FOUNDER PATRON**Late Sh. RAM BHAJAN AGGARWAL**

Former State Minister for Home & Tourism, Government of Haryana
Former Vice-President, Dadri Education Society, Charkhi Dadri
Former President, Chinar Syntex Ltd. (Textile Mills), Bhiwani

CO-ORDINATOR**Dr. BHAVET**

Former Faculty, Shree Ram Institute of Engineering & Technology, Urjani

ADVISOR**Prof. S. L. MAHANDRU**

Principal (Retd.), Maharaja Agrasen College, Jagadhri

EDITOR**Dr. PARVEEN KUMAR**

Professor, Department of Computer Science, NIMS University, Jaipur

CO-EDITOR**Dr. A. SASI KUMAR**

Professor, Vels Institute of Science, Technology & Advanced Studies (Deemed to be University), Pallavaram

EDITORIAL ADVISORY BOARD**Dr. S. P. TIWARI**

Head, Department of Economics & Rural Development, Dr. Ram Manohar Lohia Avadh University, Faizabad

Dr. CHRISTIAN EHIUBUCHE

Professor of Global Business/Management, Larry L Luig School of Business, Berkeley College, USA

Dr. SIKANDER KUMAR

Vice Chancellor, Himachal Pradesh University, Shimla, Himachal Pradesh

Dr. JOSÉ G. VARGAS-HERNÁNDEZ

Research Professor, University Center for Economic & Managerial Sciences, University of Guadalajara, Guadalajara, Mexico

Dr. TEGUH WIDODO

Dean, Faculty of Applied Science, Telkom University, Bandung Technoplex, Jl. Telekomunikasi, Indonesia

Dr. M. S. SENAM RAJU

Professor, School of Management Studies, I.G.N.O.U., New Delhi

Dr. A SAJEEVAN RAO

Professor & Director, Accurate Institute of Advanced Management, Greater Noida

Dr. D. S. CHAUBEY

Professor & Dean (Research & Studies), Uttarakhand University, Dehradun

Dr. CLIFFORD OBIYO OFURUM

Professor of Accounting & Finance, Faculty of Management Sciences, University of Port Harcourt, Nigeria

Dr. KAUP MOHAMED

Dean & Managing Director, London American City College/ICBEST, United Arab Emirates

Dr. VIRENDRA KUMAR SHRIVASTAVA

Director, Asia Pacific Institute of Information Technology, Panipat

Dr. MIKE AMUHAYA IRAVO

Principal, Jomo Kenyatta University of Agriculture & Tech., Westlands Campus, Nairobi-Kenya

Dr. SYED TABASSUM SULTANA

Principal, Matrusri Institute of Post Graduate Studies, Hyderabad

Dr. BOYINA RUPINI

Director, School of ITS, Indira Gandhi National Open University, New Delhi

Dr. NEPOMUCENO TIU

Chief Librarian & Professor, Lyceum of the Philippines University, Laguna, Philippines

Dr. SANJIV MITTAL

Professor & Dean, University School of Management Studies, GGS Indraprastha University, Delhi

Dr. RAJENDER GUPTA

Convener, Board of Studies in Economics, University of Jammu, Jammu

Dr. SHIB SHANKAR ROY

Professor, Department of Marketing, University of Rajshahi, Rajshahi, Bangladesh

Dr. SRINIVAS MADISHETTI

Professor, School of Business, Mzumbe University, Tanzania

Dr. NAWAB ALI KHAN

Professor & Dean, Faculty of Commerce, Aligarh Muslim University, Aligarh, U.P.

MUDENDA COLLINS

Head, Operations & Supply Chain, School of Business, The Copperbelt University, Zambia

Dr. EGWAKHE A. JOHNSON

Professor & Director, Babcock Centre for Executive Development, Babcock University, Nigeria

Dr. A. SURYANARAYANA

Professor, Department of Business Management, Osmania University, Hyderabad

P. SARVAHARANA

Asst. Registrar, Indian Institute of Technology (IIT), Madras

Dr. MURAT DARÇIN

Associate Dean, Gendarmerie and Coast Guard Academy, Ankara, Turkey

Dr. ABHAY BANSAL

Head, Department of Information Technology, Amity School of Engg. & Tech., Amity University, Noida

Dr. YOUNOS VAKIL ALROAIA

Head of International Center, DOS in Management, Semnan Branch, Islamic Azad University, Semnan, Iran

