b) The sender is required to mention the following in the SUBJECT CO	DLUMN of the mail:

2. MANUSCRIPT TITLE: The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

The total size of the file containing the manuscript is required to be below 500 KB.

Engineering/Mathematics/other, please specify)

e)

3. AUTHOR NAME (S) & AFFILIATIONS: The author (s) full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address should be in italic & 11-point Calibri Font. It must be centered underneath the title.

New Manuscript for Review in the area of (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/

Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.

There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.

The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

4. ABSTRACT: Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

- 5. **KEYWORDS**: Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
- 6. MANUSCRIPT: Manuscript must be in <u>BRITISH ENGLISH</u> prepared on a standard A4 size <u>PORTRAIT SETTING PAPER</u>. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
- 7. **HEADINGS**: All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
- 8. SUB-HEADINGS: All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
- 9. MAIN TEXT: The main text should follow the following sequence:

APPENDIX/ANNEXURE

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed 5000 WORDS.

- 10. **FIGURES & TABLES**: These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure**. **Sources of data should be mentioned below the table/figure**. It should be ensured that the tables/figures are referred to from the main text.
- 11. **EQUATIONS**: These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
- 12. **REFERENCES**: The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
- Use (ed.) for one editor, and (ed.s) for multiple editors.
- When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
- Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
- The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
- For titles in a language other than English, provide an English translation in parentheses.
- The location of endnotes within the text should be indicated by superscript numbers.

KIRTI LALWANI ASST. PROFESSOR SCHOOL OF COMMERCE DEVI AHILYA VISHWAVIDYALAYA INDORE

ABSTRACT

The relationship between stock prices and exchange rates has preoccupied the minds of economists since both play important roles in influencing the development of a country's economy. Many factors, such as enterprise performance, dividends, stock prices of other countries, gross domestic product, exchange rates, interest rates, current account, money supply, employment, their information etc. have an impact on daily stock prices (Kurihara, 2006: p.376). This paper investigates the nature of relationship between stock prices and exchange rates in India. For the purpose of determining relationship between the S & P CNX Nifty and Exchange Rate (USD/INR) the techniques of correlation and regression analysis has been applied. For using the above techniques SPSS tool has been used. The results suggest that there is causal relationship between stock prices and the exchange rate and fluctuations in exchange rate affect the movement of S&P CNX Nifty.

KEYWORDS

Exchange Rate, Financial Market, Stock Exchange.

INTRODUCTION

tock exchange and exchange rate fluctuations are the center of curiosity for researchers and businessman for a long time. Knowledge of exchange rate movement is of immense helpful for both exporter as well as importers, because it is directly related to company's transaction exposure. There are many concepts and theories regarding these two variables (stock exchange value and exchange rate value). This research is carried out by taking S&P CNX Nifty and exchange rate between USD and INR. The reason for selecting S&P CNX Nifty is that it tracks the behavior of a portfolio of blue chip companies, the largest and most liquid Indian securities. The reason for selecting USD and INR is that US dollar is the most readily available currency in the world and most of the trade settlement done in dollar. US dollar is called "vehicle currency" and its quote is easily available in foreign market.

LITERATURE REVIEW

Apte (2001) investigated the relationship between the volatility of the stock market and the nominal exchange rate of India by using the EGARCH specifications on the daily closing USD/INR exchange rate, BSE 30 (Sensex) and NIFTY-50 over the period 1991 to 2000. The study suggests that there appears to be a spillover from the foreign exchange market to the stock market but not the reverse.

Bhattacharya and Mukharjee (2002) studied the nature of causal relation between the stock market, exchange rate, foreign exchange reserves and value of trade balance in India from 1990 to 2001 by applying the co-integration and long-run Granger Non-causality tests. The study suggests that there is no causal linkage between stock prices and the three variables under consideration.

To examine the dynamic linkages between the foreign exchange and stock markets for India, Nath and Samanta (2003) employed the Granger causality test on daily data during the period March 1993 to December 2002. The empirical findings of the study suggest that these two markets did not have any causal relationship.

Yamini Karmarkar and G Kawadia tried to investigate the relationship between RS/\$ exchange rate and Indian stock markets. Five composite indices and five sectoral indices were studied over the period of one year: 2000. The results indicated that exchange rate has high correlation with the movement of stock markets.

