***CHIEF PATRON*****Prof. (Dr.) K. K. AGGARWAL**

Chairman, Malaviya National Institute of Technology, Jaipur  
 (An institute of National Importance & fully funded by Ministry of Human Resource Development, Government of India)  
 Chancellor, K. R. Mangalam University, Gurgaon  
 Chancellor, Lingaya's University, Faridabad  
 Founder Vice-Chancellor (1998-2008), Guru Gobind Singh Indraprastha University, Delhi  
 Ex. Pro Vice-Chancellor, Guru Jambheshwar University, Hisar

***FOUNDER PATRON*****Late Sh. RAM BHAJAN AGGARWAL**

Former State Minister for Home & Tourism, Government of Haryana  
 Former Vice-President, Dadri Education Society, Charkhi Dadri  
 Former President, Chinar Syntex Ltd. (Textile Mills), Bhiwani

***FORMER CO-ORDINATOR*****Dr. S. GARG**

Faculty, Shree Ram Institute of Business & Management, Urjani

***ADVISOR*****Prof. S. L. MAHANDRU**

Principal (Retd.), Maharaja Agrasen College, Jagadhri

***EDITOR*****Dr. R. K. SHARMA**

Professor & Dean, Bharti Vidyapeeth University Institute of Management & Research, New Delhi

***CO-EDITOR*****Dr. BHAVET**

Faculty, Shree Ram Institute of Engineering & Technology, Urjani

***EDITORIAL ADVISORY BOARD*****Dr. CHRISTIAN EHIOBU CHE**

Professor of Global Business/Management, Larry L Luing School of Business, Berkeley College, USA

**Dr. SIKANDER KUMAR**

Chairman, Department of Economics, Himachal Pradesh University, Shimla, Himachal Pradesh

**Dr. JOSÉ G. VARGAS-HERNÁNDEZ**

Research Professor, University Center for Economic & Managerial Sciences, University of Guadalajara, Guadalajara, Mexico

**Dr. RAJENDER GUPTA**

Convener, Board of Studies in Economics, University of Jammu, Jammu

**Dr. D. S. CHAUBEY**

Professor & Dean (Research & Studies), Uttaranchal University, Dehradun

**Dr. TEGUH WIDODO**

Dean, Faculty of Applied Science, Telkom University, Bandung Technoplex, Jl. Telekomunikasi, Indonesia

**Dr. S. P. TIWARI**

Head, Department of Economics & Rural Development, Dr. Ram Manohar Lohia Avadh University, Faizabad

**Dr. BOYINA RUPINI**

Director, School of ITS, Indira Gandhi National Open University, New Delhi

**Dr. KAUP MOHAMED**

Dean & Managing Director, London American City College/ICBEST, United Arab Emirates

