ABSTRACT

In relation to the banking sector, the present study has been focused on the impact of monetary policy on the stock market. The research took into account of historical time series data from 2000-2001 to 2018-19. The study examined the relationship between monetary policy and the share capital and banking sector. Historical data from Banks Nifty and the structured monetary policy index were taken into account in the study. The study applied statistical method vector Error Correction Model. The research developed the monetary policy index using the key RBI prices of Repo, Reverse Repo, SLR, M3 and CRR. The Wald test result showed that M3 is primarily a short-term relationship with selected stocks and equity-bank indices, while repo and reverse repo have a long-term relationship with market indices. Accordingly, this study has shown that the key monetary policy rates have a significant relationship to the equity market index, particularly the banking indices. On the basis of many factors, investors in equity markets are making decisions. This present study analyzes the impact of monetary policy on equity markets. The study used the Ordinary Least Square method with the monetary policy key rates on the Bank Nifty indices. Statistics have shown that monetary policy has had a significant positive impact on the nice growth of the bank's index.

PRODUCER'S GAIN IN CONSUMER RUPEE: A CASE STUDY OF TRIBAL CASH CROP

Dr. SHREE KANUNGO
ASST. PROFESSOR
DEPARTMENT OF BUSINESS ADMINISTRATION
AJAY BINAY INSTITUTE OF TECHNOLOGY

ABSTRACT

Turmeric (Curcuma Longa), the wonder herb is cultivated by the tribals of Kandhamal District of Odisha, India since ages. It is viewed as a way of life than a mode of Business. But the tribal farmers are gradually losing interest due to decreasing level of income. They are exploited by the middle men to the extent that "seeds are sold before they are sown", as there is no extension service that is provided by the state government. The present study is undertaken to find out the impact of different independent variables in explaining the DV i.e price received by the ultimate cultivators. The survey was carried out in Kandhamal District. Information were collected from 200 turmeric growers by questionnaire method and the sampling technique used for the study was multistage area sampling. Information collected were analysed by Multiple Regression. It is found that 76 % of variability in the Dependent variable is accounted for by all of the Independent variables taken together.

ABSTRACT

Banking sector is one of the crucial part of nation's economy and also a powerful weapon for the national development as the economic upliftment is rely on the sound financial system. Since Merger & Acquisition use to be a general process of business restructuring, and use to be development strategy among the strategy, so this paper tries to examine the financial performance of Bank of Baroda before (2015 – 2018) and after (2019) the merger with Dena Bank & Vijaya Bank with the help of two sample independent t-test for unequal means. Further, regression analysis has also been used to forecast the post-merger net profit of Bank of Baroda for the period of 2020 to 2025.

THE IMPLICATION OF THE NEW EDUCATION ROADMAP TOWARDS ENTREPRENEURIAL ORIENTATED TRANSFORMATION OF ETHIOPIAN HIGHER EDUCATIONAL INSTITUTIONS

ALEMU TEREDA NISRANE
LECTURER
DEPARTMENT OF MANAGEMENT
WOLKITE UNIVERSITY
WOLKITE

ABSTRACT

Building the future of younger generations is the unalterable role of higher education everywhere. For this purpose, countries develop a plan or strategy in order to harmonize their education system with their development endeavours and comply with the dynamism of the time. Cognizant to this, Ethiopia has also launched a new 'educational roadmap' to transform its educational system to accord with the requirements of 21st century education systems that play roles of transforming the socio-economic development of the nation. This article is therefore, dedicated to explore the basic research question that; to what extent the new Ethiopian Education Roadmap will pave a way for entrepreneurial orientation of Higher Educational Institutions (HEIs) in the country, by employing a method of qualitative document analysis on the draft roadmap document and focus group discussion held in two of the country's public higher educational institutions together with a literature review of various sources. The enquiry is made from the point of view of Clark's (1998) seven tenets of entrepreneurial higher educational institutions and after a thorough discussion on these tenets, the article concluded that beyond addressing the problems of former education system, Ethiopia needs to set up an entrepreneurial ecosystem in the HEIs which demands internally driven transformation in the universities in line with the nation's development aspirations in order to entrepreneurially inspire the graduates and hence control unemployment in particular and alleviate problems of current economic, social and political catastrophes in general.

STUDY ON RISK FACTORS INFLUENCING PROJECTS IMPLEMENTATION IN ETHIOPIA: EVIDENCE FROM CONSTRUCTION PROJECT

KENO TELILA MIJENA
Ph.D. RESEARCH SCHOLAR
DEPARTMENT OF COMMERCE
PUNJABI UNIVERSITY
PATIALA

ABSTRACT

The issues of project and its implementation had received great consideration throughout the country. Thus, the study was executed concerning the construction industry in Ethiopia. The main goal of this study was to discover the influence of construction, commercial, legal, management, lo-gistic, environmental, design, physical location and financial risks on implementation of the construction projects in Ethiopia. The study used quan-titative research approach with primary and secondary data. The primary data was gathered by means of questionnaire from purposely selected 100 Engineers and professionals in the construction ecosys-tem. The secondary data was collected from published materials. The study used multiple re-gression performed by using SPSS-24 statistical tools. The study discovered that the extent of implementation of the construction projects was con-siderably affected by the commercial risk, construction risk, financial risk, management risk, design risk, legal risk, logistics risk, physical location risk and environmental risk in Ethiopia. Thus, the study supposed that parties in construction environment shall give due attention to construction, commercial, management, legal, design, physical location, logistics, financial and environmental uncertainties as they were caused postponement and failure of the project in the country. As a result, to deal with the construction project risks the responsible bodies shall design risk management database scheme since it boosts the efficiency and effectiveness of construction management at every stage of project life cycle.

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
