## CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. [infoijrcm@gmail.com](mailto:infoijrcm@gmail.com) or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

## GUIDELINES FOR SUBMISSION OF MANUSCRIPT

### 1. **COVERING LETTER FOR SUBMISSION:**

DATED: \_\_\_\_\_

**THE EDITOR**  
IJRCM

**Subject:** **SUBMISSION OF MANUSCRIPT IN THE AREA OF.**

**(e.g. Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)**

**DEAR SIR/MADAM**

Please find my submission of manuscript entitled ' \_\_\_\_\_ ' for possible publication in your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published elsewhere in any language fully or partly, nor is it under review for publication elsewhere.

I affirm that all the author (s) have seen and agreed to the submitted version of the manuscript and their inclusion of name (s) as co-author (s).

Also, if my/our manuscript is accepted, I/We agree to comply with the formalities as given on the website of the journal & you are free to publish our contribution in any of your journals.

#### **NAME OF CORRESPONDING AUTHOR:**

Designation:  
Affiliation with full address, contact numbers & Pin Code:  
Residential address with Pin Code:  
Mobile Number (s):  
Landline Number (s):  
E-mail Address:  
Alternate E-mail Address:

#### **NOTES:**

- a) The whole manuscript is required to be in **ONE MS WORD FILE** only (pdf. version is liable to be rejected without any consideration), which will start from the covering letter, inside the manuscript.
- b) The sender is required to mention the following in the **SUBJECT COLUMN** of the mail:  
**New Manuscript for Review in the area of** (Finance/Marketing/HRM/General Management/Economics/Psychology/Law/Computer/IT/Engineering/Mathematics/other, please specify)
- c) There is no need to give any text in the body of mail, except the cases where the author wishes to give any specific message w.r.t. to the manuscript.
- d) The total size of the file containing the manuscript is required to be below **500 KB**.
- e) Abstract alone will not be considered for review, and the author is required to submit the complete manuscript in the first instance.
- f) The journal gives acknowledgement w.r.t. the receipt of every email and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of manuscript, within two days of submission, the corresponding author is required to demand for the same by sending separate mail to the journal.

2. **MANUSCRIPT TITLE:** The title of the paper should be in a 12 point Calibri Font. It should be bold typed, centered and fully capitalised.

3. **AUTHOR NAME (S) & AFFILIATIONS:** The author (s) **full name, designation, affiliation (s), address, mobile/landline numbers, and email/alternate email address** should be in italic & 11-point Calibri Font. It must be centered underneath the title.

4. **ABSTRACT:** Abstract should be in fully italicized text, not exceeding 250 words. The abstract must be informative and explain the background, aims, methods, results & conclusion in a single para. Abbreviations must be mentioned in full.

5. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of five. These should be arranged in alphabetic order separated by commas and full stops at the end.
6. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. It must be prepared on a single space and single column with 1" margin set for top, bottom, left and right. It should be typed in 8 point Calibri Font with page numbers at the bottom and centre of every page. It should be free from grammatical, spelling and punctuation errors and must be thoroughly edited.
7. **HEADINGS:** All the headings should be in a 10 point Calibri Font. These must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
8. **SUB-HEADINGS:** All the sub-headings should be in a 8 point Calibri Font. These must be bold-faced, aligned left and fully capitalised.
9. **MAIN TEXT:** The main text should follow the following sequence:

**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESES****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****SCOPE FOR FURTHER RESEARCH****ACKNOWLEDGMENTS****REFERENCES****APPENDIX/ANNEXURE**

It should be in a 8 point Calibri Font, single spaced and justified. The manuscript should preferably not exceed **5000 WORDS**.

10. **FIGURES & TABLES:** These should be simple, crystal clear, centered, separately numbered & self explained, and **titles must be above the table/figure. Sources of data should be mentioned below the table/figure.** It should be ensured that the tables/figures are referred to from the main text.
11. **EQUATIONS:** These should be consecutively numbered in parentheses, horizontally centered with equation number placed at the right.
12. **REFERENCES:** The list of all references should be alphabetically arranged. The author (s) should mention only the actually utilised references in the preparation of manuscript and they are supposed to follow **Harvard Style of Referencing**. The author (s) are supposed to follow the references as per the following:
  - All works cited in the text (including sources for tables and figures) should be listed alphabetically.
  - Use **(ed.)** for one editor, and **(ed.s)** for multiple editors.
  - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc, in chronologically ascending order.
  - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
  - The title of books and journals should be in italics. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
  - For titles in a language other than English, provide an English translation in parentheses.
  - The location of endnotes within the text should be indicated by superscript numbers.

