## CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

**DATED:** \_\_\_\_\_

**THE EDITOR**

IJRCM

**Subject:** SUBMISSION OF MANUSCRIPT IN THE AREA OF \_\_\_\_\_.

**(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)**

**DEAR SIR/MADAM**

Please find my submission of manuscript titled ‘ \_\_\_\_\_ ’ for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

**NAME OF CORRESPONDING AUTHOR** :  
 Designation/Post\* :  
 Institution/College/University with full address & Pin Code :  
 Residential address with Pin Code :  
 Mobile Number (s) with country ISD code :  
 Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :  
 Landline Number (s) with country ISD code :  
 E-mail Address :  
 Alternate E-mail Address :  
 Nationality :

\* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation **etc.** The qualification of author is not acceptable for the purpose.

**NOTES:**

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. **pdf. version is liable to be rejected without any consideration.**
  - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**  
**New Manuscript for Review in the area of** (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
  - c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
  - d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
  - e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
  - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
  - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be typed in **bold letters, centered and fully capitalised**.
  3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
  4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
  5. **ABSTRACT:** Abstract should be in **fully Italic printing**, ranging between **150 to 300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA**. **Abbreviations must be mentioned in full**.
  6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
  7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at [www.aea-web.org/econlit/jelCodes.php](http://www.aea-web.org/econlit/jelCodes.php). However, mentioning of JEL Code is not mandatory.
  8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. **It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
  9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
  10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
  11. **MAIN TEXT:**

**THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:****INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self-explained, and the **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they may follow Harvard Style of Referencing. **Also check to ensure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use (ed.) for one editor, and (ed.s) for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parenthesis.
  - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders before the references.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**

**ABSTRACT**

*In this paper highlights and measures the consumer perception of services provided by LIC. In this study, total service quality is measured in the selected dimensions with the help of a structured questionnaire. The schedule consists of A and B parts. The A part was used to get information on personal profile and family background of policyholder while part B was used to gain familiarity with regard to, their perception of various policies of LIC and service quality dimensions. To measure quality, five point Likert Scale was used. It is concluded that majority of the respondents (29.30 percent) earn a monthly income of Rs. 20000 - Rs. 30000. From the analysis one can infer that the monthly income of 44 respondents out of 150 is in the income between Rs. 20000 and Rs. 30000. Of these 21 respondents are Employed and 11 respondents earn income above Rs. 50,000. Only 7 respondents (63.64 percent) out of 11 were employed and only 4 respondents (36.36 percent) were professional in the income range of above Rs. 50,000.*

**KEYWORDS**

consumer perception, economic factors, quality dimensions.

**INTRODUCTION**

Life is full of risk and uncertainties. Since we are the social human beings we have certain responsibilities too. Indian consumers are influenced by emotions and rationality in their buying decisions. They believe in future rather than the present and desire to have a better and secured future. In this direction life insurance services have their own value in terms of minimizing risk and uncertainties. Indian economy is developing. It has a huge middle class conscious of its societal status and consists of salaried persons. They value money for meeting current needs and fulfilling future desires. Here the pendulum moves to another side which shows the reasons behind holding a policy. Here the attempt has been made in this research paper to study the buying behavior of consumers with respect to life insurance services.

Life insurance is one of the best known insurance products today. People buy these products as investment tools and also as protection for themselves and their families. All the insurance companies the world over are looking at attracting the customer and positioning their solutions innovatively to cater to niche and specific markets. One of the most critical aspects both from the view point of the customer and the insurer is getting important and relevant leads that can be beneficial for both.

**TRENDS IN INSURANCE WITH LPG IN INDIA**

Adoption of the free market paradigm – Liberalization, privatization and Globalization (LPG) in the early 1990's has changed the very face of Indian economy. Since then, the service sector is giving the transformational push to Indian economy from its traditional mould of agrarian economy to internationally acclaimed service economy. During the first four decades, since independence, agriculture used to employ more than 50 percent of the population, while service sector accounts for about 25 percent, the industrial sector accounts for just 10 percent. In contrast, the 2008 economic estimates give a clear view of the shift in sectoral employment.