**SUNIL KUMAR KARWASRA**

Principal, Aakash College of Education, ChanderKalan, Tohana, Fatehabad

- Dr. MIKE AMUHAYA IRAVO**  
Principal, Jomo Kenyatta University of Agriculture & Tech., Westlands Campus, Nairobi-Kenya
- Dr. M. S. SENAM RAJU**  
Professor, School of Management Studies, I.G.N.O.U., New Delhi
- Dr. NEPOMUCENO TIU**  
Chief Librarian & Professor, Lyceum of the Philippines University, Laguna, Philippines
- Dr. PARVEEN KUMAR**  
Professor, Department of Computer Science, NIMS University, Jaipur
- Dr. ANA ŠTAMBUK**  
Head of Department of Statistics, Faculty of Economics, University of Rijeka, Rijeka, Croatia
- Dr. H. R. SHARMA**  
Director, Chhatarpati Shivaji Institute of Technology, Durg, C.G.
- Dr. CLIFFORD OBIYO OFURUM**  
Professor of Accounting & Finance, Faculty of Management Sciences, University of Port Harcourt, Nigeria
- Dr. SHIB SHANKAR ROY**  
Professor, Department of Marketing, University of Rajshahi, Rajshahi, Bangladesh
- Dr. MANOHAR LAL**  
Director & Chairman, School of Information & Computer Sciences, I.G.N.O.U., New Delhi
- Dr. SRINIVAS MADISHETTI**  
Professor, School of Business, Mzumbe University, Tanzania
- Dr. ANIL K. SAINI**  
Professor, Guru Gobind Singh Indraprastha University, Delhi
- Dr. VIRENDRA KUMAR SHRIVASTAVA**  
Director, Asia Pacific Institute of Information Technology, Panipat
- Dr. VIJAYPAL SINGH DHAKA**  
Dean (Academics), Rajasthan Institute of Engineering & Technology, Jaipur
- Dr. NAWAB ALI KHAN**  
Professor & Dean, Faculty of Commerce, Aligarh Muslim University, Aligarh, U.P.
- Dr. EGWAKHE A. JOHNSON**  
Professor & Director, Babcock Centre for Executive Development, Babcock University, Nigeria
- Dr. ASHWANI KUSH**  
Head, Computer Science, University College, Kurukshetra University, Kurukshetra
- Dr. ABHAY BANSAL**  
Head, Department of Information Technology, Amity School of Engg. & Tech., Amity University, Noida
- Dr. BHARAT BHUSHAN**  
Head, Department of Computer Science & Applications, Guru Nanak Khalsa College, Yamunanagar
- MUDENDA COLLINS**  
Head, Operations & Supply Chain, School of Business, The Copperbelt University, Zambia
- Dr. JAYASHREE SHANTARAM PATIL (DAKE)**  
Faculty in Economics, KPB Hinduja College of Commerce, Mumbai
- Dr. MURAT DARÇIN**  
Associate Dean, Gendarmerie and Coast Guard Academy, Ankara, Turkey
- Dr. YOUNOS VAKIL ALROAIA**  
Head of International Center, DOS in Management, Semnan Branch, Islamic Azad University, Semnan, Iran
- P. SARVAHARANA**  
Asst. Registrar, Indian Institute of Technology (IIT), Madras
- SHASHI KHURANA**  
Associate Professor, S. M. S. Khalsa Lubana Girls College, Barara, Ambala
- Dr. SEOW TA WEEA**  
Associate Professor, Universiti Tun Hussein Onn Malaysia, Parit Raja, Malaysia
- Dr. OKAN VELI ŞAFAKLI**  
Professor & Dean, European University of Lefke, Lefke, Cyprus
- Dr. MOHINDER CHAND**  
Associate Professor, Kurukshetra University, Kurukshetra

**Dr. BORIS MILOVIC**

Associate Professor, Faculty of Sport, Union Nikola Tesla University, Belgrade, Serbia

**Dr. IQBAL THONSE HAWALDAR**

Associate Professor, College of Business Administration, Kingdom University, Bahrain

**Dr. MOHENDER KUMAR GUPTA**

Associate Professor, Government College, Hodal

**Dr. ALEXANDER MOSESOV**

Associate Professor, Kazakh-British Technical University (KBTU), Almaty, Kazakhstan

**Dr. MOHAMMAD TALHA**

Associate Professor, Department of Accounting &amp; MIS, College of Industrial Management, King Fahd University of Petroleum &amp; Minerals, Dhahran, Saudi Arabia

**Dr. ASHOK KUMAR CHAUHAN**

Reader, Department of Economics, Kurukshetra University, Kurukshetra

**Dr. RAJESH MODI**

Faculty, Yanbu Industrial College, Kingdom of Saudi Arabia

**WILLIAM NKOMO**

Asst. Head of the Department, Faculty of Computing, Botho University, Francistown, Botswana

**YU-BING WANG**

Faculty, department of Marketing, Feng Chia University, Taichung, Taiwan

**Dr. SHIVAKUMAR DEENE**

Faculty, Dept. of Commerce, School of Business Studies, Central University of Karnataka, Gulbarga

**Dr. MELAKE TEWOLDE TECLEGHIOGIS**

Faculty, College of Business &amp; Economics, Department of Economics, Asmara, Eritrea

**Dr. BHAVET**

Faculty, Shree Ram Institute of Engineering &amp; Technology, Urjani

**Dr. THAMPOE MANAGALESWARAN**

Faculty, Vavuniya Campus, University of Jaffna, Sri Lanka

**Dr. ASHISH CHOPRA**

Faculty, Department of Computer Applications, National Institute of Technology, Kurukshetra

