CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR
IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF

(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript entitled ' _____ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

NAME OF CORRESPONDING AUTHOR:

Designation:
Affiliation with full address, contact numbers & Pin Code:
Residential address with Pin Code:
Mobile Number (s):
Landline Number (s):
E-mail Address:
Alternate E-mail Address:

NOTES:

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:
New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

INTRODUCTION**REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
 - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parentheses.
 - The location of endnotes within the text should be indicated by superscript numbers.

PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.

FINANCIAL INDICATORS FOR BUY BACK OF SHARES

PRERNA SEHGAL

ABSTRACT

As per financial management the ultimate aim of business is to maximize wealth of shareholders. Though dividends and stock price appreciation are the two most common ways in which companies can return wealth to its investors, there is one more useful, and often unnoticed, method for companies to provide return to investors i.e BUY BACK OF SHARES. This article emphasize on Buy Back of Shares and goes through the working of a share buyback and its effect on investors wealth. Share buy back can have positive and negative effect. If a stock is undervalued and a buyback truly represents the best possible investment for a company, the buyback and its effects can be viewed as a positive sign for shareholders. As it often happens in cases of finance, the question may not have a definitive answer. If a stock is undervalued and a buyback truly represents the best possible investment for a company, the buyback and its effects can be viewed as a positive sign for shareholders. However, if a company is merely using buybacks to prop-up ratios, provide short-term relief to an ailing stock price or to get out from under excessive dilution, then it may not be successful and the whole process of buyback may go for a loss. Finally, the decision for buyback of shares would depend on the analysis of the various facets to which the company is exposed.

KEYWORDS

Financial Indicator, Buy Back, Shares, Return on Investment, Shareholders.

MEANING OF BUY BACK

A stock buyback refers to a company's buying back its own shares from the market or shareholders. It is also known as a "share repurchase". Buyback is a process that is opposite to the issue of shares by a company in which it offers to repurchase its shares owned by the investors at a stipulated price; this offer can be binding or optional to the investors. As company can't be its own shareholder, repurchased shares are cancelled by the company, and the number of outstanding shares in the market is reduced. As a result of which, the relative ownership stake of each investor increases because there are fewer shares, or claims, on the earnings of the company. In other words, stock buyback is the purchase of a long position by a company to offset a short position.

CHARACTERISTICS OF COMPANY GOING BACK

- a) Companies with some of the following characteristics may opt for a share buy-back scheme.
- b) Companies having the intrinsic value of the shares of the company substantially greater than the market price of the shares of the company.
- c) Companies which do not have investment opportunity in hand in near future.
- d) A high net surplus cash position of company.
- e) Companies with low debt/equity ratio may go for a share buyback so that the debt/equity ratio may be increased.
- f) Companies with a high dividend yield ratio.

WHY SHOULD COMPANY GO FOR BUY BACK OF SHARES?

A company can go for buyback for many reasons but the most significant and viable reasons are as follows:

- a) **Transferring excess Cash to Shareholders:** Buying back of stock provides option for a company to pass on extra cash available to shareholders without declaring dividend. If the cash is temporary in nature, it is more favorable to pass on surplus cash to shareholders through buybacks rather than raising the dividend.
- b) **Enhance Investors' Confidence in Management:** It might boost the investors' confidence on the board of directors of the company, as these investors know that the management is willing to return surplus cash if it's not able to earn above the company's cost of capital.
- c) **Increasing Shareholders' Wealth:** According to the law of demand and supply, if there is fewer number of shares in the market and the demand of the shares is rising, then the price of the shares will rise. This will result in increasing the wealth of the existing shareholders.
- d) **Higher Earning per Share:** Buying back of stock means that the company earnings are now split among smaller number of shares, which means higher earnings per share (EPS) for remaining shareholders. Higher earnings per share generally command a higher stock price.
- e) **Instrument for Financial Re-engineering:** In the case of profit making, companies whose share prices are declining, buybacks can actually boost their market prices since dividends attract taxes. A buyback and the subsequent neutralization of shares can reduce dividend outflows, and if the opportunity cost of funds used is lesser than the dividend savings, then the due motive of buy back is served.
- f) **Hedge against Takeovers:** Buying back stock consumes excess cash. The returns on excess cash in money market accounts can pull down overall performance of company. Cash rich companies are also very attractive takeover targets. Buying back stock provide opportunity to the company to earn a better return on excess cash and keep it safe from becoming a takeover target.
- g) **Psychological Effect:** When a company announces a buyback, it is usually perceived by the market as a positive thing, which often causes the share price to shoot up. Whenever a company is buying its own stock, it is basically telling the market that they think that the company's stock is undervalued. This can have a positive signal on prospective investors.
- h) **Tax Benefits:** Exemption is available only if the shares are sold on a recognized stock exchange and securities transaction tax (STT) on the sale of shares has been paid. In a buyback scheme, neither does the sale take place on a recognized exchange nor is the STT paid. So, the shareholder will have to pay income tax on long-term capital gain on the buyback, after deducting the acquisition cost of the shares plus the benefit of indexation from the year of purchase to the year of buyback. On the resultant gain, the tax would be 20% plus the applicable surcharge, if any, plus 3% education cess or we may also work out the tax at 10% of the gain without considering indexation. The tax liability will be limited to the lower of the above two calculations.
- i) **Shoot up demand:** As in buyback process the company is also competing against other investors to purchase its own shares, this raise the stock demand in open market, which causes prices to rise.

