CONTENTS

Sr. No.	TITLE & NAME OF THE AUTHOR (S)	Page No.
1.	ANTECEDENTS OF NON-GOVERNMENTAL ORGANIZATIONS' EFFECTIVENESS <i>DR. M.S.A. MAHALINGA SHIVA, DR. DAMODAR SUAR & DR. SANTANU ROY</i>	1
2.	CRITICISING THE IMPLEMENTATION OF THE SERVQUAL MODEL IN GENERIC INDUSTRIES <i>TAMEEM AL BASSAM & SARMA AL SHAWI</i>	9
3.	TOWARDS A MODEL FOR ENHANCING CONSUMER TRUST IN AN ONLINE ENVIRONMENT <i>PRIYANKA MEHARIA, BISWAJIT PANJA & JUAN HU</i>	14
4.	A RESEARCH STUDY ON ORGANIZATIONAL CULTURE IN COMMERCIAL BANKS (A CASE OF SELECTED BANKS IN HAWASSA CITY OF ETHIOPIA) <i>DR. BREHANU BORJI & DR. ARAVIND SOUDIKAR</i>	19
5.	THE IMPACT OF MICRO FACTOR OPPORTUNITY ON ENTREPRENEURIAL SUCCESS OF SMES – A CASE STUDY ON COMMERCIAL FAST FOOD SMES <i>DR. ANSIR A. RAJPUT, WASEEM AHMED, SYED JEHANZEB JAVED & SEHRISH JEHANGIR</i>	25
6.	ANALYSIS OF INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) ADOPTION/USE FACTORS AMONG RWANDAN COMMERCIAL BANKS <i>MACHOGU, M. ABIUD & DR. EGWAKHE, A. JOHNSON</i>	30
7.	A STUDY ON IDENTIFICATION OF CONTEXTUAL KEY FACTORS IN PERFORMANCE APPRAISAL IN PUBLIC SECTOR ENTERPRISES IN INDIA <i>DR. KAIPA RAGHURAM SHASTHRY & DR. VIMALA SANJEEVKUMAR</i>	35
8.	GROWTH AND PERFORMANCE OF HOUSING FINANCE COMPANIES IN INDIA: A CASE STUDY WITH REFERENCE TO HOUSING DEVELOPMENT FINANCE CORPORATION <i>DR. D. GURUSWAMY</i>	40
9.	TRAVEL MOTIVATIONS AND DESTINATION SELECTION: A CRITIQUE <i>W.K. ATHULA GNANAPALA</i>	49
10.	ROLE OF INFORMATION TECHNOLOGY IN BUSINESS <i>DR. R. KARUPPASAMY & C. ARUL VENKADESH</i>	54
11.	ASSESSMENT OF SERVICES OF TEACHING HOSPITALS IN THE CHANGING GLOBAL SCENARIO <i>ARCHANA MISHRA & DR. RITU BHATTACHARYYA</i>	58
12.	PROVOCATIVE SELLING TECHNIQUE AT THE BOTTOM OF THE PYRAMID IN A RECESSIONARY SITUATION: STUDY ON UNIFORM MANUFACTURING INDUSTRY - IN AND AROUND KOLKATA <i>BHUDHAR RANJAN CHATTERJEE & SUKANYA CHATTERJEE</i>	63
13.	CONSUMER BEHAVIOUR TOWARDS SMALL CARS - A CASE STUDY OF NALGONDA DISTRICT IN A. P. <i>DR. G. RAMA KRISHNA, D.K. PRATHIBHA, S. DESE NAIK & A. RAMA CHANDRAIAH</i>	67
14.	A STUDY ON THE BARRIERS AFFECTING THE GROWTH OF SMALL AND MEDIUM ENTERPRISES IN INDIA <i>DR. KRISHNAVENI MUTHIAH & SUDHA VENKATESH</i>	77
15.	A MEDICAL IMAGE COMPRESSION TECHNIQUE <i>K. S. SELVANAYAKI & DR. RM. SOMASUNDARAM</i>	82
16.	HIGH ENGAGEMENT & LOW ATTRITION – A STUDY OF THE TELECOM INDUSTRY IN INDIA <i>LRK KRISHNAN & DR. A SETHURAMASUBBIAH</i>	85
17.	ANALYTICAL STUDY ON EMPLOYEE SATISFACTION [CASE STUDY OF GAMMON INDIA LTD. (T & D BUSINESS), MIDC, BUTIBORI, NAGPUR] <i>DR. SHINEY CHIB</i>	96
18.	INNOVATION IN HIGHER EDUCATION ADMINISTRATION THROUGH ICT <i>J. MEENAKUMARI</i>	104
19.	THE IMPACT OF WORKING CAPITAL MANAGEMENT ON PROFITABILITY: EVIDENCE FROM SUGAR INDUSTRY IN INDIA <i>GOPINATHAN RADHIKA & DR. RAMACHANDRAN AZHAGAIAH</i>	107
20.	A STUDY ON MOBILE PAYMENT SYSTEMS AND SERVICES <i>CHANDRAKANT D. PATEL</i>	113
21.	SERVICE QUALITY IN HIGHER EDUCATION <i>DR. NARINDER TANWAR</i>	118
22.	CONSUMER BUYING BEHAVIOUR ON MOBILE PHONE: A COMPARATIVE STUDY <i>ANIL KUMAR</i>	122
23.	EVALUATING FINANCIAL HEALTH OF DR. REDDY'S LABORATORIES THROUGH 'Z' SCORE THEORY- A CASE STUDY <i>DR. SHITAL P. VEKARIYA</i>	128
24.	EFFECT OF BARRIERS IN CREATION OF KNOWLEDGE <i>VIDYA L.HULKUND</i>	131
25.	THE ELECTRONIC-NOSE TECHNOLOGIES IN HEALTHCARE AND BIOMEDICINE: A CASE STUDY <i>M.NAVEEN KUMAR</i>	134
	REQUEST FOR FEEDBACK	138

