NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. <u>pdf. version</u> is liable to be rejected without any consideration.
- b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail**:
 - **New Manuscript for Review in the area of** (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is expected to be below 1000 KB.
- e) Abstract alone will not be considered for review and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email within twenty four hours and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
- g) The author (s) name or details should not appear anywhere on the body of the manuscript, except the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
- 2. MANUSCRIPT TITLE: The title of the paper should be **bold typed**, **centered** and **fully capitalised**.
- 3. AUTHOR NAME (S) & AFFILIATIONS: Author (s) name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address should be given underneath the title.
- 4. ACKNOWLEDGMENTS: Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
- 5. **ABSTRACT**: Abstract should be in **fully italicized text**, ranging between **150** to **300 words**. The abstract must be informative and explain the background, aims, methods, results & conclusion in a **SINGLE PARA**. **Abbreviations must be mentioned in full**.
- 6. **KEYWORDS**: Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations.
- 7. **JEL CODE**: Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aeaweb.org/econlit/jelCodes.php, however, mentioning JEL Code is not mandatory.
- 8. **MANUSCRIPT**: Manuscript must be in <u>BRITISH ENGLISH</u> prepared on a standard A4 size <u>PORTRAIT SETTING PAPER</u>. It should be free from any errors i.e. <u>grammatical</u>, spelling or <u>punctuation</u>. It must be thoroughly edited at your end.
- 9. **HEADINGS**: All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
- SUB-HEADINGS: All the sub-headings must be bold-faced, aligned left and fully capitalised.
- 11. MAIN TEXT:

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:

INTRODUCTION REVIEW OF LITERATURE NEED/IMPORTANCE OF THE STUDY STATEMENT OF THE PROBLEM OBJECTIVES HYPOTHESIS (ES) RESEARCH METHODOLOGY RESULTS & DISCUSSION FINDINGS RECOMMENDATIONS/SUGGESTIONS CONCLUSIONS LIMITATIONS SCOPE FOR FURTHER RESEARCH REFERENCES APPENDIX/ANNEXURE

The manuscript should preferably range from 2000 to 5000 WORDS.

- 12. **FIGURES & TABLES**: These should be simple, crystal **CLEAR**, **centered**, **separately numbered** & self explained, and **titles must be above the table/figure**. **Sources of data should be mentioned below the table/figure**. *It should be ensured that the tables/figures*are referred to from the main text.
- 13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, horizontally centered with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word should be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
- 14. **ACRONYMS**: These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section: Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
- 15. **REFERENCES**: The list of all references should be alphabetically arranged. *The author (s) should mention only the actually utilised references in the preparation of manuscript* and they are supposed to follow Harvard Style of Referencing. Also check to make sure that everything that you are including in the reference section is duly cited in the paper. The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
- Use (ed.) for one editor, and (ed.s) for multiple editors.
- When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
- Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
- The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
- For titles in a language other than English, provide an English translation in parenthesis.
- Headers, footers, endnotes and footnotes should not be used in the document. However, you can mention short notes to elucidate some specific point, which may be placed in number orders after the references.

EXPORT GROWTH AND PROSPECT OF FLORICULTURE IN INDIA: GLOBAL SCENARIO

R.SENTHILKUMAR ASST. PROFESSOR PG. & RESEARCH DEPARTMENT OF COMMERCE AND MANAGEMENT STUDIES SUDHARSAN COLLEGE OF ARTS & SCIENCE PERUMANADU POST

ABSTRACT

Floriculture is an age-old farming activity in India. It always has an immense potential for generating gainful self-employment especially among small and marginal farmers. In the recent years it has emerged as a profitable agri-business in India and elsewhere throughout the world. It has also improved the standards of living. Growing consciousness among the citizens across the globe to live in environment friendly atmosphere has led to an increase in the demand of floriculture products in the developed as well as in the developing countries worldwide. Naturally, the production and trade in floriculture has increased consistently over the last 10 years. In this article, we first make a review of the global scenario of floriculture and compare the export growth of Indian floriculture with other countries across the globe considering data for the period 2006-2015. Finally we try to identify some emerging markets of floriculture and make a review of India's export performance in these markets during the period of five years from 2011 to 2015. The data used for the purpose of making comparisons and study of export performance has been collected from the website of the United Nations Commodity Trade Statistics Database.