CALL FOR MANUSCRIPTS

We invite unpublished novel, original, empirical and high quality research work pertaining to the recent developments & practices in the areas of Computer Science & Applications; Commerce; Business; Finance; Marketing; Human Resource Management; General Management; Banking; Economics; Tourism Administration & Management; Education; Law; Library & Information Science; Defence & Strategic Studies; Electronic Science; Corporate Governance; Industrial Relations; and emerging paradigms in allied subjects like Accounting; Accounting Information Systems; Accounting Theory & Practice; Auditing; Behavioral Accounting; Behavioral Economics; Corporate Finance; Cost Accounting; Econometrics; Economic Development; Economic History; Financial Institutions & Markets; Financial Services; Fiscal Policy; Government & Non Profit Accounting; Industrial Organization; International Economics & Trade; International Finance; Macro Economics; Micro Economics; Rural Economics; Co-operation; Demography; Development Planning; Development Studies; Applied Economics; Development Economics; Business Economics; Monetary Policy; Public Policy Economics; Real Estate; Regional Economics; Political Science; Continuing Education; Labour Welfare; Philosophy; Psychology; Sociology; Tax Accounting; Advertising & Promotion Management; Management Information Systems (MIS); Business Law; Public Responsibility & Ethics; Communication; Direct Marketing; E-Commerce; Global Business; Health Care Administration; Labour Relations & Human Resource Management; Marketing Research; Marketing Theory & Applications; Non-Profit Organizations; Office Administration/Management; Operations Research/Statistics; Organizational Behavior & Theory; Organizational Development; Production/Operations; International Relations; Human Rights & Duties; Public Administration; Population Studies; Purchasing/Materials Management; Retailing; Sales/Selling; Services; Small Business Entrepreneurship; Strategic Management Policy; Technology/Innovation; Tourism & Hospitality; Transportation Distribution; Algorithms; Artificial Intelligence; Compilers & Translation; Computer Aided Design (CAD); Computer Aided Manufacturing; Computer Graphics; Computer Organization & Architecture; Database Structures & Systems; Discrete Structures; Internet; Management Information Systems; Modeling & Simulation; Neural Systems/Neural Networks; Numerical Analysis/Scientific Computing; Object Oriented Programming; Operating Systems; Programming Languages; Robotics; Symbolic & Formal Logic; Web Design and emerging paradigms in allied subjects.

Anybody can submit the **soft copy** of unpublished novel; original; empirical and high quality **research work/manuscript** **anytime** in **M.S. Word format** after preparing the same as per our **GUIDELINES FOR SUBMISSION**; at our email address i.e. infoijrcm@gmail.com or online by clicking the link **online submission** as given on our website ([FOR ONLINE SUBMISSION, CLICK HERE](#)).

GUIDELINES FOR SUBMISSION OF MANUSCRIPT

1. **COVERING LETTER FOR SUBMISSION:**

DATED: _____

THE EDITOR

IJRCM

Subject: SUBMISSION OF MANUSCRIPT IN THE AREA OF _____.

(e.g. Finance/Mkt./HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)

DEAR SIR/MADAM

Please find my submission of manuscript titled ' _____ ' for likely publication in one of your journals.

I hereby affirm that the contents of this manuscript are original. Furthermore, it has neither been published anywhere in any language fully or partly, nor it is under review for publication elsewhere.

I affirm that all the co-authors of this manuscript have seen the submitted version of the manuscript and have agreed to inclusion of their names as co-authors.

Also, if my/our manuscript is accepted, I agree to comply with the formalities as given on the website of the journal. The Journal has discretion to publish our contribution in any of its journals.

NAME OF CORRESPONDING AUTHOR	:
Designation/Post*	:
Institution/College/University with full address & Pin Code	:
Residential address with Pin Code	:
Mobile Number (s) with country ISD code	:
Is WhatsApp or Viber active on your above noted Mobile Number (Yes/No)	:
Landline Number (s) with country ISD code	:
E-mail Address	:
Alternate E-mail Address	:
Nationality	:

* i.e. Alumnus (Male Alumni), Alumna (Female Alumni), Student, Research Scholar (M. Phil), Research Scholar (Ph. D.), JRF, Research Assistant, Assistant Lecturer, Lecturer, Senior Lecturer, Junior Assistant Professor, Assistant Professor, Senior Assistant Professor, Co-ordinator, Reader, Associate Professor, Professor, Head, Vice-Principal, Dy. Director, Principal, Director, Dean, President, Vice Chancellor, Industry Designation etc. **The qualification of author is not acceptable for the purpose.**

NOTES:

- a) The whole manuscript has to be in **ONE MS WORD FILE** only, which will start from the covering letter, inside the manuscript. ***pdf. version is liable to be rejected without any consideration.***
 - b) The sender is required to mention the following in the **SUBJECT COLUMN of the mail:**
New Manuscript for Review in the area of (e.g. Finance/Marketing/HRM/General Mgt./Engineering/Economics/Computer/IT/ Education/Psychology/Law/Math/other, please specify)
 - c) There is no need to give any text in the body of the mail, except the cases where the author wishes to give any **specific message** w.r.t. to the manuscript.
 - d) The total size of the file containing the manuscript is expected to be below **1000 KB**.
 - e) Only the **Abstract will not be considered for review** and the author is required to submit the **complete manuscript** in the first instance.
 - f) **The journal gives acknowledgement w.r.t. the receipt of every email within twenty-four hours** and in case of non-receipt of acknowledgment from the journal, w.r.t. the submission of the manuscript, within two days of its submission, the corresponding author is required to demand for the same by sending a separate mail to the journal.
 - g) The author (s) name or details should not appear anywhere on the body of the manuscript, except on the covering letter and the cover page of the manuscript, in the manner as mentioned in the guidelines.
2. **MANUSCRIPT TITLE:** The title of the paper should be typed in **bold letters, centered and fully capitalised**.
 3. **AUTHOR NAME (S) & AFFILIATIONS:** Author (s) name, designation, affiliation (s), address, mobile/landline number (s), and email/alternate email address should be given underneath the title.
 4. **ACKNOWLEDGMENTS:** Acknowledgements can be given to reviewers, guides, funding institutions, etc., if any.
 5. **ABSTRACT:** Abstract should be in **fully Italic printing**, ranging between **150 to 300 words**. The abstract must be informative and elucidating the background, aims, methods, results & conclusion in a **SINGLE PARA**. **Abbreviations must be mentioned in full.**
 6. **KEYWORDS:** Abstract must be followed by a list of keywords, subject to the maximum of **five**. These should be arranged in alphabetic order separated by commas and full stop at the end. All words of the keywords, including the first one should be in small letters, except special words e.g. name of the Countries, abbreviations etc.
 7. **JEL CODE:** Provide the appropriate Journal of Economic Literature Classification System code (s). JEL codes are available at www.aea-web.org/econlit/jelCodes.php. However, mentioning of JEL Code is not mandatory.
 8. **MANUSCRIPT:** Manuscript must be in **BRITISH ENGLISH** prepared on a standard A4 size **PORTRAIT SETTING PAPER**. **It should be free from any errors i.e. grammatical, spelling or punctuation. It must be thoroughly edited at your end.**
 9. **HEADINGS:** All the headings must be bold-faced, aligned left and fully capitalised. Leave a blank line before each heading.
 10. **SUB-HEADINGS:** All the sub-headings must be bold-faced, aligned left and fully capitalised.
 11. **MAIN TEXT:**

THE MAIN TEXT SHOULD FOLLOW THE FOLLOWING SEQUENCE:**INTRODUCTION****REVIEW OF LITERATURE****NEED/IMPORTANCE OF THE STUDY****STATEMENT OF THE PROBLEM****OBJECTIVES****HYPOTHESIS (ES)****RESEARCH METHODOLOGY****RESULTS & DISCUSSION****FINDINGS****RECOMMENDATIONS/SUGGESTIONS****CONCLUSIONS****LIMITATIONS****SCOPE FOR FURTHER RESEARCH****REFERENCES****APPENDIX/ANNEXURE****The manuscript should preferably be in 2000 to 5000 WORDS, But the limits can vary depending on the nature of the manuscript.**

12. **FIGURES & TABLES:** These should be simple, crystal **CLEAR, centered, separately numbered** & self-explained, and the **titles must be above the table/figure. Sources of data should be mentioned below the table/figure. It should be ensured that the tables/figures are referred to from the main text.**
13. **EQUATIONS/FORMULAE:** These should be consecutively numbered in parenthesis, left aligned with equation/formulae number placed at the right. The equation editor provided with standard versions of Microsoft Word may be utilised. If any other equation editor is utilised, author must confirm that these equations may be viewed and edited in versions of Microsoft Office that does not have the editor.
14. **ACRONYMS:** These should not be used in the abstract. The use of acronyms is elsewhere is acceptable. Acronyms should be defined on its first use in each section e.g. Reserve Bank of India (RBI). Acronyms should be redefined on first use in subsequent sections.
15. **REFERENCES:** The list of all references should be alphabetically arranged. **The author (s) should mention only the actually utilised references in the preparation of manuscript** and they may follow Harvard Style of Referencing. **Also check to ensure that everything that you are including in the reference section is duly cited in the paper.** The author (s) are supposed to follow the references as per the following:
- All works cited in the text (including sources for tables and figures) should be listed alphabetically.
 - Use (ed.) for one editor, and (ed.s) for multiple editors.
 - When listing two or more works by one author, use --- (20xx), such as after Kohl (1997), use --- (2001), etc., in chronologically ascending order.
 - Indicate (opening and closing) page numbers for articles in journals and for chapters in books.
 - The title of books and journals should be in italic printing. Double quotation marks are used for titles of journal articles, book chapters, dissertations, reports, working papers, unpublished material, etc.
 - For titles in a language other than English, provide an English translation in parenthesis.
 - **Headers, footers, endnotes and footnotes should not be used in the document.** However, **you can mention short notes to elucidate some specific point**, which may be placed in number orders before the references.