CHIEF PATRON

CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the area of Computer, Business, Finance, Marketing, Human Resource Management, General Management, Banking, Insurance, Corporate Governance and emerging paradigms in allied subjects like Accounting Education; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Monetary Policy; Portfolio & Security Analysis; Public Policy Economics; Real Estate; Regional Economics; Tax Accounting; Advertising & Promotion Management; Business Education; Business Information Systems (MIS); Business Law, Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labor Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; Public Administration; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism, Hospitality & Leisure; Transportation/Physical Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Digital Logic; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Multimedia; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic and Web Design. The above mentioned tracks are only indicative, and not exhaustive.

Anybody can submit the soft copy of his/her manuscript **anytime** in M.S. Word format after preparing the same as per our submission guidelines duly available on our website under the heading guidelines for submission, at the email addresses: infoijrcm@gmail.com or info@ijrcm.org.in.

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF _____.

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, **please specify**)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:

Affiliation with full address, contact numbers & Pin Code:

Residential address with Pin Code:

Mobile Number (s):

Landline Number (s):

E-mail Address:

Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION**REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.

A STUDY ON MOBILE PAYMENT SYSTEMS AND SERVICES

CHANDRAKANT D. PATEL
ASST. PROFESSOR
AMPICS MCA DEPARTMENT
GANPAT UNIVERSITY
KHERVA

ABSTRACT

Payment System is the backbone of advanced monetary economy. It is also one of the key areas in which technology has been driving force for innovation. Generally Payment systems in India have had a chequered history and traditional systems have been in vogue for many centuries, well mingling with the more recent electronic products. The initiatives of the Reserve Bank- all through a consultative process - have always aimed at the establishment of an integrated system that would benefit all the sectors of the economy, and at the same time reduce the overall risk in the system. In this paper we will study about the next generation cash less payment method using cell and its basic fundamentals architecture and other entities which take a vital to complete a particular task.

KEYWORDS

M-Commerce, M-Payment, Architecture, Payment protocol.