Given the evolving socio-economic conditions worldwide, the insurance companies are increasingly reaching out to cross-border customers and are offering more competitive and customized products than ever before. Consequently, the global insurance platform has witnessed a phenomenal change over the past decade. During the last 10 years the global insurance premium proceeds netted by insurance companies have risen by more than 50 percent, with annual growth rates ranging from 2 to 10 percent. According to a survey conducted by a leading global insurance firm, Swiss Re, the worldwide insurance premiums totaled \$ 4.06 trillion in 2009. This is approximately equal to 6.98 percent of the global GDP.<sup>1</sup>

**SATISFACTION VERSUS SERVICE QUALITY**

Practitioners and writers tend to use the terms 'satisfaction' and 'quality' interchangeably, but researchers have attempted to be more precise about the meanings and measurement of the two concepts, resulting in considerable debate. Consensus is that the two concepts are fundamentally different in terms of their underlying causes and outcomes. Although they have certain things in common, satisfaction is generally viewed as a broader concept, whereas service quality focuses specifically on dimensions of service. Based on this view, perceived service quality is a component of customer satisfaction<sup>2</sup>. Figure 1.1 graphically illustrates the relationship between the two concepts.

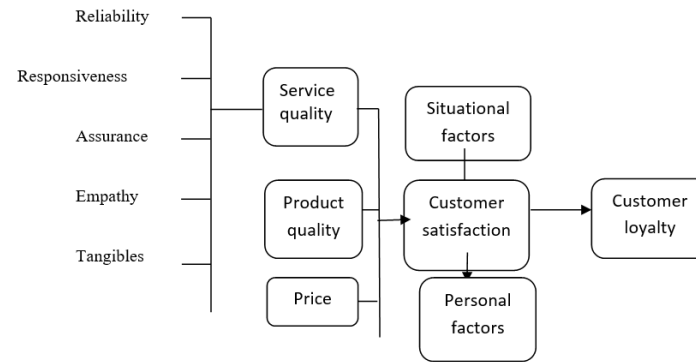

These five dimensions are discussed further along with the scale developed to measure them.

- **Reliability:** ability to perform the promised service dependably and accurately.
- **Responsiveness:** willingness to help consumers and provide prompt service.
- **Assurance:** employees' knowledge and courtesy and their ability to inspire trust and confidence.
- **Empathy:** caring, individualized attention given to consumers.

- **Tangibles:** appearance of physical facilities, equipment, personnel, and written materials.

FIG. 1: CUSTOMER PERCEPTION OF SERVICE QUALITY AND CUSTOMER SATISFACTION

Source: Valarie A Zethmal, 2008.

## REVIEW OF LITERATURE

**Vidya (2001)**<sup>3</sup> conducted "A study on policyholders' satisfaction in insurance companies with regard to Life Insurance Corporation with special reference to Coimbatore" for which the following objectives were framed, namely, to study the policyholders satisfaction with Life Insurance Corporation, to study the awareness about Life Insurance Corporation among the public and to know the advertisements performance.

**Pujari and Anand (2004)**<sup>4</sup> in their study formulated certain objectives to identify the marketing concepts in the services offered by insurance companies to fill the gaps in marketing efforts by the companies and to suggest measures to strengthen customer satisfaction. The study is primarily based on the observation and unstructured interviews with the executives at regional offices and branch office of insurance companies.

**Rao (2004)**<sup>5</sup> in his article has attempted to study the liberalized customers, which would be a challenge to the insurer. He had found that the customers value their time, speed of response, and reliability of insurance products, transparency and fairness of the provider. He added that insurer's staff should be specially trained in handling customer relations.

**Beloucif, et al (2004)**<sup>6</sup> studied the relationship between brokers and clients in U.K. Insurance Industry. The overriding concern is evaluation of the duration of the different stages in a relationship and characteristics that have impact on the quality of a relationship. A model describing these stages, unique to this relationship, is tested but the impact of different characteristics is still inconclusive. Service quality is found to be a mediating variable and has significant impact.

