ABSTRACT

This article describes the many web resources made available to users in the form of open access and subscribed in the form of E-journals, E-Books, e-theses and video sharing web sites. It proves that open access and subscribed resources may be prepared even for highly resource-demanding lessons on text, image, video and audio processing and compression. This paper helps to online learners of Green revolution professionals to aware of web-based resources available on Internet. The creation and application of web resources will support learning and teaching process.

INTRODUCTION

he popularity of the World Wide Web and the incredible rapid growth of the web technology could not be imagined a decade ago. Web is a globally hyper linked electronic environment on which a lot of latest information is available in almost all subject areas. Keeping this in mind, an exhaustive information search was conducted on Internet to compile a list-of various web sites providing information on the use of multimedia systems for library applications. Rapid increase number of Internet access points all over the world leads to many research on new technologies for education and working. The creation and application of web resources will support learning and teaching process.

WEB RESOURCES FOR GREEN REVOLUTION

- E-Journals
- E-Books
- Electronic Theses and Dissertations and so on.

MULTIMEDIA@TEACHER TUBE

Teachertube is to provide anytime, anywhere professional development with teachers teaching teachers. As well, it is a site where any one can post videos designed for students to view in order to learn a particular game.

With TeacherTube, community members can:

- Upload, tag and share videos worldwide.
- Upload Support Files to attach your Green based Speeches, formats to your video.
- Browse hundreds of videos uploaded by community members.
- Customize the experience by subscribing to member videos, saving favorites, and creating play lists.

CONCLUSION

Digital Libraries and Multimedia brings together in one place important contributions and up-to-date research results in this fast moving area. Libraries need to balance provisions for greater access to text based information systems as opposed to limited-scale, multimedia products. However, as Libraries move into the twenty-first century, multimedia integrated library systems will become a necessity rather than a luxury.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Computer Application and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mails i.e. infoijrcm@gmail.com or info@ijrcm.org.in for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active cooperation of like-minded scholars, we shall be able to serve the society with our humble efforts.