KEYWORDS

Floriculture Product, Export, Import, CAGR, Global Scenario.

INTRODUCTION

loricultural products consist of a wide variety of different types of plants & plant materials. They are broadly classified into four categories, namely, (i) bulbs, tubers, corns including, chicory plant (non-food) (HS Code: 0601), (ii) Other live plants, roots, cuttings, mushroom spawn (HS Code: 0602), (iii) Cut flowers, dried flowers for bouquets, etc., (HS Code: 0603) & (iv) foliage etc., except flowers for Ornamental Purposes (HS Code: 0604).

During the ten year period of 2006-2015, production and export of floricultural products from India has increased manifold. In 2006, India's export of this commodity was around 18 million US \$ which has increased to almost four times in 2015. In a country like India floriculture as an Industry has tremendous potential for generation of gainful employment in rural as well as urban areas. Since the global demand of floricultural products is increasing day by day, India can effectively capitalize on this opportunity to solve the problem of unemployment & poverty, to some extent, through achieving a consistent growth in production and export of this commodity which will earn valuable foreign exchange. In comparison to the developed countries and also to some developing countries floriculture in India is still in a nascent stage.

OBJECTIVES OF THE STUDY

The main theme of the paper that know the growth and prospect of export of floriculture in India after the globalization. Globally, the export of floricultural products has increased phenomenally from 8 billion US \$ in 2006 to 13 billion US \$ in 2015. The number of countries reported to have exported floricultural products in 2006 was a mere 50 which has increased to 118 in the year 2015. In fact, this number gradually increased from 50 in 2006 to its peak at 137 in 2012 & 2013. However, the contribution of export of floriculture products to the global export has hovered in the same level during 2006-2015. In fact, it was the highest (0.19%) in 2006 and thereafter, it has mostly remained in the range of 0.14% to 0.16%.

The Netherlands has traditionally dominated the world export market of floriculture products with its value of export growing from 4.6 billion US \$ in 2006 to 6.7 billion US \$ in 2015. It alone contributes more than 50% of the total export of floricultural products worldwide. But its contribution to the global export has come down marginally from 57% in 2006 to 52% in the year 2015. This may be due to the fact that several other countries like Ecuador, Costa-Rica, India, China, Uganda, Austria & Kenya are keenly/ competing in the market of floriculture export after the opening up of the worldwide market in the WTO. Regime.

Columbia, the next highest floriculture product exporting country though has remained in the second position throughout the period 2006-2015, in terms of value of export of floricultural products it is far away from the Netherlands. Italy is the third largest exporter of floriculture products worldwide. During the year 2015, it has exported floriculture products to the tune of \$ 696.90 million. Apart from these three countries, Belgium, Denmark, Germany, Ecuador, USA & Costa-Rica has made significant contribution in the global export of floricultural products during the period under reference.

INDIA'S CONTRIBUTIONN TO GLOBAL EXPORT

India is in the 18th position, just behind china in the export of floricultural products of the world. But about 0.07% of the country's total export volume during the period 2006-2015. The compound annual growth rate (CAGR) of India's floricultural product export during 2006-2015 is 14% which is far ahead than that of the CAGR in global export of floriculture products (5%). The CAGR of export of floricultural products for some selected countries is presented in the following Table 1:

TABLE 1: CAGR OF EXPORT OF FLORICULTURAL PRODUCTS FOR SOME SELECTED COUNTRIES

	SI. No.	Country	Period	CAGR (in %)	Rank in CAGR (in %)
Γ	1	Belgium	2009-2015	7.23	VII
	2	China	2006-2015	9.91	V
	3	Costa-Rica	2007-2015	4.23	X
	4	Colombia	2006-2015	5.85	VIII
П	5	Denmark	2009-2015	1.09	XII
I	6	Ecuador	2008-2015	9.55	VI
	7	India	2006-2015	14.36	III
	8	Italy	2006-2015	4.32	IX
	9	Kenya	2007-2015	16.00	II
	10	Netherlands	2006-2015	3.82	XI
	11	South Africa	2010-2015	10.54	IV
	12	Uganda	2006-2015	28.13	1
Γ	13	World	2006-2015	5.00	-