MOBILE COMMERCE – BEYOND E-COMMERCE

Mobile phone is a convenient technology for large scale adoption among urban as well as rural people crossing the barriers of language and last mile connectivity. More than 5 billion people are expected to own mobile phones in the globe by 2011-12. There are currently 300 million mobile phones in India and 100 million are added every year. In a few years more than 500 million people are expected to have mobile phones in India^[1].

M-commerce is often defined as the buying and selling of goods and services using wireless handheld devices such as mobile telephones or personal data assistants (PDAs). In the last four years, growth in the number of mobile telephone users worldwide has exceeded fixed lines, expanding from 50 million to almost Three billion in 2009. This fast growth stems from the cost advantage of mobile infrastructure over fixed-line installation and from the fact that mobile network consumers can simply buy a handset. Mobile commerce is a natural successor to electronic commerce. Electronic commerce has been facilitated by automatic teller machines (ATMs) and shared banking networks, debit and credit card systems. Mobile payments are a natural evolution e-payment schemes that will facilitate mobile commerce. A mobile payment or m-payment may be defined, for our purposes, as any payment where a mobile device is used to initiate, authorize and confirm an exchange of financial value in return for goods and services.^[3] The main difference between successful implementations of mobile payment services in the Asia Pacific region and failure in Europe and North America is primarily attributed to the 'payment culture' of the consumers that are country-specific.

LITERATURE REVIEW

- "There is no denying that today the mobile is more accessible than portable water or education in many parts of the country. While this is also cause to lament how technology has taken precedence over other essentials in life, one company decided to use it to advantage. Foreseeing the future for mobile money, Bharti Telesoft came up with the concept of Mobiquity or the mobile money solution". - **Hindu Business Line, India**
- "A global association of mobile operators announced Monday the launch of a pilot program, in co-operation with MasterCard, to allow the world's 200 million migrant workers, many of whom do not have bank accounts, to send money to their dependents via mobile phones. The global money transfer pilot, who has the involvement of 19 mobile operators with networks in over 100 countries, representing over 600 million customers, was unveiled at 3GSM, an annual industry trade fair in Barcelona that is expected to attract some 60,000 visitors this year." - **Red Herring The Business Technology**
- "Mobile phones are becoming an increasingly popular way to make all sorts of payments. In America fans of the Atlanta Hawks have been testing specially adapted Nokia handsets linked to their Visa cards to enter their local stadium and to buy refreshments. Elsewhere schemes are more advanced." - **Economist.com**

NATURE OF SERVICES

The wide accessibility of the Internet makes any e-commerce service globally available. The Web enables search and delivery of rich information, and sophisticated electronic transaction processes can be integrated easily with backend enterprise information systems. In contrast, the delivery of m-commerce applications relies on private wireless communication carriers. These services are usually delivered to a specific region, and are rather simple, more personalized, location-specific and time-sensitive. Since a mobile device usually accompanies a person wherever he or she goes, mobile services can be delivered to a person anywhere and anytime rather than to a fixed office or home.

The major differences between m-commerce and e-commerce are summarized in **Table 1.1**

TABLE 1.1: E-COMMERCE Vs. M-COMMERCE

	E-COMMERCE	M-COMMERCE
ORIGIN		
Sponsorship	Government-sponsored Internet	Private mobile phone industry
Business entry cost	Low	High
Customer access cost	Free or low cost Internet access	High mobile service charge
Customer base	Highly educated computer users	Less educated cell phone customers
TECHNOLOGY		
Message transmission	Packet-switched data transmission	Circuit switched for streamlined voice communication
Protocol	TCP/IP, HTTPML	GSM, TDMA, CDMA, 3G
Standardization	Highly standardized	Multiple incompatible standards
Connectivity	Global	Mainly regional
Bandwidth	High	Low
Identity	URL with IP and domain name	Phone number
Application development	General computer applications	Device-specific applications
Interface device	Personal computers	Cell phones and PDAs
Mobility	Fixed location	Mobile
Display	Big screen	Small screen
Main input mode	Keyboard for full text input	Voice with small key pad
Main output mode	Text and graphics	Voice with small text display
Local processing power	Powerful CPU with large memory and disk space	Limited processing power with small memory chip
Software and Programming	Support a variety of programming languages	Java or specific script languages
Trend	Towards sophistication	Towards minimization
SERVICES		
Service range	Global	Regional
Delivery destination	PC in office connected to the Internet	Person accompanied by a mobile device
Transaction complexity	Complete and complex transactions	Simple transactions
Information provided	Rich information	Simple and short messages
Timing	Less time-critical	Time critical
Location-based service	No	Yes
Target mobility	Service to a fixed point	Service to a moving target
Backend business connection	Strong connection to backend business information systems	Weak connection to backend business information systems
Service classification	B2C (business to consumer) and B2B (business to business)	P2P (person to person) and P2S (person to system)