**PLEASE USE THE FOLLOWING FOR STYLE AND PUNCTUATION IN REFERENCES:****BOOKS**

- Bowersox, Donald J., Closs, David J., (1996), "Logistical Management." Tata McGraw, Hill, New Delhi.

**ABSTRACT**

The history of derivatives may be new for developing countries but it is old for the developed countries. The first derivatives as 'Futures' contracts were introduced in the Yodoya rice market in Osaka, Japan around 1960. The commodity derivatives market has been functioning in India since the nineteenth century with organized trading in cotton. Exchange traded financial derivatives were introduced in India since June 2000 at two major stock exchanges, NSE and BSE. There are various derivative instruments like Index Futures, Stock Futures, Index Options, Stock Options, Interest Rate Futures, Currency Options currently traded in these exchanges. But even after a decade the derivatives are actively engaged by professionals institutional investors. Many retail investors even today are not actively participating in the market because of lack of knowledge and complex nature of Instruments. This study is an attempt to know the retail investors perception and awareness about derivatives market and its instruments.

**KEYWORDS**

Derivatives, Derivatives Market, Institutional Investors, Investor Perception, Retail Investors.

**1. DERIVATIVE MARKETS**

The emergence of the market for derivative products, most notably forwards, futures and can be traced back to the willingness of risk-averse economic agents to guard themselves against uncertainties arising out of fluctuations in asset prices. By their very nature, the financial markets are marked by a very high degree of volatility. Though the use of derivative products, it is possible to partially or fully transfer price risks by looking-in asset prices. As instruments of risk management, these generally do not influence the fluctuations in the underlying asset prices. However, by locking in asset prices, derivative products minimize the impact of fluctuations in asset prices on the profitability and cash flow situation of risk-averse investors. A derivative is financial instrument whose value is 'derived' from another underlying security or a basket of securities. Traders can assume highly leveraged positions at low transaction costs using these extremely flexible instruments. Derivative products like index futures, stock futures, index options and stock options have become important instruments of price discovery portfolio diversification and risk hedging in stock markets all over the world in recent times.

**2. DERIVATIVE INSTRUMENTS****DIAGRAM 1: TYPE OF DERIVATIVE INSTRUMENTS**

Derivative contracts have several variants. The most common variants are forwards, futures, options and swaps. We take a brief look at various derivatives contracts that have come to be used.

**FORWARDS:** A forward contract is a customized contract between two entities, where settlement takes place on a specific date in the future at today's pre-agreed price.

**FUTURES:** A futures contract is an agreement between two parties to buy or sell an asset at a certain time in the future at a certain price. Futures contracts are special types of forward contracts in the sense that the former are standardized exchange-traded contracts.

**OPTIONS:** Options are of two types – calls and puts. Calls give the buyer the right but not the obligation to buy a given quantity of the underlying asset, at a given price on or before a given future date. Puts give the buyer the right, but not the obligation to sell a given quantity of the underlying asset at a given price on or before a given date.

**SWAPS:** Swaps are private agreements between two parties to exchange cash flows in the future according to a prearranged formula. They can be regarded as portfolios of forward contracts. The two commonly used swaps are:

- Interest rate swaps: These entail swapping only the interest related cash flows between the parties in the same currency.
- Currency swaps: These entail swapping both principal and interest between the parties, with cash flows in one direction being in a different currency than those in the opposite directions.

**3. THE PARTICIPANTS IN A DERIVATIVES MARKET**

**Hedgers** use futures or options markets to reduce or eliminate the risk associated with price of an asset.

**Speculators** use futures and options contracts to get extra Leverage in betting on future movements in the price of an asset. They can increase both the potential gains and potential losses by usage of derivatives in a speculative venture.

**Arbitrageurs** are in business to take advantage of a discrepancy between prices in two different markets. If for example, they see the futures price of an asset getting out of line with the cash price, they will take offsetting positions in the two markets to lock in profit.