**SURAJ GAUDEL**

BBA Program Coordinator, LA GRANDEE International College, Simalchaur - 8, Pokhara, Nepal

**Dr. SAMBHAVNA**

Faculty, I.I.T.M., Delhi

**Dr. LALIT KUMAR**

Faculty, Haryana Institute of Public Administration, Gurugram

**FORMER TECHNICAL ADVISOR****AMITA****FINANCIAL ADVISORS****DICKEN GOYAL**

Advocate &amp; Tax Adviser, Panchkula

**NEENA**

Investment Consultant, Chambaghat, Solan, Himachal Pradesh

**LEGAL ADVISORS****JITENDER S. CHAHAL**

Advocate, Punjab &amp; Haryana High Court, Chandigarh U.T.

**CHANDER BHUSHAN SHARMA**

Advocate &amp; Consultant, District Courts, Yamunanagar at Jagadhri

**SUPERINTENDENT****SURENDER KUMAR POONIA**

## CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## GUIDELINES FOR SUBMISSION OF MANUSCRIPT

### 1. **COVERING LETTER FOR SUBMISSION:**

DATED: \_\_\_\_\_

#### **THE EDITOR**

IJRCM

**Subject:** SUBMISSION OF MANUSCRIPT IN THE AREA OF \_\_\_\_\_.

**(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)**

#### **DEAR SIR/MADAM**

Please find my submission of manuscript titled ' \_\_\_\_\_ ' for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

#### **NAME OF CORRESPONDING AUTHOR**

Designation/Post\* :

Institution/College/University with full address & Pin Code :

Residential address with Pin Code :

Mobile Number (s) with country ISD code :

Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No) :

Landline Number (s) with country ISD code :

E-mail Address :

Alternate E-mail Address :

Nationality :

\* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation etc. **The qualification of author is not acceptable for the purpose.**

**NOTES:**

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. **pdf. version is liable to be rejected without any consideration.**
  - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**  
**New Manuscript for Review in the area of** (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
  - c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
  - d) The total size of the file containing the manuscript is expected to be below **1000 KB.**
  - e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
  - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
  - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be typed in **bold letters, centered and fully capitalised.**
  3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) **name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address** should be given underneath the title.
  4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
  5. **ABSTRACT:** Abstract should be in **fully italic printing**, ranging between **150 to 300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA. Abbreviations must be mentioned in full.**
  6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
  7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at [www.aea-web.org/econlit/jelCodes.php](http://www.aea-web.org/econlit/jelCodes.php). However, mentioning of JEL Code is not mandatory.
  8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER. It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
  9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
  10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
  11. **MAIN TEXT:**

**THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:****INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self-explained, and the **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they may follow Harvard Style of Referencing. **Also check to ensure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use (ed.) for one editor, and (ed.s) for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parenthesis.
  - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders before the references.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:**

**BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.
- Hunker, H.L. and A.J. Wright (1963), "Factors of Industrial Location in Ohio" Ohio State University, Nigeria.

### ABSTRACT

Nature does things in an amazing way. Behind the visible phenomena, there are innumerable invisible causes hidden at times. Philosophers and scientists have been observing these phenomena in nature for centuries and trying to understand, explain, adapt and replicate the artificial systems. This paper presents an overview of significant advances made in the emerging field of nature-inspired computing (NIC) with a focus on the physics- and biology-based approaches and algorithms. In this research provides an empirical view of different technology in the nature-inspired algorithm. There are fifteen reviews are collected, studied and analyzed.

### KEYWORDS

K-means, ant algorithm, bee algorithm, firefly algorithm, cuckoo search algorithm nature inspired algorithm.