ABSTRACT

To mark success in global scenario, there is a need of efficient business processes to be followed by various organisations. In view of the emerging adoption of business process management systems like core, support and network processes, this paper is grounded on theoretical work by using secondary data from available literature on the subject. It also proposes a model depicting interoperability of business process management systems with accounting information systems highlighting the benefits of adopting business process oriented accounting information systems. The study can be of use to solve future issues of quality in accounting information systems through adoption of better business processes. This paper suggests that organisations should obtain knowledge of appropriate information quality dimensions for accounting information systems adoption to improve work performance as it will help organisations to make profits. Hence Accounting Information Systems has to take a new shape- the shape of Business Process Oriented Accounting.

KEYWORDS

accounting information system, business model, business process.

JEL CODES

M10, M15.

INTRODUCTION

Every organisation aim to maximise the efficiency of their business processes as it has become critical to succeed in today's boundary less business scenario. The management always try to perform the activities in the sequence that may help in using resources to create maximum value for their customers. Thus they systematise and formalise in such a way that they regard Accounting Information Systems is not just collection and reporting of financial and non-financial information to organisations but involves economic perspective to each process being followed in their organisation. So they evolve certain control points to provide timely information to decision- makers. Business Process Management researchers and practitioners have pointed out that decision making in Business Process Management lacks an economic perspective (Von Brocke 2007, Buhl et al 2011)

EMERGING ADOPTION OF BUSINESS PROCESS MANAGEMENT SYSTEMS IN ORGANISATIONS

In simple words, a business process is a complete, dynamically coordinated set of activities or logically related tasks that must be performed to fulfil strategic goals of organisations by delivering value to customers. Earl (1994) has classified processes as follows:

- **Core Processes:** They are also called central business operations and directly serve external customers.
- **Support Processes:** These are meant for internal customers and involve supporting activities of core processes.
- **Business Network Processes and Management Processes:** Such processes extend beyond boundaries of organizations which involve customers and other resources that are helpful in company plans.

The definition on Business Process Management by Van Der Aalst (2003) stresses more on informational needs of organizations stating that, "supporting business processes using methods, techniques and software to design, enact, control and analyse operational processes involving humans, organizations, applications, documents and other sources of information".

Thus Business Process Management is an integrated management discipline that uses technology to control and operate through clearly defined rules for Business Processes. BPM is a continuous activity that requires agility to be competitively advantageous according to changing market requirements.

ACCOUNTING INFORMATION SYSTEMS

Activities involving converting raw material into finished goods, the financing cycle form part of Accounting Information Systems Database. Apart from this Accounting Information Systems (AIS) also fulfil two more basic functions:

1. To provide management with informed decision making
2. To provide adequate internal controls

Accounting Information Systems is a tool used by management in Organizations to provide added value in order to generate a competitive advantage for the organization (Stair and Reynolds 2006). Enterprise Resource Planning act as the lifeline for Accounting Information Systems in small and medium enterprises using specific software for accounting. An ERP comprise of several packages which collect data from transactions happening across various functional areas of an organization.

FIGURE 1: SUBSYSTEMS OF ACCOUNTING INFORMATION SYSTEMS

REVIEW OF LITERATURE

Antonio Trigo, Fernando Belfo (2016) in their paper titled, "Accounting Information Systems: Evolving towards a Business Process Accounting" presents a role of Business Process Management and other related technologies towards evolution of Accounting Information Systems. According to them Business Process Management adoption as a management practice is being followed widely by today's organisations. The key benefits of this evolution are the flexibility and agility it provides to various business processes and control points further leads to better decision making due to revelation of both financial and non-financial data.