METHODS OF BUY BACK

Buyback of shares can be done by the following companies:

- a) Public Limited Companies or Listed Companies
- b) Private Limited Companies or Unlisted Companies

(a) Public Limited Companies or Listed Companies can go for buyback through tender offer or from open market through stock exchange.

1. TENDER OFFER

Shareholders may be approached with a tender offer by the company to submit a portion or all of their shares within a certain time frame. The tender offer will specify both the number of shares the company is looking to repurchase and the price range within which they are willing to repurchase. Companies almost always pay price that is premium to the market price. When investors agree to take the offer, they will state the price they are ready to accept and the number of shares they want to tender. Once the company has received all of the offers, it will find the right mix to buy the shares at the lowest cost.

2. OPEN MARKET

The second alternative a company has is to buy shares on the open market, like an individual investor would, at the market price. It is important to note, however, that when a company announces a buyback, it is essentially telling the market that they think that the company's stock is undervalued. This often causes prices to rise.

(b) Unlisted Company may buy-back its shares by either of the following methods:

1. From the existing security holders on a proportionate basis through private offers;
- or
2. By purchasing the securities issued to employees of the company pursuant to a scheme of a Stock Option or Sweat Equity.

EFFECTS OF SHARE BUY BACK

When a company goes in for buyback of shares, there may be positive effects or negative effects on the shareholders and/or the company.

- a) EFFECTS ON THE SHAREHOLDER OF THE COMPANY
- b) EFFECTS ON THE COMPANY

A) EFFECTS ON THE SHAREHOLDER OF THE COMPANY

A.1 Tax Advantages - When a company is having surplus cash, it can either pay it off as dividend or go for buyback of shares. When a company pays dividend they are entitled to pay dividend distribution tax. This cost has to be indirectly borne by the shareholders, who receive fewer dividends as a consequence of tax payments. Therefore by Buying back shares, a company gives surplus cash to the shareholder and saves tax for the shareholders.

Example: A company has surplus cash of Rs.100 crore and if they declare

Rs. 100 crore as dividend then the company has to pay dividend distribution tax of Rs.15.00 crore. So, the net amount which would be received by the shareholders would be Rs.85.00 crore.

If a company decides to go for buyback of shares, then the entire amount of Rs.100 crore is received by the shareholders. Thus, shareholders save tax of Rs.15.00 crore, which they would have incurred, if the company would have given them surplus cash by way of dividend.

A.2 Higher Proportion of Shares - When a company goes for buyback, the number of outstanding shares reduces. That means the proportion of investment of an individual investor increases in the company.

A.3 Higher Price of Shares - One of the reasons why a company goes for a buyback is that they think that their shares are undervalued. That is why they buyback shares at a premium or at a price that they think it should command in the market.

Example: The Market price of a share of ABC Ltd. is Rs150 and the company believes that the price of their share should be at Rs 250 based of their fundamental and technical analysis. Therefore, the company buys back shares at Rs. 250 from the market, thus increasing the market value of the share from Rs 150 to Rs.250.

B) EFFECTS ON THE COMPANY

B.1 Change in the Shareholding Pattern

PARTICULARS OF ABC LTD.	
Total number of Shares	1,000
Face Values of Shares	Rs.10.00
Equity Capital	Rs. 10,000.00
Buyback of Equity Shares (numbers)	200
Maximum Offer Price	25.00

SHAREHOLDING PATTERN OF ABC LTD.				
Particulars	Before buyback	After buyback		
		Case1	Case2	Case3
Promoters(No.of shares)	400	400	320	200
Non-Promoters(No. of shares)	600	400	480	600
Promoters (percentage)	40%	50%	40%	25%
Promoters(percentage)	60%	50%	60%	75%

ASSUMPTIONS

Case 1: The original proportion of promoters and non-promoters share in the total equity capital was 40.00% and 60.00% respectively. It is assumed that there is a 100% buyback of 200 shares which the company has proposed to make. Therefore, all the shares that are proposed to be bought are bought from the non-promoters group and nothing has been offered by promoters. Thus, the proportion of promoters share in the total equity capital increases from. 40.00% to 50.00% and that of non-promoters decreases from 60.00% to 50.00%.