E-Source: Secondary Data Collected from United Nations Commodity Trade Statistics Database, Statistics Division, http://comtrade.un.org/

The growth in India's floriculture export in 2006-2015 has been quite noticeable in comparison to several other developed nations like the Netherlands, Denmark, Italy, Belgium etc., During the period under reference, Uganda registered the highest CAGR in floriculture product export and India was the third country to register a CAGR more than 10.0. Such a consistent and robust increase in the export growth is quite encouraging.

In the year 2015, around 46% of the total value of floriculture product export from India has been cut flowers, dried flowers for bouquets etc., (ITCHS Code: 0603) and another 43% was in the category of foliage, branches & other parts of plants without flowers or flower buds etc., (0604). In fact, export of cut flowers,

dried flowers for bouquets etc., was the highest (83%) in the year 2007 and then it gradually come down to 46% of the total value of export of floriculture produce in the year 2015. On the other hand, export of foliage etc., has consistently increased from a mere 4% in 2006 to around 43% of the total floriculture product export in the year 2015. However, export of live plants, roots, cuttings, mushrooms, spawn etc., (ITCHS Code: 0602) during 2006-2015 has remained more or less in the same level and the contribution of bulbs, tubers, corns etc., (ITCHS Code: 0601) has been 1 to 2% of the total volume of export during this period.

(i) MAJOR EXPORT DESTINATIONS OF INDIA'S FLORICULTURE PRODUCTS

From this sub-section onwards we will restrict our discussion to the period 2011-2015, i.e the second half of the reference period 2006-2015. During the five year period 2011-2015, USA has been the major importer of Indian floriculture products. In 2015, it has imported around one fourth of India's total floriculture export. Next to USA is Japan. In 2011 Japan Imported floricultural product worth of 2.7 million US \$ which has increased almost 5 times to 12.8 million US \$ in the year 2015. The third major export destination for India's floriculture product is the UK and export to this country in 2015 has risen to 7.0 million US \$ from million US \$ from 2.3 million US \$ in the year 2006. Apart from these three destinations, the Netherlands, Germany, Italy, UAE and France also import a significant amount of our floriculture produce.

It is also heartening to note that Indian exporters have also been able to increase their share of floricultural product exports to some emerging markets like Russia, China, Thailand, South Africa and Austria. In case of China and Russia the growth has been quite substantial. Floriculture products of worth three thousand million US \$ was exported to China in 2011 which has grown to more than one million US \$ in 2015 while for Russia it has increased to 0.3 million US \$ in 2015 from almost nil in 2011. On the other hand, export of this commodity to countries like France, Singapore, Belgium, and Spain has either remained in the same level or registered a negative growth in 2011-2015.

(ii) GLOBAL IMPORTERS OF FLORICULTURAL PRODUCTS AND IDENTIFICATION OF POTENTIAL MARKETS FOR INDIA

Germany is the highest importer of floriculture products. The share of Germany in global Import has increased from 1.7 billion US \$ in 2011 to 2.5 billion 2015. It is followed by the USA with an import value of 1.6 billion US \$ in 2015. Its share in global import of flower & flower products has come down to 12% in 2005 from 15% in 2011. UK is the third largest importer of floriculture products from across the globe and its import has more or less remained the same during the period 2011-2015.