**Dhanabhakym (2007)**<sup>7</sup> studied the customer awareness of LIC policies in Coimbatore city. The study attempts to examine the various life insurance schemes offered by the LIC and to find the attitude of the respondent's towards the LIC policies.

**Sheela Arti (2007)**<sup>8</sup> aimed at conducting a study on the awareness of life insurance policies in Visakhapatnam. The main objective of the study is to find customers' views of insurance and their significance, and relative preferences for products offered by life insurance companies

**Shukla, Timira (2011)**<sup>9</sup> the state sponsored Life Insurance Corporation (hereinafter referred to as LIC) of India was the sole player in the Indian life insurance market before 2000. With the entry of private players, LIC has lost considerable market share to private players although both market size and insurance premium, are on the rise. It also attempts to identify the dimensions of service quality which are important to a customer. SERVQUAL scale was used to discern the different dimensions of service quality and mean scores were used to find out if there is any gap between customer expectations.

**Dar, Altaf Ahmad and Bhat, Ahmad (2012)**<sup>10</sup> examined the Consumers' perception on service quality offered by the insurance companies in and around Srinagar city. The SERVQUAL scale is administered to measure the commuter's perception of service quality. A survey was conducted among the commuters who were regularly availing themselves of insurance services.

## STATEMENT OF THE PROBLEM

Review of the extant literature clearly highlights the policyholders' post purchase behaviour, and eloquently conveys the unsatisfactory performance of LIC of India. Failure in meeting the consumer expectations (mismatch between service promises and service delivery), improper and inadequate handling of consumer complaints and grievances and substantial decline in the service standards provided by the agent from pre-purchase to post-purchase stage have eroded the consumer-base of LIC. Earlier studies have not covered these aspects, particularly service quality – consumer satisfaction. Therefore, the present study will fill the research gap and extend the existing knowledge base.

## NEED FOR THE STUDY

The study focuses mainly on the perception and satisfaction level of urban buyers of life insurance policies. The life insurance industry has come a long way since independence and Indian consumers had been dealing with only one life insurance player – the Life Insurance Corporation (LIC) in the public sector. After the liberalization of the insurance sector more than 20 companies have entered the business and started operating from urban areas. In this highly competitive environment the insurance companies have to compete with each other to gain an advantage over their competitors and attract the maximum number of customers.

During the past 20 years there have been a number of changes in the insurance marketing sector based on LPG (liberalization, privatization and globalization). There are certain unique features which call for separate strategies to be distinctively developed to suit the rural and urban market behavior. The focus of corporate therefore needs to be on the introduction of new policies to suit urban customers and developing specific strategies. The customer may be dynamic between private and public sector towards new policies. So in this situation the researcher may select to study about customer perception of products of LIC of India.

## OBJECTIVES OF THE STUDY

1. What are the key determinants of consumer satisfaction in life insurance business?
2. To identify the key indicators of high consumer perception towards policies of life insurance business?
3. To study the factors that influence consumer perception of the products of Life Insurance Corporation of India.

## METHODOLOGY

The following methodology is used for the study to find out the consumer perception and satisfaction with regard to the products of LIC: The data relevant for the study has been collected from both primary and secondary sources. As research in life insurance sector is yet to attain momentum, there is a paucity of published data and scholarly literature. Therefore, a large part of this analysis is exclusively based on the primary data. The study is empirical in nature covering customer perception of LIC products.

**1. SOURCES OF DATA**

The primary data was collected from customers of LIC through interview and schedule, while the secondary data was collected from the website of LIC, books, newspapers, magazines and journals.

The schedule consists of A and B parts. The A part was used to get information on personal profile and family background of policyholder while part B was used to gain familiarity with regard to, their perception of various policies of LIC and service quality dimensions. This research study is based on the model developed by Parasuraman and others. This model has been widely used across the globe to measure the service quality which contains five dimensions – reliability, responsiveness, assurance, tangibles and empathy. To measure quality, five point Likert Scale was used.