MOBILE PAYMENT CHARACTERISTICS

When you want to take services under such a Mobile Devices, following kinds of characteristic should be present in the system. ^[4]

A) SIMPLICITY AND USABILITY

The m-payment application must be user friendly with little or no learning curve to the customer. The customer must also be able to personalize the application to suit his or her convenience.

B) UNIVERSALITY

M-payments service must provide for transactions between one customer to another customer (C2C), or from a business to a customer (B2C) or between businesses (B2B). The coverage should include domestic, regional and global environments. Payments must be possible in terms of both low value micro-payments and high value macro-payments.

C) INTEROPERABILITY

Development should be based on standards and open technologies that allow one implemented system to interact with other systems.

D) SECURITY, PRIVACY AND TRUST

A customer must be able to trust a mobile payment application provider that his or her credit or debit card information may not be misused. Secondly, when these transactions become recorded customer privacy should not be lost in the sense that the credit histories and spending patterns of the customer should not be openly available for public scrutiny. Mobile payments have to be as anonymous as cash transactions. Third, the system should be foolproof, resistant to attacks from hackers and terrorists. This may be provided using public key infrastructure security, biometrics and passwords integrated into the mobile payment solution architectures.

D) COST

The m-payments should not be costlier than existing payment mechanisms to the extent possible. An m-payment solution should compete with other modes of payment in terms of cost and convenience.

E) SPEED

The speed at which m-payments are executed must be acceptable to customers and merchants.

F) CROSS BORDER PAYMENTS

To become widely accepted the m-payment application must be available globally, word-wide.

MOBILE PAYMENT SOLUTIONS

Mobile payment solutions may be classified according to the type of payment effected, and based on the technology adopted to implement the solution. There are a variety of combinations of these frameworks – technology adopted and mode of payment, a survey of which would constitute a study in itself. There are three different models available for m-payment solutions on the basis of payment ^[7]

- Bank account based
- Credit card based
- Telecommunication company billing based

BANK ACCOUNT BASED

Banks have several million customers and telecommunication operators also have several million customers. If they both collaborate to provide an m-payment solution it is a win-win situation for both industries. In this model, the bank account is linked to the mobile phone number of the customer. When the customer makes an m-payment transaction with a merchant, the bank account of the customer is debited and the value is credited to the merchant account.

CREDIT CARD BASED

In the credit card based m-payment model, the credit card number is linked to the mobile phone number of the customer. When the customer makes an m-payment transaction with a merchant, the credit card is charged and the value is credited to the merchant account. Credit card based solutions have the

limitation that it is heavily dependent on the level of penetration of credit cards in the country. In India, the number of credit card holders is 15 million. Only this small segment of the population will benefit in the credit card based model. Though limited in scope, there may be high demand within this segment for a payment solution with credit cards and also, may provide high volumes of transactions.

TELECOMMUNICATION COMPANY BILLING

Customers may make payment to merchants using his or her mobile phone and this may be charged to the mobile phone bills of the customer. The customer then settles the bill with the telecommunication company^[11]. This may be further classified into pre-paid (debit) and post-paid (credit).