In the recent years import of floricultural products from countries all over the world has been quite impressive for the Russian Federation, Poland, Norway, Czech Republic, Hungary, China, Ukraine, Romania, Thailand and South Africa. The CAGR of import of flower during 2011-2015 has been phenomenal for the countries mentioned below:

TABLE 2: CAGR OF FLORICULTURE PRODUCT IMPORT DURING 2011-2015 FOR SELECTED COUNTRIES

Sl.No.	Countries	CAGR	Rank in CAGR
1	China	25.41	V
2	Czech Rep	16.51	VIII
3	Hungary	23.80	VI
4	Norway	11.82	X
5	Poland	18.60	VII
6	Romania	37.20	II
7	Russian Federation	26.89	IV
8	South Africa	13.21	IX
9	Thailand	39.81	
10	Ukraine	34.90	III
11	World	8.78	-

E-Source: Secondary Data Collected from United Nations Commodity Trade Statistics Database, Statistics Division, http://comtrade.un.org/
From the above table it is observed that while the global CAGR for import of flower from the countries all over the world has been 8.78%, it has been higher for countries like Thailand, Romania, Ukraine, Russian Federation and China. In fact, the CAGR for import of flowers from across the world for the countries mentioned above has exceeded that of the developed countries like USA, UK, Germany, the Netherlands, Italy and Japan by a significant margin. The following figure 7 shows the trend in import of floriculture products for some selected emerging flower importing countries.

TABLE 3: DOUBLE RELATIVE MEASURE OF TRADE INTENSITY INDEX FOR SOME SELECTED COUNTRIES

Sl.No.	Country	2011	2012	2013	2014	2015
1	Austria	0.06	0.10	0.26	0.82	0.52
2	Canada	0.25	0.28	0.43	0.49	0.19
3	China	0.56	0.94	0.69	4.69	2.90
4	Czech Rep.	0.03	0.31	0.30	0.25	0.15
5	Denmark	0.16	0.15	0.19	0.22	0.15
6	France	0.44	0.41	0.34	0.25	0.21
7	Germany	0.50	0.46	0.50	0.57	0.42

From table 3, it is easy to note that during the period 2011-2015 the countries like the UK, Germany, France, Switzerland, Australia, Austria, Canada, Denmark, Czech Republic & Hungary were less important as markets for India's floriculture products than they were for the world, while countries such as USA, the Netherlands, Italy, Japan, Poland, South Africa, Singapore, Sri Lanka, China etc., appeared to be more important markets to India for export of floriculture products than the rest of the world. A comparison of Table 2 & 3 also reveals that although the growth in impart of floriculture products have been phenomenal for countries like the Russian Federation, Romania, Czech Republic & Hungary. Indian exporters were unable to make their presence felt in these markets even though in the other emerging economics of China, Thailand and South Africa, Indian exporters have a significant presence.

We present below in table 4, the trend of import in floriculture vis-à-vis per capita gross domestic product (GDP) (in US \$) for some selected countries during 2011-2015. It may be noted from this table that for almost all the countries mentioned here, the consumption of floricultural products increases as the per capita GDP moves up though the rate of increase in consumption varies widely across the countries. This increase may be due to the fact that with an increase in the GDP the standard of living improves which might have a positive effect towards the consumption of flower products in the developed as well developing nations. What is encouraging to note from table 4 that even in developing countries such as China, Thailand, Malaysia, Mauritius, Philippines, Sri Lanka and South Africa also consumption of flower and products has been growing up with the increase of per capita GDP and these countries are emerging as potential future markets for floricultural products. In table 4, the import figures (in million US \$) for a particular country has been shown in the first row while the second row represents the per capita GDP figures (in US \$).

TABLE 4: TREND IN IMPORT OF FLORICULTURE PRODUCTS (IN MILLION US \$) VIS-À-VIS PER CAPITA GDP (IN US \$) DURING 2011-2015

We now present below the CAGR of floricultural product import vis-à-vis CAGR of India's export of floricultural products to some selected countries during 2011-2015. It is observed from table – 5 that even though the growth in import of floricultural products for countries like Belgium, Spain, France, Hungary, Italy, Switzerland and Oman has been quite substantial during 2011-2015, India's contribution to the import of these countries was unsatisfactory. In fact, India's share to the import of Switzerland, Singapore and Oman has decreased during the period of reference.