### 1. INTRODUCTION

Nature inspired computing is the computing which has its foundation in the biological components of nature i.e., humans and animals. Nature has four powerful features which are basic building blocks are the self-optimization, self-healing, self-learning, and self-processing. Nature as the self-optimizer is that it can automatically manage its resources in an efficient manner to meet enterprise need. Nature as a self-healer is as the components of nature on seeing any problem finds a solution and come out of it. Self-learning and self-processing are two related terms. They go hand in hand and moved together. Nature and its components self-processes the changing conditions in the environment learn from the past and present conditions to evolve in the changed environment in natural evolution. as the individuals of nature have the capability to evolve according to the changing environment so in present scenario it is indeed required that computers and their intelligence to learn and involve as per changing conditions and solve highly complex problems as nature does to fulfill this desire, we want our algorithms to adopt the techniques and features from nature and become more effective as shown in the below figure:

FIG. 1: NATURE INSPIRED OF FLOW CYCLE

A convergence to an optimal solution usually depends on the starting solution. Most algorithms tend to get stuck to a locally optimal solution. An algorithm efficient in solving one class of optimization problem may not be efficient in solving others. Algorithms cannot be easily parallelized. Convergence to an optimal solution is designed to be independent of initial population. Nature inspired algorithm in search based algorithm. Population helps not to get stuck to a locally optimal solution can be applied to the wide class of problems without a major change in algorithm. Used can be easily parallelized. The algorithm used for nature optimal solution to the find the value based on the optimal solution in nature-inspired algorithm, efficient manner to meet enterprise need. Nature as a self-healer

is as the components of nature on seeing any problem finds a solution and come out of it. Self-learning and self-processing are two related terms. To an optimal solution is designed to be independent of initial population. Nature inspired algorithm in search based algorithm.

## 2. EVOLUTIONARY ALGORITHMS

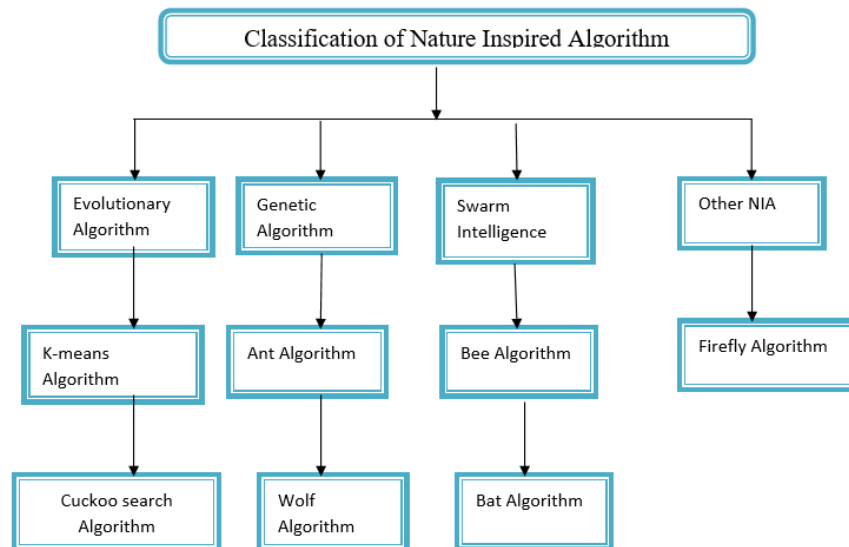

In the origin of species, Charles Darwin stated the theory of natural evolution. Over many stages of life, biological organisms develop according to the principles of natural selection like survival of attaining some astounding form of accomplishment. The best example of natural evolution can be seen in the generation of human beings. So if it works so admirably in nature, it should be interesting to imitate natural evolution and try to procure a technique which may solve existing search and optimization problems. In computer science, evolutionary computation had its foundation in natural evolution. Evolution computing is the common term for a domain of problem-solving techniques based on principles of biological evolution. Evolutionary algorithms are well known and successful algorithms among nature-inspired algorithms. The algorithm nature evolutionary finds the optimization algorithm and problem to solve the efficient and effective the value.

- Genetic algorithms
- Genetic programming
- Evolutionary strategies

## 3. TERMINOLOGIES

- **Individual** - carrier of the genetic information (chromosome). It is characterized by the state in the search space, its fitness (objective function value).
- **Population** - a pool of individuals which allows the application of genetic operators.
- **Fitness function** - The term "fitness function" is often used as a synonym for objective function.
- **Generation** - (natural) time unit of the EA, an iteration step of an evolutionary algorithm.