**2. SAMPLING PROCEDURE**

The data was collected through multi-stage sampling. In the first stage, 10 agents of LIC are selected from among 150 agents attached to Tiupati city of Chittoor district. In the second stage samples of 15 LIC policyholders are selected from each of the 10 LIC agents to get a total of 150 LIC policyholders for the study.

**3. STATISTICAL TOOLS**

The primary data was analyzed with the help of simple statistical tools such as percentage, Chi-square test and ANOVA wherever the data was categorical. The researcher has used Statistical Package for Social Science (SPSS) to analyze and interpret the data. The primary data was analyzed with the help of statistical tools such as chi-square test, ANOVA and average rank analysis.

**ANALYSIS OF DATA**

**1. MONTHLY INCOME-WISE**

Table: 1 describes Income-wise distribution of the respondents who are selected for the study. The approximate monthly income of the sample respondents is classified as less than Rs. 20000, Rs. 20000– Rs. 30000, Rs. 30000- Rs. 40000, Rs. 40000 – Rs. 50000, and above Rs. 50000.

**OCCUPATION AND MONTHLY INCOME WISE RESPONDENTS**

**TABLE 1: OCCUPATION-WISE AND MONTHLY INCOME WISE DISTRIBUTION OF SAMPLE RESPONDENTS**

Occupation	Approximate monthly income					Total
	Less than Rs. 20000	Rs. 20000-Rs. 30000	Rs. 30000-Rs. 40000	Rs. 40000-Rs. 50000	Rs. 50000 and above	
Business	16 (61.54)	20 (45.73)	18 (45.00)	5 (17.24)	-	59 (39.33)
Employed	4 (15.38)	21 (47.73)	16 (40.00)	9 (31.03)	7 (63.64)	57 (38.00)
Professional	6 (23.08)	1 (2.27)	5 (12.50)	11 (37.93)	4 (36.36)	27 (18.00)
Agriculturist	-	2 (4.55)	1 (2.50)	4 (13.79)	-	7 (4.67)
Total	26 (100)	44 (100)	40 (100)	29 (100)	11 (100)	150 (100)

Source: primary data

The table 1 shows that 59 respondents (39.33 %) are businessmen and of them, 20 respondents have monthly income of Rs. 20,000 – 30,000, 18 respondents have a monthly income of Rs. 30,000 – 40,000, 16 respondents have a monthly income of less than Rs. 20,000 and a mere 5 respondents have a monthly income of Rs. 40,000 – 50,000. Similarly, 57 respondents (38 %) are employees and of them, 21 respondents have monthly income of Rs. 20,000 – 30,000, 16 respondents have monthly income of Rs. 30,000 – 40,000, 9 respondents have monthly income of Rs. 40,000 – 50,000, 7 respondents have monthly income of more than Rs. 50,000 and only 4 respondents have monthly income of less than Rs. 20,000. 27 respondents (18 %) are professionals. Of them, 11 respondents have a monthly income of Rs. 40,000 – 50,000, 6 respondents have monthly income of less than Rs. 20,000, 5 respondents have monthly income of Rs. 30,000 – 40,000 and just 4 respondents have a monthly income of more than Rs. 50,000 while 1 respondent has a monthly income of Rs. 20,000 – 30,000. It is concluded that majority of the respondents have monthly income ranging between Rs. 20,000 and 40,000 and that professionals have more income.