TECHNOLOGIES FOR MOBILE PAYMENTS

The mobile technology landscape provides various possibilities for implementing m-payments. Essentially, a GSM mobile phone may send or receive information (mobile data service) through three possible channels^[1] – SMS, USSD or WAP/GPRS. The choice of the channel influences the way m-payment schemes are implemented. Secondly, the m-payment client application may reside on the phone or else it may reside in the subscriber identity module (SIM). We briefly describe NFC technology as another possibility.

SHORT MESSAGE SERVICE (SMS)

This is a text message service that enables short messages (140-160 characters) that can be transmitted from a mobile phone. Short messages are stored and forwarded by SMS centers. SMS messages have a channel of access to phone different from the voice channel.^[10] SMS can be used to provide information about the status of one's account with the bank (informational) or can be used to transmit payment instructions from the phone (transactional).

UNSTRUCTURED SUPPLEMENTARY SERVICES DELIVERY (USSD)

Unstructured Supplementary Service Data (USSD) is a technology unique to GSM. It is a capability built into the GSM standard for support of transmitting information over the signaling channels of the GSM network. USSD provides session-based communication, enabling a variety of applications. USSD is session oriented transaction-oriented technology while SMS is a store-and-forward technology. Turnaround response times for interactive applications are shorter for USSD than SMS.

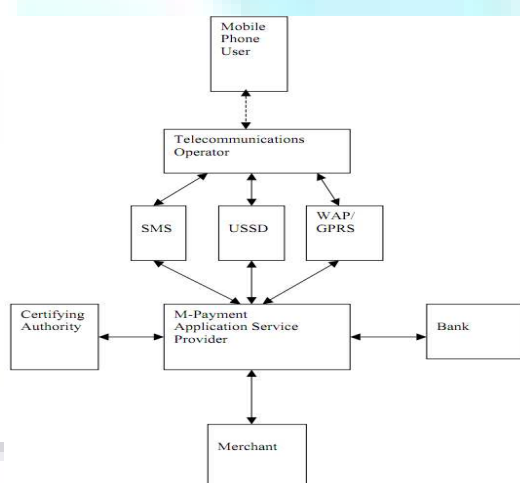

WAP/GPRS

General Packet Radio Service (GPRS) is a mobile data service available to GSM users. GPRS provides packet-switched data for GSM networks. GPRS enables services such as Wireless Application Protocol (WAP) access, Multimedia Messaging Service (MMS), and for Internet communication services such as email and World Wide Web access in mobile phones.

A GENERIC ARCHITECTURE FOR M-PAYMENTS

This is a simple, illustrative conceptual model that describes the relationship between the major participants in an m-payment scenario (Fig. 1.0). There is the customer and the merchant who would like to use an m-payment service. The M-Payment Application Service Provider (MASP) provides the necessary technical infrastructure (hardware and software) to facilitate m-payments and acts as an intermediary between the financial institutions and mobile network operators. The MASP registers users who would like to avail of the m-payment service. The users (customers and merchants) have to be registered with the MASP prior to using the service. At the time of registration the MASP collects the bank account details (or credit card details) of the customer and merchant as well as their valid digital certificates. The mobile phone numbers of the customer and the merchant are mapped to their respective bank accounts and this mapping is maintained by the MASP.

FIG. 1.0: ARCHITECTURE OF M-PAYMENT

The users are provided with a client m-payment application (mobile wallet) that is either resident on their phones or else in the SIM card. This application may be provided over the air to the users. The mobile wallet will normally interact with the MASP server.

A mobile phone user communicates with a merchant and makes an economic transaction (e.g., buying a ticket from an airline over the phone). The merchant obtains the phone number of the customer and initiates the m-payment transaction request stating the amount for which payment is required. The customer confirms the request and authorizes payment. The MASP receives the authorization and verifies the authenticity of the customer. The MASP then debits the customer account and credits the merchant account by interacting with the bank. Once the electronic funds transfer is successful a confirmation message is sent to the customer and the merchant advising them of the debit and credit respectively. The Certifying Authority also shown in Fig. 1.0 supplies digital certificates for the users in the system to provide security (see section below). This model can be extended to handle the interaction between the MASP and the financial system taking into account inter-bank payments and settlement.

