Competing, Avoiding and Compromising is 20% each.	
\checkmark	Ha:	At least one of the proportions in the null hypothesis is false.	

We used Chi-Square goodness of fit because the following conditions are being met:

• The variable under study is categorical.

• The expected value of the number of sample observations in each level of the variable is at least 5.

Using sample data, we conducted a Chi-Square goodness of fit test of the null hypothesis using SPSS. The output of SPSS is pasted below:

TABLE 1: SPSS OUTPUT OF THE HYPOTHESIS TESTING-OVERALL

	Observed		
Management Style	N	Expected N	Residual
Accommodating	16	20.6	-4.6
Competing	Plot Area 4	20.6	3.4
Avoiding	6	20.6	-14.6
Collaborating	39	20.6	18.4
Compromising	18	20.6	-2.6
Total	103		

	Mgmt Style
Chi-Square(a)	28.699
df	4
Asymp. Sig.	.000

Test Statistics

a 0 cells (.0%) have expected frequencies less than 5. The minimum expected cell frequency is 20.6.

We can see that X^2 is coming out to be 28.699. Since there are 5 levels in the variable, the degree of freedom is 4 (5-1). Hence when we look at critical value of Chi-Square at 95% Confidence Level and degree of freedom = 4, we get $X_{critical}$ =9.488¹. Therefore, we have $X^2 > X_{critical}$

Hence, from the above result we come to the following conclusion:

"There are enough evidences to reject the Null hypothesis, hence we conclude that there is a dominant conflict management style at NTPC, Ltd. Patna (HQ-ER-1). The dominant style is collaborating followed by competing"

Part-II

The basic research was aimed at finding if there is a dominant strategy followed based on gender of employees of NTPC Ltd. Patna (ER-HQ-1) to tackle conflict situation.

To test this we had formulated the following hypothesis:

H₀: There is no significant relationship between gender and the preferred Conflict Management Style.
 H_a: There is a significant relationship between gender and the preferred Conflict Management Style.

On finding the frequency distribution we got the following pie charts:

¹ Refer the Appendix for the Chi-Square Test Critical Values.

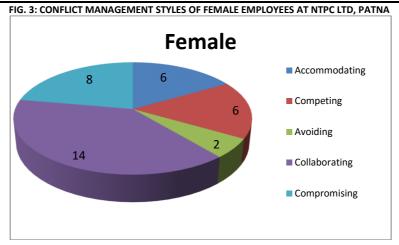

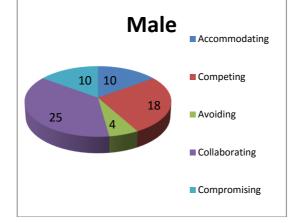

FIG. 4: CONFLICT MANAGEMENT STYLES OF MALE EMPLOYEES AT NTPC LTD, PATNA

When we started hypothesis testing we modified the Null and Alternate hypothesis to suit the data at hand. The modified hypothesis became:

Ho: For Female Employees the proportion of Collaborating, Accommodating, Competing, Avoiding and Compromising is 20% each.
 Ha: For Female Employees at least one of the proportions in the null hypothesis is false.

Similar hypothesis was formulated for the Male Employees as well.

We conducted a Chi-Square goodness of fit test of the null hypothesis using SPSS. The The output of SPSS is pasted below: output of SPSS is pasted below:

FEMALES

Management Style	Observed N	Expected N	Residual
Accommodating	6	7.2	-1.2
Competing	6	7.2	-1.2
Avoiding	2	7.2	-5.2

MALES

Management Style	Observed N	Expected N	Residual
Accommodating	10	13.4	-3.4
Competing	18	13.4	4.6
Avoiding	4	13.4	-9.4
Collaborating	25	13.4	11.6
Compromising	10	13.4	-3.4
Total	67		

Test Statistics(b)

	Coded Mgmt S tyle
Chi- Square(a)	10.667
df	4
<u>Asymp</u> . Sig.	.031

a 0 cells (.0%) have expected frequencies less than 5. The minimum expected cell frequency is 7.2.