STATEMENT OF PROBLEM

One question that always rotates in front of exporters and importers or an export or import dominated company is how exchange rate and stock prices of their company going to change incoming time. The various problems that they might have to face are as follows-

- · How appreciation or depreciation of home currency will affect the share price of any particular company.
- How the inflow or outflow of money from home country affect exchange rate.
- Is there any relation between Indian market or stock market performance and exchange rate?
- Who will more affected because of currency fluctuations export oriented company or import oriented company
- How these two variables behaves in long run and short run.

OBJECTIVE OF THE STUDY

- To find out relationship between S&P CNX Nifty and exchange rate between US Dollar and Indian Rupee.
- To find out that how much S&P CNX Nifty is dependent on US Dollar.

HYPOTHESIS

Hypothesis means pre-thoughts .It means the particular thoughts of researcher on a topic before conducting research/study is hypothesis. The hypothesis of this study is as follows:-

- There is a casual relationship between S&P CNX Nifty and USD/INR.
- S&P CNX Nifty is dependent on USD/INR.

SCOPE OF THE STUDY

The various scope of the study is as follows-

- The finding and various concepts of this study are useful to the importer and exporter
- This study is helpful in currency trading
- Government and various financial institutes can use this concepts in making rules and regulations
- Helpful to RBI for setting monetary policies
- Helpful to figure out total demand and supply of money

SIGNIFICANCE OF THE STUDY

The various significance of the study is as follows-

- This study focuses on two very important variables of the financial market- stock index value and exchange rate.
- Knowledge of fluctuation pattern of stock index and exchange rate will be helpful for people or brokers involved in stock as well as currency trading.
- This study can be used for the forecasting of appreciation or depreciation degree of domestic currency.
- This study will be helpful in generating basics theoretical concepts about stock index movement and exchange rate.

RESEARCH METHODOLOGY

The basic objective of the research is to establish relationship between Indian Stock Market and USD/INR. The representative variables used for the study are closing values of S&P CNX Nifty and USD/INR between the periods of 1st October 2011 to 31st December 2011.

The first step of the research is to find out relationship between CNX Nifty and USD/INR, for that purpose correlation has been used.

Formula

$$r = \frac{N\Sigma dx dy - \Sigma dx.\Sigma dy}{\sqrt{N\Sigma dx^2 - (\Sigma dx)^2}.\sqrt{N\Sigma dy^2 - (\Sigma dy)^2}}$$

After this Linear Regression analysis has been used. It includes any techniques for modeling and analyzing several variables, when the focus is on the relationship between a dependent variable and one or more independent variables. It helps one to understand how the typical value of the dependent variable changes when any one of the independent variables is varied, while the other independent variables are held fixed. In this case USD/INR has been kept constant as it depends on the Macro Economic factors and value of CNX Nifty has been kept dependent on USD/Rs.

Formula

where

Regression Equation
$$y = a + bx$$

Slope (b) = $\frac{N\Sigma XY - (\Sigma X)(\Sigma Y)}{N\Sigma X^2 - (\Sigma X)^2}$
Intercept (a) = $\frac{\Sigma Y - b(\Sigma X)}{N}$

x and y are the variables.

b = The slope of the regression line

a = The intercept point of the regression line and the y axis.

N = Number of values or elements

X = First Score

Y = Second Score

 $\Sigma XY = Sum of the product of first and Second Scores$

ΣX = Sum of First Scores

ΣY = Sum of Second Scores

 ΣX^2 = Sum of square First Scores

RESULTS AND DISCUSSIONS CORRELATIONS

		Exchange Rate	Nifty	
Exchange Rate	Pearson Correlation	1	796**	
	Sig. (2-tailed)		.000	
	N	60	60	
Nifty	Pearson Correlation	796**	1	
Sig. (2-tailed)		.000		
	N	60	60	
**. Correlation is significant at the 0.01 level (2-tailed).				

Interpretation: As it can be seen that the Correlation is - 0.796 which indicates that there is a negative high correlation between S&P Nifty and USD/INR and it indicates that there is an inverse relationship between S&P Nifty and USD/INR, but the value is between moderate and high therefore it can be concluded that there is a casual relationship between S&P Nifty and USD/INR.