FIG. 2: CLASSIFICATION OF NATURE INSPIRED ALGORITHM

## 4. APPLICATIONS

Biologically inspired algorithms which exhibit the behavior of various social animals are widely used to solve various problems belonging to diverse domains. These algorithms can be used to solve various benchmark problems such as routing problems, np-hard problems, graph coloring problems, resource constrained and scheduling problems. Also these nature inspired algorithms have been proposed in the field of medicine for detection of tumor, cancer or other diseases which gives better results in comparison to traditional methods. An algorithm which is inspired algorithm by the centroid point algorithm. In the algorithm anything objects taken from the values and the find attribute values used for the attribute values the randomly select the values and find value. Nature inspired algorithm which is inspired algorithm by the centroid point algorithm. In the algorithm anything objects taken from the value in the nature algorithm.

### 4.1 APPLICATIONS ON ALGORITHM INSPIRED BY K-MEANS ALGORITHM

An algorithm, which is, inspired algorithm by the centroid point algorithm. in the algorithm anything objects taken from the values and the find attribute values. Used for the attribute values the randomly select the values and find value. Subdivided point values input the values and next find the formula and find the values. The value finding processed by the attribute values. The centroid values and find experiment value. Last only for clustering is done and the new centroid is obtained. The probability of transition of a virtual and from the node  $l$  to the node  $k$ . experiment, we used the problem of in Slovakia. The final result differs from optimal. An algorithm which is inspired algorithm by the centroid point algorithm.

### 4.2 APPLICATIONS ON ALGORITHM INSPIRED BY ANT COLONY ALGORITHM

An ant algorithm which is inspired by the behavior of ants in colonies is used to solve various kinds of distributed control problems and difficult optimization. For the segmenting the ant colony optimization used for anything the image for detecting of a tumor. And solving the discrete optimization problems. For improving the efficiency of ant colony optimization an approach is proposed for getting better results in of brain. To optimizing the traveling salesman problem, ant system has been utilized, feature extraction from the mammogram images can be easily done by using the nature of ant colonies while searching for food. it can also be implemented for extraction of suspicious regions using an approach which is asymmetric. This algorithm can also be utilized for search procedure and for implementing feature subset selections. Example to solve problems in an efficient & effective manner. During the past few decades, the ant colony optimization is a problem to find the algorithm.

### 4.3 APPLICATIONS ON ALGORITHM INSPIRED BY BEE COLONY ALGORITHM

An algorithm is a path while providing robotic navigation to external vehicles. as the proposed algorithm is derived from the bee colony algorithm and it extracts the best path. This best path is used for retrieving best image from the pool of satellite images so this noisy images and also makes the process more efficient. These approaches are categorized to ant colony optimization particle swarm optimization (PSO), and artificial bee colony approaches for optimization and optimal features subsets. The hybridization of ABC and Quantum Evolutionary Algorithm (QEA) was proposed for solving continuous optimization problems. The experimental results demonstrated that the hybrid (QEA) based on ABC was suitable to solve the problem.

### 4.4 APPLICATIONS ON ALGORITHM INSPIRED BY FIREFLY ALGORITHM

Firefly algorithm is also a population-based algorithm that evaluates the exploratory behavior of fireflies for finding the optimum of target functions. This algorithm can be efficiently used in biometric technology for personal authentication and identification like dorsal hand vein recognition that gives better results when compared with other algorithms. An algorithm based on firefly uses least computation time in compressing the digital images. it produces consistent and more

accurate performance in terms of time and optimality for feature selection. for solving highly nonlinear, multimodal design firefly algorithm provides the best efficiency also have been applied for the optimum design of antenna and shows better performance than other artificial design algorithms. NP-hard problems, multi-objective load dispatch problems, scheduling problems etc. can be easily solved, has better performance and efficiency when solved with firefly algorithm. Also, Firefly algorithms solve the scheduling problems in permutation flow shops and traveling salesman problem in a very promising way. by optimizing the network parameters we can use the firefly algorithm to improve the performance of local linear wavelet neural network for classifying the breast cancer. The firefly used for significant the firefly used the network.

4.5 APPLICATIONS ON ALGORITHM INSPIRED BY CUCKOO SEARCH ALGORITHM

The nature in itself is the best example to solve problems in an efficient & effective manner. During the past few decades, researchers are trying methods that can help human to solve the problems. Applications and to show how traditional methods and nature optimizations the algorithms work in this area. In some of the other aspect, these algorithms have enhanced the performance of each image processing. Multi-objective load dispatch problems, scheduling problems etc. can be easily solved, has better performance and efficiency when solved with firefly algorithm. Also, Firefly algorithms solve the scheduling problems in permutation flow shops and cuckoo search algorithm to find the optimal solution.