Test Statistics(b)

	Coded Mgmt Sty le
Chi- Square(a)	19.940
df	4
<u>Asymp</u> . Sig.	.001

a 0 cells (.0%) have expected frequencies less than 5. The minimum expected cell frequency is 13.4.

We can see that X^2 is coming out to be 10.667 for females and 19.940 for males. Since there are 5 levels in the variable, the degree of freedom is 4 (5-1). Hence when we look at critical value of Chi-Square at 95% Confidence Level and degree of freedom = 4, we get $X_{critical}$ =9.488². Therefore we have $X^2_{female} > X_{critical}$ and $X^2_{Male} > X_{critical}$.

Hence, from the above result we come to the following conclusion:

"There are enough evidences to reject the Null hypothesis; hence we conclude that there is significant relationship between gender and the preferred Conflict Management Style at NTPC, Ltd. Patna (HQ-ER-1). While collaborating is preferred the most by both categories, competing is more preferred amongst males where as compromising amongst females"

Part-III

The basic research was aimed at finding if there is a dominant strategy followed based on level of designation of employees of NTPC Ltd. Patna (ER-HQ-1) to tackle conflict situation.

To test this we had formulated the following hypothesis:

On finding the frequency distribution we got the following bar charts:

FIG. 5: CONFLICT MANAGEMENT STYLES OF TOP LEVEL EMPLOYEES AT NTPC LTD, PATNA

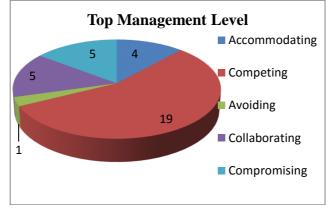

FIG. 6: CONFLICT MANAGEMENT STYLES OF MIDDLE LEVEL EMPLOYEES AT NTPC LTD, PATNA

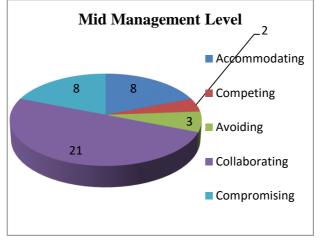

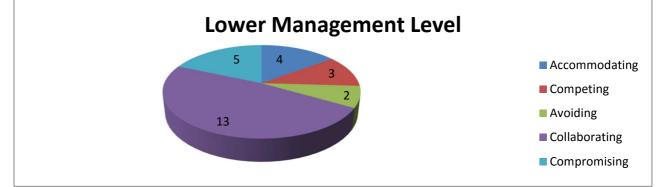

FIG. 7: CONFLICT MANAGEMENT STYLES OF LOWER LEVEL EMPLOYEES AT NTPC LTD, PATNA

When we started hypothesis testing we modified the Null and Alternate hypothesis to suit the data at hand. The modified hypothesis became:

Ho: For Top Level Employees the proportion of Collaborating, Accommodating, Competing, Avoiding and Compromising is 20% each.
 H1: For Top Level Employees at least one of the proportions in the null hypothesis is false.

² Refer the Appendix for the Chi-Square Test Critical Values.

Similar hypothesis was formulated for the Mid Level and Lower Level Employees as well. We conducted a Chi-Square goodness of fit test of the null hypothesis using SPSS. The output of SPSS is given below:

Top Management Level

Mid Management Level

Management

Competing

Collaborating

Compromising

a 0 cells (.0%) have expected frequencies less than 5. The minimum expected cell frequency is 5.4.

b LEVEL = Low

Since there are 5 levels in the variable, the degree of freedom is 4 (5-1). Hence when we look at critical value of Chi-Square at 95% Confidence Level and degree of freedom = 4, we get $X_{critical}$ =9.488³. Therefore we have $X^2 > X_{critical}$ for all the designation of employees. Hence, from the above result we come to the following conclusion:

"There are enough evidences to reject the Null hypothesis, hence we conclude that there is relationship between designation and conflict management style at NTPC, Ltd. Patna (HQ-ER-1). While collaborating is preferred by the Middle and Lower Level employees, competing is the most preferred method across top management".

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue, as well as on the journal as a whole, on our e-mail **infoijrcm@gmail.com** for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our e-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward to an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active cooperation of like-minded scholars, we shall be able to serve the society with our humble efforts.