**TABLE 2: INCOME-WISE DISTRIBUTIONS OF THE SAMPLE RESPONDENTS OF LIC**

Approximate monthly income	Number of respondents	Percentage
Less than Rs. 20000	26	17.30
Rs. 20000 - Rs. 30000	44	29.30
Rs. 30000 – Rs. 40000	40	26.70
Rs. 40000 – Rs. 50000	29	19.30
Above Rs. 50000	11	7.30
Total	150	100

Source: primary data

Table 2 shows that 44 respondents (29.30 percent) earn approximate monthly income of Rs. 20000 – Rs. 30000, 40 respondents (26.70 percent) earn a monthly income of Rs. 30000 – Rs. 40000, 29 respondents (19.30 percent) earn between Rs. 40000 – Rs. 50000, 26 respondents (17.30 percent) earn a monthly income of less than Rs. 20000 and 11 respondents (7.30 percent) earn above Rs. 50000 per month.

It is concluded that majority of the respondents (29.30 percent) earn approximately monthly income of Rs. 20000-Rs. 30000.

IMPACT OF INCOME ON SERVICE QUALITY PERCEPTION

Source: primary data

Note: \*\* Significant at 1 percent level, \*Significant at 5 percent level, @-Not significant.

The table 3 shows that the tangibility 'F' value 3.210 and 'P' value 0.015 are significant at 5 percent level. The reliability 'F' value 4.383 and 'P' value 0.002 are significant at 1 percent level. The responsiveness 'F' value 2.956 and 'P' value 0.002 are significant at 1 percent level. The assurance 'F' value 4.992 and 'P' value 0.001 are significant at 1 percent level. The empathy 'F' value 2.323 and 'P' value 0.059 are not significant and the total 'F' value 5.686 and 'P' value 0.000 are significant at 1 percent level. A total variable implies income wise impact on customer perception of LIC.

Hence it can be inferred that income strongly influences the variables tangibility, reliability, responsiveness, assurance and total variables. But income does not influence empathy. Income and empathy differ and they are independent variables. The above table shows the significance is equal to .000. According to the rule if sig. is less than alpha (.000 < .001), we reject null hypothesis. Since the p-value (sig.) is less than 0.01, we can say that there is overwhelming evidence to infer that the alternative hypothesis is true. We can also say that the relationship is highly significant between income and service quality dimension of the customers in LIC. Hence, it is concluded that the significant difference between income wise and service quality dimensions except empathy is not significant.

IMPACT OF GENDER ON SERVICE QUALITY PERCEPTION

TABLE 4: SHOWS THE GENDER-WISE SAMPLE RESPONDENTS OF CUSTOMER PERCEPTION OF LIC MEAN STANDARD DEVIATION AND T-VALUES, P VALUES

	GENDER	N	Mean	Std. Deviation	t-value	p value	sig
TANGIBILITY	Male	97	13.021	2.475	-0.684	0.495	@
	Female	53	13.283	1.747			
RELIABILITY	Male	97	16.165	2.272	2.765	0.006	**
	Female	53	15.151	1.895			
RESPONSIVENESS	Male	97	12.567	2.273	-0.605	0.546	@
	Female	53	12.793	2.003			
ASSURANCE	Male	97	12.959	2.245	3.688	0.000	**
	Female	53	11.528	2.317			
EMPATHY	Male	97	15.546	2.269	0.179	0.858	@
	Female	53	15.472	2.750			
TOTAL	Male	97	70.258	7.319	1.710	0.089	@
	Female	53	68.226	6.222			

Source: primary data

Note: \*\* Significant at 1 percent level, \*Significant at 5 percent level, @-Not Significant.

The table 4 shows the tangibility 't' value - 0.684 and 'P' value 0.495 are not significant. The reliability 't' value 2.765 and 'P' value 0.006 are significant at 1 percent level. The responsiveness 't' value -0.605 and 'P' value 0.546 are not significant. The assurance 't' value 3.688 and 'P' value 0.000 are significant at 1 percent level. The empathy 't' value 0.179 and 'p' value 0.858 are not significant. The total gender-wise variables 't' value 1.710 and 'P' value 0.089 are not significant. This hypothesis that there is no relationship between gender and service quality perception among the customers of LIC in Tirupati is accepted.