Case 2: The company decides to keep the shareholding same as before i.e. promoters 40.00% and non-promoters 60.00%.

Case 3: The Company decides to bring down the promoters shares in the company's equity share capital to 25%,

It can be seen from the above example that depending on the policy of the company, the shareholding pattern of the company changes. Promoters and non-promoters shareholding can increase, decrease or remain unchanged.

B.2 FINANCIAL RATIOS OF THE COMPANY IS STRENGTHENED

Another reason a company might pursue a buyback is solely to improve its financial ratios - metrics upon which the market seems to be heavily focused. If reducing the number of shares is not done in an attempt to create more value for shareholders but rather make financial ratios look better, there is likely to be a problem with the management. However, if a company's motive for initiating a buyback program is sound, the improvement of its financial ratios in the process may just be a bye-product of a good corporate decision. When a company decides to go for buyback, the financial ratios of the company are impacted to a greater extent. The ratios that are generally impacted are Return on Assets (ROA), Return on Equity (ROE), Earnings per Share (EPS) and Price Earnings Ratio (P/E). The same has been explained with an example:

COMPANY – XYZ LTD.		
Particulars	Before buyback	After buyback
Number of shares	150	125
Cash Balance	Rs.1000.00	Rs.625.00
Total Assets	Rs.10000.00	Rs.9625.00
Earnings	Rs.1500.00	Rs.1500.00
Equity Share Capital	Rs.1500.00	Rs.1250.00
Reserves	Rs.200.00	Rs.75.00
Total Shareholders' Funds	Rs.1700.00	Rs.1325.00
Market Share Price	Rs.10.00	Rs.15.00
Financial Ratios		
Return on Assets (ROA)	0.15	0.16
Return on Equity(ROE)	0.88	1.13
Earning per share(EPS)	10	12
Price-EarningRatio (P/E)	1	1.25

EXPLANATION

Return on Assets: We can see that ROA has increased after buyback. The reason behind this increase is that there is a reduction in the total assets. The total assets have gone down from Rs.10,000.00 to Rs.9,625.00 whereas the income has remained the same.

Return on Equity: It has also increased from 0.88% to 1.13%. This is due to the decrease in the shareholder's equity, which has gone down from Rs. 1,500.00 to Rs. 1,250.00

Earnings per Share: It has increased from Rs.10 to Rs. 12. The reason behind the increase of EPS is that, although the earnings of the company is unchanged, the numbers of shares have come down from 150 to 125, causing the EPS to increase.

Price to Earnings Ratio: Here, the market value of the share has increased from Rs.10 to Rs.15, which is a 50% hike in the price. On the other hand, the EPS has also increased from 10 to 12, which is a 20% hike. Since the overall increase in the market value of the share is much more than the increase of EPS, we can, therefore, see an increase in the price-earnings ratio.

B.3 SEND NEGATIVE SIGNALS

An announcement for buyback can send negative signals to the investors against the companies. A typical example is the Hewlett Packard (HP) case: The Company spent \$ 8.2 billion to buy back 128 million of its shares from the market during the period November 1998 to October 2000. The aim of the company was to make opportunistic purchases of HP stock at attractive prices—in other words, at prices they felt that undervalued the company. Instead of signaling a good operating prospect to the market, the buyback signal drowned out more powerful contradictory signals about the company's future which are an aborted acquisition, a protracted business restructuring, slipping financial results, and a decay in the general profitability of key markets.