REGRESSION

		MOI	DEL SUMMARY			
Model R		R Square	Adjusted R Square	Std. Error of the Estimate		
1	.796°	.633	.627	130.4778045		
a. Pred	lictors: (Con	stant), Exchange	Rate			
			ANOVA ^b			
Model		Sum of Squares	df	Mean Square	F	Sig.
1	Regression	1705993.333	1	1705993.333	100.208	.000ª
	Residual	987418.533	58	17024.457		
	Total	2693411.866	59			
a. Pred	lictors: (Con	stant), Exchange	Rate	•		
b. Dep	endent Varia	able: Nifty				

COEFFICIENTS ^a						
Model		Unstandardized Coefficients		Standardized Coefficients	t	Sig.
		В	Std. Error	Beta		
1	(Constant)	10268.277	532.115		19.297	.000
	ExchangeRate	-104.486	10.438	796	-10.010	.000
a. Dependent Variable: Nifty						

Interpretation: The above result indicates that on every single change in the value of Exchange Rate brings **0.633** changes in the value of S&P CNX Nifty, which shows that changes in the Exchange Rate affects the S&P CNX Nifty but not to a great deal, it is only about 63.3%.

FINDINGS

- 1. After performing the correlation between the one year values of S&P CNX Nifty and Exchange Rate (USD/INR), final correlation (r) comes out is 0.796.
- 2. It shows an inverse relationship between S&P CNX Nifty and movement of Exchange Rate, but the relationship is not very significant. It is kind of moderate relationship, and on the basis of the result we can conclude that there is a casual relationship.
- 3. After performing the Linear Regression between the one year values of S&P CNX Nifty and Exchange Rate (USD/INR) while keeping the Exchange Rate constant, value of r² comes out is 0.633.
- 4. It shows that fluctuation in Exchange Rate does affect the movement of S&P CNX Nifty.
- 5. The relationship between S&P CNX Nifty and Exchange Rate (USD/INR) is only applicable in a considerable span of time.
- 6. It can also be explained by the demand and supply theory that as Nifty starts moving up there would be more demand of INR and consequently the value of INR will get appreciated.
- 7. In reverse case when Nifty drops down then demand of INR will get decreased and consequently INR got depreciated.

SUGGESTIONS

- 1. Exchange rate is complex variable that depends on a number of macroeconomic variables.
- 2. We should also consider the aggregate influence of Interest rate, inflation, money supply, central government policies etc. on exchange rate.
- 3. We can look at the exchange rate by dividing it in to two part- spot exchange rate and forward/future exchange rate.
- 4. We can also include BSE (Bombay Stock Exchange) with Nifty
- 5. Since exchange rate is very active variables, we should take the data for analysis of more than 1 year
- 6. We can also directly link the inflow or outflow of FII and DII on the stock exchange value and consequently to exchange rate
- 7. We can also analyze the effect of major foreign stock exchange performances i.e. Dow Jones industrial average etc. on Indian stock exchange
- 8. We can also analyze the effect of market sentiments on stock performances and finally on exchange rate.
- 9. We can also extend this study up to forecasting part of either stock index or exchange rate movement
- 10. Relationship is more visible or transparent only after analyzing one year data.

CONCLUSION

After conducting the research it can be concluded that, in the second last quarter of the financial year 2010-11 there is casual relationship between S&P Nifty and Exchange Rate and fluctuations in the Exchange Rate does affects the movements in S&P Nifty but not to a great deal. But it can be said that in a long run, there is a very significant relationship between stock index and exchange rate, and a bull market will attract more foreign investment and consequently there will more demand of domestic currency, more demand of local currency will cause it to appreciate and vice-versa.

ACKNOWLEDGMENT

I would like to take this opportunity to express my sincere gratitude to all those who guided me in right direction to complete this dissertation.

It is my good fortune to be an employee of Dr.Vinay Goyal who has given me the encouragement to express my views on the topic "A Study of Relationship between S&P CNX Nifty and Exchange Rate" my sincere thanks for his valuable & inspiring suggestions all through the study.

I also take this opportunity to thank our Directors Mr. Rajnish Khare and Madhur Naneria & the entire Faculties of Altius Institute of Universal Studies for their encouragement & assistance throughout this study.

Finally, I would like to thank my co-author Kirti who was the main source of inspiration for me in writing this paper. I extend my heartfelt thanks to her.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce, Economics and Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue as well as on the journal as a whole, on our E-mail info@ijrcm.org.in for further improvements in the interest of research.

If you have any queries please feel free to contact us on our E-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active cooperation of like-minded scholars, we shall be able to serve the society with our humble efforts.