TABLE 5: CAGR OF IMPORT VIS-À-VIS THAT OF INDIA'S EXPORT DURING 2011-2015

Sl.No.	Country	CAGR of Import of floricultural	CAGR of Export of floricultural
		products during 2011-'15(in %)	products during 2011-'15(in %)
1	Belgium	9.72	8.61
2	China, Hong Kong SAR	2.35	1.10
3	France	10.02	4.53
4	Hungary	23.80	16.84
5	Italy	10.82	10.28
6	Oman	10.40	-22.07
7	Singapore	1.00	-1.96
8	Spain	12.65	5.40
9	Switzerland	6.58	-9.42

FINDINGS, SUGGESTIONS AND CONCLUSION

India's export performance of floricultural products has been quite noticeable since 2006.

In fact the growth rate of India's flower export during the period 2006-2015 was one of the highest observed world-wide. In spite of such a phenomenal growth in export, it has not been possible for India to record significance presence in the import basket of countries like Germany, the highest importer of floricultural products from across the world and the UK, the third largest importer of flower & related products. In general, it is observed that export of India's floricultural products to Europe during 2011-2015 has not been encouraging although Europe is a major consumer market for floriculture products. This is evident from the fact that during 2011-2015 India's export of cut flowers, dried flowers for bouquets etc., which are in high demand in Europe, has consistently decreased from 71% of total volume of floriculture product export in 2011 to about 46% in 2015. One possible reason for such sluggish performance may be that the Indian exporters are unable to meet the stringent quality norms that most of the European countries demand. Another reason may be the inability of the Indian exporters to produce quality value-added products which are in high demand in most of the European countries.

The world market for floricultural product has been changing continuously. Markets like Germany, the Netherlands, France, New Zealand, Singapore & USA are already saturated while UK, Italy, Poland, China, South Africa, Russian Federation and Thailand are coming up as new markets. Initiatives are to be taken up by the Government as well as the exporters to trap the potential of these emerging markets.

In India, labour is cheap and available in abundance in rural as well as urban areas. The cost of vial inputs for floriculture like water, electricity, fertilizer, pesticides etc., are reasonable. India has a wide variety of tropical and temperature plants in comparison to much other floriculture product exporting countries. But, in spite of these advantages India's performance in the global floriculture market is not up to the mark comparison to several other countries. The major reasons behind such lackluster performance are:

- (i)Absence of proper and adequate infrastructure,
- (ii) Lack of proper technical knowledge of know-how.
- (iii) Inadequate and improper handling of control mechanism,
- (iv) Lack of sale and export promotion activities, market surveys etc.,

Indian floriculture has been mostly small scale and unorganized in nature. In different parts of the country, mainly, small and marginal farmers are engaged in cultivation and production of floricultural products. These small and marginal farmers have little knowledge about the technical aspects and cost-effective methods of floriculture farming. Recently some serious private concerns have started production and export of floriculture products in large scale and in an organized way. But, more of such initiatives both from the Government as well from private entrepreneurs are required. In order to survive in the highly competitive overseas market and to increase market share their production floriculture product, value-added products as also export of such things needs careful and close Integration at all levels-beginning with farmers and ending with Government policy makers. For boosting its floriculture export and to capture more share in overseas market a host of measures are to be undertaken by both the Government as well as the private agencies involved in production and export of floricultural products. Some of the issues that need immediate attention are:

- (i)Setting up of an export promotion council for export of floricultural products,
- (ii) Increase in production value added products like dry flowers, seeds, potted plants, micro propagated plants etc.,
- (iii) Organization of appropriate training for personnel involved in production and export of floricultural products,
- (iv) To create awareness among the producers about all effective quality control measures,
- (v) Establishment of appropriate marketing and distribution channels,
- (vi) Setting up more export processing zones for floriculture products etc.,

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Computer Application & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you tosupply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mailinfoijrcm@gmail.com for further improvements in the interest of research.

If youhave any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active cooperation of like-minded scholars, we shall be able to serve the society with our humble efforts.