M-PAYMENT PROTOCOLS

A sample protocol that describes the transaction between a customer and a merchant, each using his or her mobile phone and a m-payment application service provider as an intermediary is outlined in this section. It is assumed that customer and merchant are registered as users with the m-payment application service provider (with their respective bank account details) and both of them have valid digital certificates. The transactions are detailed below...

1. Service Request: Customer → Merchant

Customer makes a service request to the merchant

2. Product Options: Merchant → Customer:

Merchant sends his product options and his certificate

3. Product Selection: Customer → Merchant:

Customer selects a product; the selection is signed by the customer's private key

4. Payment Request: Merchant → M-payment Application Solution Provider (MASP) → Customer:

The payment request (containing the invoice amount) is signed using merchant's private key. Customer can verify that the merchant is genuine by using his certificate (sent earlier in step 2). The MASP also authenticates the merchant before passing the payment request to the customer.

5. Payment Authorization: Customer → MASP:

The customer authorizes the payment request by digitally signing the authorization using the customer's private key. The MASP transfers the money from the buyer's account to the seller's account by communicating to the bank(s).

6. Payment Confirmation: MASP → Customer:

MASP confirms payment made to merchant

7. Payment Confirmation: MASP → Merchant:

MASP informs merchant of successful payment

The customer and the merchant can verify their respective bank accounts as to whether payment has been made.

The Institute for Development and Research in Banking Technology (IDRBT) has an experimental, proof-of-concept project where PKI enabled m-payment applications have been demonstrated to be feasible.

STAKEHOLDERS

There are many different stakeholders in the process of implementing mobile payments. They are ^[6]

- a) Consumers
- b) Merchants
- c) Mobile Network operators
- d) Mobile device manufacturers
- e) Financial institutions and banks
- f) Software and technology providers
- g) Government

Each player has different incentives and strategies. Sometimes these interests and strategies between different players may be in conflict e.g., the telecommunications network provider would like to maximize revenues through each m-payment transaction whereas customers and merchants would like to minimize costs for each m-payment transaction. The expectations of each of the stakeholders are outlined below.

CONSUMER EXPECTATIONS

- Personalized service
- Minimal learning curve
- Trust, privacy and security
- Ubiquitous – anywhere, anytime and any currency
- Low or zero cost of usage
- Interoperability between different network operators, banks and devices
- Anonymity of payments like cash
- Person to person transfers

MERCHANT

- Faster transaction time
- Low or zero cost in using the system
- Integration with existing payment systems
- High security
- Being able to customize the service
- Real time status of the mobile payment service

BANKS

- Network operator independent solutions
- Payment applications designed by the bank
- Exceptional branding opportunities for banks
- Better volumes in banking – more card payments and less cash transactions
- Customer loyalty

TELECOM NETWORK PROVIDERS

- Generating new income by increase in traffic
- Increased Average Revenue Per User.
- Become an attractive partner to content providers

MOBILE DEVICE MANUFACTURER

- Large market adoption with embedded mobile payment application
- Low time to market
- Increase in Average Revenue Per User (ARPU)

GOVERNMENT

- Revenue through taxation of m-payments
- Standards

CONCLUSION

The Mobile Payment Forum of India (MPFI) has been formed with Institute for Development and Research in Banking Technology (IDRBT) and Rural Technology Business Incubator (RTBI), IIT Madras taking the lead role. Lots of challenges are to be overcome for a successful implementation of mobile payments to be widely accepted as a mode of payment. Businesses, merchants and consumers have to come forward and make value-producing investments. A regulatory framework and widely accepted standards will be the pillars on which mobile payment applications will be built.

Research so far has outlined a diversity of thinking and innovation that exists in the m-payments arena. Numerous solutions have been tried and failed but the future is promising with potential new technology innovations ^[4].

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Computer Application and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mails i.e. **infoijrcm@gmail.com** or **info@ijrcm.org.in** for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail **infoijrcm@gmail.com**.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