5. LITERATURE REVIEW

TABLE 1

| S.no | Application   | Algorithm  | Experiments  | Authors  |
|------|---|--|--|--|
| 1    | Comparative analysis of k-means and genetic Algorithm-based data clustering.                                    | Data clustering, k-means, genetic algorithm.   | A comparative study made on k-means and GA. data objects and 2 variables have been taken for the GA based data clustering, initially with k =2, 4 chromosomes are chosen randomly from the dataset. Clustering is done and the new centroid is obtained  | Dash and Rasmita Dash                                    |
| 2    | Integrating nature-inspired optimization algorithms to k-means clustering                                       | k-means clustering algorithm, firefly optimization, cuckoo optimization, bat optimization, ant colony optimization | The purpose of the experiment is conducted. Six datasets downloaded from the UCI machine-learning repository. The experimental processed ten times to measure the average CPU time was taken and best objective function value best fitness values.  | Rui Tang, Fong, Xin-She Yang, Suash Dab                  |
| 3    | Ant colony optimization algorithms for traveling salesman problem.  | Ant colony optimization  | The probability $p_{ik}$ of transition of a virtual ant from the node $i$ to the node $k$ . experiment, we used the problem of 32cities in Slovakia. The final result differs from optimal exact methods is that ACO algorithm provides relatively good results.                                 | Vorigo M, Stutzle T.                                     |
| 4    | Improving ant colony optimization for brain image segmentation and brain tumor diagnosis.                       | Ant colony optimization  | The proposed algorithm has two main parts. In the first part, the pheromone matrix is made and the second part includes analyzing and converting this matrix to a binary image. Applying a median filter for eliminating also the too proposed algorithm.  | Vincheh,   |
| 5    | Ant colony system a co-operative learning approach to traveling salesman problem.                               | Ant colony optimization  | The experiments on ATSP problems presented in this section have been executed while experiments on tsp problems using only a single processor due to the sequential implementation.  | Dorigo m, Gambardella m.                                 |
| 6    | Embedded feature selection using PSO-KNN: shape-based diagnosis of micro calcification clusters in mammography. | Particle swarm optimization algorithm  | The proposed PSO- KNN feature selection scheme has been tested using clusters for the cluster extracted 27 malignant clusters and 30 are benign. This dataset clusters extracted from 20 digitized results mammograms from a mini-mias database [20] clusters that are obtained from 30 digital. | Imadzyouta, Ikhlas Abdel-Qaderb, Qchristina Jacob, et.al |
| 7    | Lion optimization algorithm (loa): a nature-inspired metaheuristic algorithm                                    | Nature inspired algorithm, ant colony optimization.  | To evaluate the performance of lion optimization algorithm, a comprehensive set of 30 benchmark optimization standard benchmark functions. Provide superior results in fast convergence and global optima achievement, and in all case comparable with other metaheuristics.                     | Maziar Yazdani & Fairborz Jolai.                         |
| 8    | Nature-inspired algorithms: state-of-art, Problems, and prospects.  | Nature inspired algorithm, bat algorithm, ant colony algorithm, firefly algorithm, cuckoo search algorithm.        | Various studies have been performed to estimate the efficiency of nature-inspired algorithms benchmark test problems in order to solve the "curse dimensionality" problem. Table that most of the basic in best experimental in the result.  | Parul Agarwalshikha Mehta.                               |
| 9    | A review of nature-inspired algorithms for clustering   | Cuckoo search, firefly algorithm, bat search algorithm.  | The search of the solution space is started from a more proper area through cuckoo algorithms independent of initial solutions, and the clustering accuracy. Firefly is used for an algorithm in determines input parameters, ability to deal with noise and outliers.                           | Radha A. Pimpale, P.K. Butey.                            |
| 10   | A review on generation of automatic fuzzy rule base from numerical data using nature-inspired approach          | Cuckoo search algorithm.   | The fuzzy rule base from numerical data using nature-inspired approach can be improved algorithm. Fuzzy systems are gaining widespread acceptance in a large variety of fields. Automatic control strategy.  | Aditi Mittal   |
| 11   | Artificial bee colony algorithm, its variants, and applications.  | Bee colony algorithms; nature-inspired algorithm.  | The hybridization of ABC and quantum evolutionary algorithm (QEA) was proposed for solving continuous optimization problems. The experimental results demonstrated that the hybrid QEA based on ABC was suitable to solve the problem.   | Arobolaji et al.   |
| 12   | An efficient dorsal hand vein recognition based on firefly algorithm.   | Firefly algorithm  | In this experiment, the pictures of dorsal hand veins will be tested under the noise and light conditions method, on the other hand, consists of features extraction of dorsal intersections. The firefly clustering algorithm (fa) positions veins features in related class.                   | Zahra Honarpisheh, Karimfaez.                            |
| 13   | Energy-aware model for sensor network: A nature inspired algorithm approach                                     | Ant colony optimization, bees colony optimization.   | The authors implemented the proposed model using research lab dataset for the experiment purposes. This dataset consists of three tables namely location table aggregate connectivity strength table, and sensor data.   | Dore swami and Srinivas Narasegouda.                     |