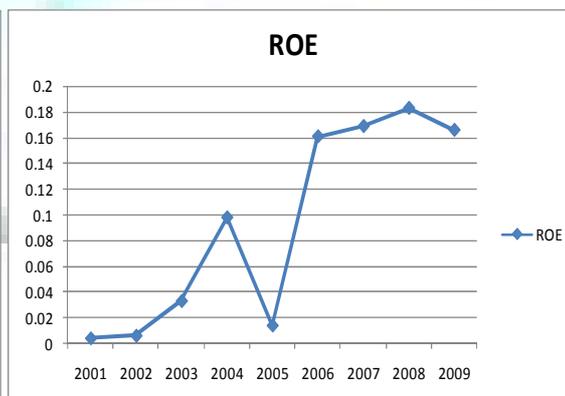

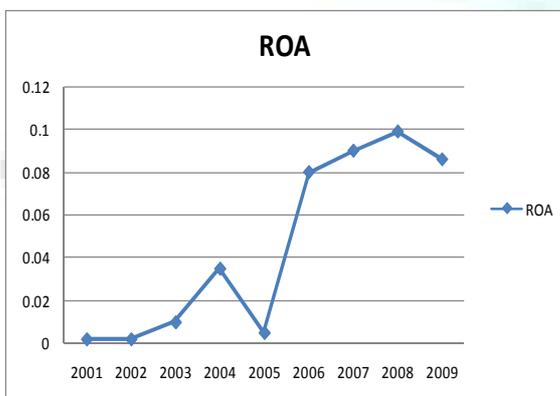

The share buyback scheme might become a big disadvantage to the company when it pays too much for its own shares. Indeed, it is not advisable to buy in an overpriced market. Instead, the company should put the money into assets that can be easily be converted back into cash. This way, when the market swings the other way and is trading below its true value, shares of the company can be bought back at a discount; ensuring current shareholders receive maximum benefit. Strictly, a company should repurchase its shares only when its stock is trading below its expected value and when no better investment opportunities are available.

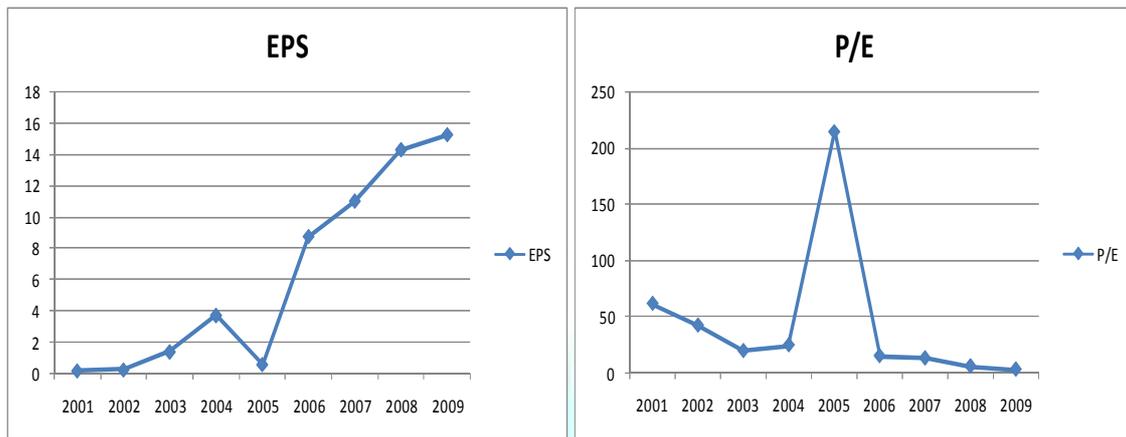

Now let us look at an example of buyback of shares which happened in the year 2007. Natco Pharma decided to go for buyback of its shares in the year 2007. The company went for buyback on 12th February 2007 and completed the buyback on 30th July 2007. The price that was offered by the company for the buyback of shares was Rs 150.00 per share and the total outflow of cash was Rs.7.00 crore

It can be seen from the graphs below, that after the buyback of shares by the company, the earnings per share, return on assets and return on equity have increased remarkably. This proves that the decision to go for buyback was a very valid and successful decision by the management.

(3) EFFECT OF FINANCIAL RATIOS

	2001	2002	2003	2004	2005	2006	2007	2008	2009
ROA	0.002	0.002	0.010	0.035	0.005	0.080	0.090	0.099	0.0860
ROE	0.004	0.006	0.033	0.098	0.014	0.161	0.169	0.183	0.166
EPS	0.200	0.260	1.410	3.730	0.600	8.760	11.020	14.280	15.240
P/E	61.750	42.308	19.716	24.853	214.417	15.234	13.203	5.935	3.166

CONCLUSION

Are share buybacks good or bad? As it often happens in cases of finance, the question may not have a definitive answer. If a stock is undervalued and a buyback truly represents the best possible investment for a company, the buyback and its effects can be viewed as a positive sign for shareholders. However, if a company is merely using buybacks to prop-up ratios, provide short-term relief to an ailing stock price or to get out from under excessive dilution, then it may not be successful and the whole process of buyback may go for a loss. Finally, the decision for buyback of shares would depend on the analysis of the various facets to which the company is exposed.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Computer Application & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