**4. REVIEW OF LITERATURE**

There are few studies have been conducted to examine the impact of derivative trading on Indian stock markets. Thenmozhi (2002), in her study on the relationship between CNX Nifty futures and the CNX Nifty index finds that derivative trading has reduced the volatility in the cash segment. Gupta (2002) concludes in his study that the overall volatility of the stock market has declined after the introduction of the index futures. Bandivadekarand Ghosh (2003) conclude that while the, futures effect plays a definite role in the reduction of volatility in the case of S & P CNX Nifty, in the case of BSE Sensex where derivative turnover is considerably low, the effect is rather ambiguous. Nath (2003) observed in a study examining the impact of derivative trading at individual stock level, the volatility has come down in the post-derivative trading period for most of the stock. Dr. Avadhani, V.A (2007) in his work explains how Fiscal, Monetary and Credit policies tend to affect the performance of the financial instruments in the capital market (either directly or indirectly) it is observed that, where fiscal policy influence the demand and supply for shares and securities in the market, prevailing interest rate influence the cost of borrowing and investment which is influenced by the monetary policies of the government. Further the credit policy is found to be greatly influencing the liquidity positions in the markets. Bredin, Don, O'reilly, Gerard and Stevenson, Simon (2011) in their study explain how monetary policy has become the main instrument in stabilization of inflationary trends. Papadamou, Stephen and siriopoulous, costas (2012) in their study observed the behavior of the bank after implementation of new monetary policy that the bank goes for an instantaneous reduction in lending mortgage credit, considering real estate lending as a risky long term investment. Further, affecting the short term lending to households and loans and advances extended to firms together, due to the sluggish increase in the relevant lending rates leading to increased demand for funds and impacting the spending and investment activities of both individuals as well as the firms/business centers.

**5. STATEMENT OF PROBLEM**

The global liberalization and integration of financial markets have created new investment opportunities, which in turn require the development of new instruments that are more efficient to deal with increased risks. The most of desired instruments that allow market participants to manage risk in the modern securities trading are derivative instruments. The main logic behind trading is that derivatives reduce risk by providing additional channel to invest with lower trading cost and it facilitates the investors to extend their settlement through the future contracts. They provide extra liquidity in stock market. In India, exchange traded financial derivatives were introduced in the year 2000. But even after 13 years the institutional investors are actively engaged in this market. Only limited retail investor's trade actively in this market. Hence this present study

**6. OBJECTIVES OF STUDY**

- To understand the concept of Derivatives and Derivative Trading.
- To analyze the perception of investors towards investment in derivative instruments and markets.
- To know different types of Financial Derivatives and their trading.

**7. DATA AND METHODOLOGY**

This study is based on primary data. The data was collected from the 180 retail investors from distinct parts of Bangalore. The respondent investors were selected using convenient sampling method. Questionnaire is used to collect the details about awareness and perception of retail investors about various derivative products available for trading in national stock markets. The data collected was analyzed by using sample statistical technologies like percentages and graphs. This study is limited to Bangalore city and it is subject to the views expressed by the respondents.

**8. DATA ANALYSIS AND INTERPRETATION**

**TABLE 1: EDUCATION QUALIFICATION OF RESPONDENTS**

Educational Qualification	No of Respondents	Percentage (%)
Under Graduate	9	5
Graduate	112	62.22
Post Graduate	43	23.89
Professional	16	8.89
Total	180	100

Source: Primary data

**Interpretation:** From the above table it is clear that 62% of respondents are Graduates, very less 5 % are Under Graduates

**TABLE 2: ANNUAL INCOME OF RESPONDENTS**

Annual Income	No of Respondents	Percentage (%)
Below 1,50,000	14	7.78
1,50,000 to 3,00,000	23	12.78
3,00,000 to 5,00,000	86	47.78
Above 5,00,000	57	31.66
Total	180	100

Source: Primary data

**Interpretation:** 47.78% of respondents' annual income is between 3,00,000 to 5,00,000 and followed by 31.66 % respondents income is above 5 lakhs

**TABLE 3: PERCENTAGE OF INCOME AVAILABLE FOR INVESTMENT**

Savings for Investments	No of Respondents	Percentage (%)
Between 5 to 10 %	23	12.78
Between 11 to 15 %	63	35
Between 16 to 20 %	82	45.55
Between 21 to 25 %	7	3.89
More than 25 %	5	2.78
Total	180	100

Source: Primary data

**Interpretation:** From the above table 45.55% of respondents save 16 to 20 % of their income for investments and only 3% of respondents save more than 25% of their income for investments.

**TABLE 4: RESPONDENTS' PURPOSE OF THE INVESTMENT**

Purpose of Investment	No of Respondents	Percentage (%)
Regular Income	75	41.67
Meet future obligations	82	45.56
Capital Appreciation	22	12.22
Others	1	0.55
Total	180	100

Source: Primary data

**Interpretation:** Nearly 46% of respondents investing to meet future obligations and 42% respondents are looking for regular income.

**TABLE 5: INVESTMENT BY RESPONDENTS IN DERIVATIVES**

Investment in Derivatives	No of Respondents	Percentage (%)
Yes	112	62.22
No	68	37.78
Total	180	100

Source: Primary data

**Interpretation:** 62% of respondents are invested in derivatives, and 38% of respondents are not invested in derivatives.