|    |   |   |  |  |
|----|---|---|--|--|
| 14 | A new population-based nature-inspired algorithm every month: is the current era coming to the end?   | Nature-inspired algorithms, swarm intelligence.   | The new population-based nature-inspired algorithms are released every month and, basically, they have nothing special and no novel features for science. The newest population is counted by near feature.  | iztokfisterjr., urošmlakar, Janez Brest, Iztokfister.  |
| 15 | Nature inspired algorithm for reduction of co2 emission in thermal power station  | Firefly algorithm.  | The firefly algorithm has been applied for optimizing the economic dispatch problem for minimizing the emission level of the thermal power plants. The most simulations proposed firefly algorithm.  | S.palanyappan1, P. Anbalagan                           |
| 16 | A Reminiscent study of nature inspired computation  | The nature-inspired algorithms, swarm intelligence, genetic algorithm.                                  | The nature in itself is the best example to solve problems in an efficient & effective manner. During the past few decades, researchers are trying methods that can help human to solve the problems.  | Shilpi V Gupta, Shweta Bhardwaj, Parul Kalra Bhatia    |
| 17 | Nature inspired optimization algorithms: an insight to image processing applications  | Swarm intelligence optimization algorithms  | Applications and to show how traditional methods and nature optimizations the algorithms work in this area. In some of the other aspect, these algorithms have enhanced the performance of each image processing.  | Manish Dixit Sanjay Silakari Nikita Upadhyay.          |
| 18 | Analyses of nature-inspired intelligence in the domain of path planning and searching in cross country with consideration of various constrained parameters | Cuckoo search, firefly algorithm, bat algorithm.  | The proposed best path while providing robotic navigation to external vehicles. As the proposed algorithm is derived from the Firefly and the cuckoo search algorithm and it extracts the best path. This best path is used for retrieving best image from the pool of satellite | Monica Sood, Dr. Ashish Kr Luhach Dr. Vinod Kr Panchal |
| 19 | Hybrid nature-inspired algorithms and rough set theory in feature selection for classification: a review  | Nature-inspired algorithms, particle swarm optimization, ant colony optimization, bee colony algorithm. | These approaches are categorized to ant colony optimization particle swarm optimization (PSO), and artificial bee colony approaches for optimization and optimal features subsets.   | Ahmed Alia, Adel Taweel                                |

## 6. CONCLUSIONS

The difficult combinatorial optimization problems can be solved using several techniques, but these days, that algorithm that is inspired by the natural behavior gets special importance for their performance. The few of the things are solved in the above literature methods. We finally concluded that the literature review methods showcasing nature-inspired algorithms need improvement on efficiency.

## **REQUEST FOR FEEDBACK**

**Dear Readers**

At the very outset, International Journal of Research in Computer Application & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue, as well as on the journal as a whole, on our e-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our e-mail [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com).

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward to an appropriate consideration.

With sincere regards

Thanking you profoundly

**Academically yours**

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