## IMPACT OF FAMILY TYPE ON THE PERCEPTION OF SERVICE QUALITY

TABLE 5: FAMILY TYPE – WISE ANALYSIS OF ANOVA RESULTS ON SERVICE QUALITY DIMENSIONS

	Type of Family	N	Mean	Std. Deviation	t-value	p value	sig
TANGIBILITY	Joint	61	13.295	1.626	0.821	0.413	@
	Nuclear	89	12.989	2.583			
RELIABILITY	Joint	61	15.279	1.827	-2.482	0.014	*
	Nuclear	89	16.169	2.356			
RESPONSIVENESS	Joint	61	12.918	1.943	1.266	0.207	@
	Nuclear	89	12.461	2.316			
ASSURANCE	Joint	61	12.508	2.378	0.234	0.815	@
	Nuclear	89	12.416	2.368			
EMPATHY	Joint	61	15.672	1.938	0.631	0.529	@
	Nuclear	89	15.416	2.738			
TOTAL	Joint	61	69.672	4.675	0.191	0.849	@
	Nuclear	89	69.449	8.246			

Source: primary data

Note: \*\* Significant at 1 percent level, \*Significant at 5 percent level, @-Not significant

The ANOVA table 5 shows the reliability 't' value -2.482 and 'p' value 0.014 are significant at 5 percent level. The reliability has substantial relationship with the type of family of sample respondents of LIC. The ANOVA results show that the t and p values for tangibility, responsiveness, assurance, empathy and totals are not significant. Hence, it can be inferred that responsibility, tangibility, assurance, and empathy are related to type of the family of respondent with respect to their perception of service quality of LIC in Tirupati.

## FINDINGS AND SUGGESTIONS

- Majority of the respondents (59.30 percent) belong to nuclear family.
- Majority of the respondents (48 percent) are having 5 members in their family.
- Majority of the respondents (64.70 percent) are males.
- It is concluded that majority of the respondents (29.30 percent) earn a monthly income of Rs. 20000 - Rs. 30000.
- From the analysis one can infer that the monthly income of 44 respondents out of 150 is in the income between Rs. 20000 and Rs. 30000. Of these 21 respondents are Employed and 11 respondents earn income above Rs. 50,000. Only 7 respondents (63.64 percent) out of 11 were employed and only 4 respondents (36.36 percent) were professional in the income range of above Rs. 50,000.
- From the analysis it can be inferred that the highest number of respondents (44) out of 150 respondents, irrespective of their age, are in the income group ranging from Rs. 20000 – Rs. 30000 of whom 18 respondents (40.91 percent) are in the age group of 25 -30 years and only one respondent (2.27 percent) is aged below 25 years. Only 11 respondents out of 150, irrespective of their age fall in the income group of above Rs. 50,000 and only 11 respondents (100 percent) are in the age group of above 35 years. There are no respondents in the group 25 to 35 age group.
- There are many factors which affect consumer investment decision in life insurance and from the study it has been seen that the demographic factors of the people play a major and pivotal role in deciding the purchase of life insurance policies.
- To achieve greater insurance penetration healthier competition has to be intensified by both the sectors and they should come up with new innovative products to offer greater variety or choice to the customers and also make improvement in the quality of services and sell products through appropriate distribution channel to secure advantage for both the parties.
- Insurance companies should devise policies which provide effective risk coverage rather than focusing on the tax benefits and also encourages them for long term investment in insurance.
- Government should bring awareness about the insurance and its importance. The unfavorable feeling of illiterates, daily wage workers can be washed out by educating the households extensively. Government should create awareness about insurance among people sure most of the uninsured have negative attitude as they don't have knowledge about insurance.

## CONCLUSION

It is concluded that majority of the respondents (29.30 percent) earn a monthly income of Rs. 20000 - Rs. 30000. From the analysis one can infer that the monthly income of 44 respondents out of 150 is in the income between Rs. 20000 and Rs. 30000. Of these 21 respondents are Employed and 11 respondents earn income above Rs. 50,000. Only 7 respondents (63.64 percent) out of 11 were employed and only 4 respondents (36.36 percent) were professional in the income range of above Rs. 50,000.

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