**TABLE 6: REASONS FOR NOT INVESTING IN DERIVATIVES**

Reasons	No of Respondents	Percentage (%)
Not Aware	21	30.88
Not Willing	25	36.76
High Risk	22	32.35
Total	68	100

*Source: Primary data*

**Interpretation:** Nearly 36.76% of respondents are not willing to invest in derivatives, 32.35% of respondents are felt that derivatives are highly risky, 30.88% of respondents not aware of derivatives, so derivatives are highly risky and expected profit or loss is also high.

**TABLE 7: SOURCE OF INFORMATION ABOUT DERIVATIVES**

Source	No of Respondents	Percentage (%)
Friends	52	28.89
News Papers / TV	29	16.11
Broker	35	19.44
While Studying	49	27.22
Others	15	8.33
Total	180	100

*Source: Primary data*

**Interpretation:** 30% of respondents know about derivatives from friends, and 27% of respondents know about derivatives while they are studying.

TABLE 8: SOURCE OF ADVISE BEFORE INVESTING IN DERIVATIVES MARKET

Source of Advice	No of Respondents	Percentage (%)
Brokerage House	49	43.75
Websites	17	15.17
News Networks	37	33.03
Own Social Group	9	8.03
Total	112	100

Source: Primary data

**Interpretation:** Nearly 44% of respondents are usually takes tips from Brokerage Houses, followed by 33% from News Networks and very less 8% of respondents take tips from own social groups, so derivatives are risky instruments that are the reason they are taking tips from Brokerage Houses and News Networks.

TABLE 9: KIND OF RISK INVESTOR PERCEIVE WHILE INVESTING IN DERIVATIVES MARKET

Level of Risk	No of Respondents	Percentage (%)
Low Risk	48	42.85
Moderate Risk	39	34.82
High Risk	14	12.50
Others	11	9.82
Total	112	100

Source: Primary data

**Interpretation:** 42.85% of investors are taking low risk, and 34.82% of investors are taking moderate risk, 12.5% of investors are taking high risk.

TABLE 10: INVESTORS PARTICIPATE IN DERIVATIVES MARKET AS

Participant as	No of Respondents	Percentage (%)
Arbitrageur	28	25
Speculator	40	35.71
Hedger	33	29.46
Investor	11	9.82
Total	112	100

Source: Primary data

**Interpretation:** 36% of investors are speculators in derivatives market, 29% of investors are hedging for their investments, followed by 25% of investors are arbitrageurs.

TABLE 11: INVESTORS' PREFERENCE TOWARDS DERIVATIVE INSTRUMENTS (Choose only one option)

Preference	No of Respondents	Percentage (%)
Index Futures	30	26.78
Index Options	47	41.96
Stock Futures	15	13.39
Stock Options	20	17.85
Total	112	100

Source: Primary data

Interpretation: 42% of investors are more often invest in Index Options, and 27% are more often invest in Index Futures.

TABLE 12: TIME PERIOD CHOOSE FOR DERIVATIVE CONTRACTS BY INVESTORS

Time Period	No of Respondents	Percentage (%)
1 Month	7	6.25
2 Months	24	21.42
3 Months	36	32.14
6 Months	32	28.57
9 Months	6	5.35
12 Months	7	6.25
Total	180	100

Source: Primary data

Interpretation: 32% of investors are taking 3 Months positions. 28.57% of investors are taking 6 Months Positions.

TABLE 13: FREQUENCY OF INVESTMENT IN DERIVATIVES IN A YEAR

- 32% of respondents have lack of knowledge about derivatives, 24% of respondents feel high leverage and high risk, 19% of respondents feel high margins required, 16% of respondents feel derivatives are very complex in nature.

**10. CONCLUSION**

Even though most people look at derivatives with fear, they should understand the fact that derivatives help in shifting the risk to the other party. There are many myths that surround derivative market. All these can be done away with proper system in place. Today institutional investors do most of the derivative transactions. It is very important that even individual investors participates in the derivative market actively and reap the benefits from it. Indian derivative markets have had a very good performance till date, to continue with this same growth individual investors have to be encouraged to enter into trades more often so that they help to drive the economy. After this study it is clear that derivative instruments and derivative markets are not so popular among individual investors. Only educated investors with the help of friends and brokers are investing in this market. The reasons for not investing in this market are lack of knowledge and very complex nature of instruments. Some people have a wrong perception about derivatives. Measures should taken to make sure that the investors get a right picture of the instruments and their risk factors. SEBI and Government should take responsibility to create awareness among investors and need to educate individual investors through different seminars or training programs regarding the advantages and risk factors associated with derivative instruments.

## ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