Meiryani, Muhammed Syaifullah (2015) determines in their study titled, "Influence of Business Process on the quality of Accounting Information Systems" the impact of Business Process to the quality of Accounting Information Systems. Their study is theoretical in nature and based on secondary data. The findings clearly indicates that the business process have a significant effect on the quality of accounting information systems.

Manirath Wongsim, Pawornprat Hongsakon (2015) describes in their research titled, "The adoption of process management for accounting information systems in Thailand" an empirical perspective of management of accounting performance during adoption of accounting information systems within organisations. Case studies of 10 organisations of Thailand have been considered to provide useful insights into the nature of information quality issues in Accounting Information system adoption. Their study significantly makes a contribution to existing literature on information systems by providing evidence on the usefulness of accounting information systems adoption in enhancing the quality of accounting performance.

Christian Sonnenberg, Jan Von Brocke (2014) in their study, "Using event data for accounting in process oriented organisations discussed the conceptual level of integration of Business Process Management and accounting. The paper suggests design science research paradigm and adopts a process accounting model (PAM). The PAM is a data structure which leads to integration of process aware information systems. The paper suffers from technical backing of success of PAM in modern accounting practices but it readily supports its relevance in traditional accounting.

Vincent C Yen (2009) research titled, "An integrated model for Business Process Measurement" combines all relevant single measures into one overall measure. A discussion on factors that leads to difficulties in defining an appropriate evaluation has been done. Also the paper proposes a new approach to create a measure of business process based on business process goal leading to final process score. The limitation of this research is that it failed to find its application in real world.

OBJECTIVES OF THE STUDY

1. To study the influence of Business Process on Quality of Accounting Information Systems.
2. To explore benefits of adopting a business process oriented accounting information system
3. To study relevance of Accounting Information Systems on companies' performance and productivity.

METHODOLOGY

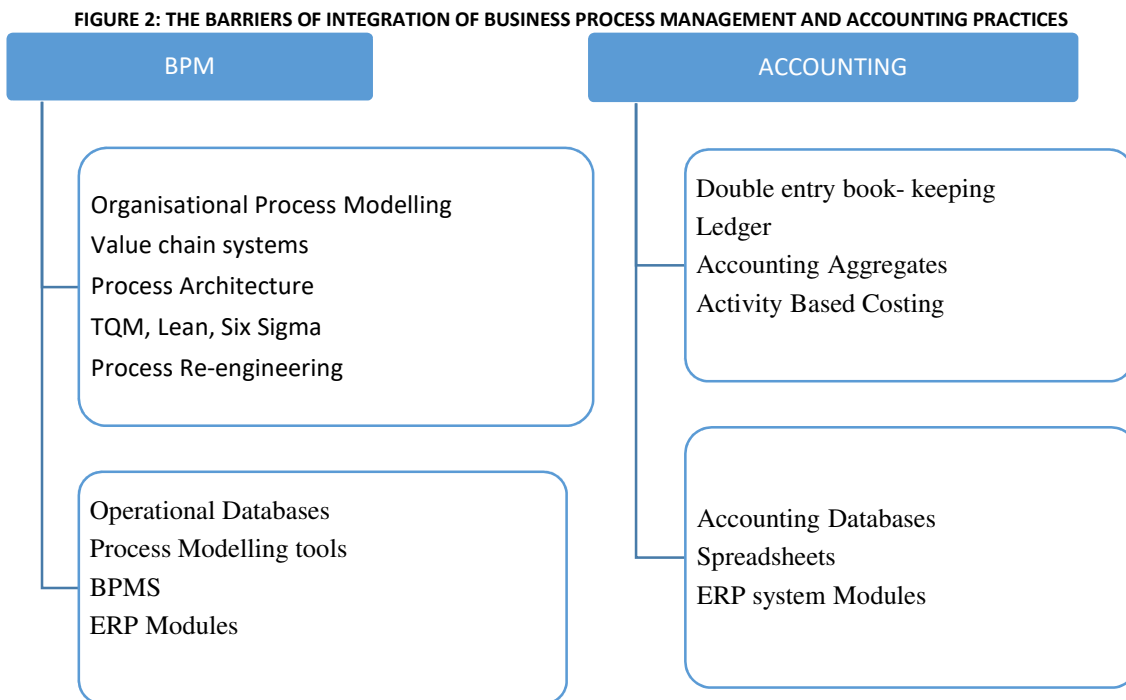

This study is a theoretical work to study the influence of Business Process on Quality of Accounting Information Systems. It involves the use of secondary data from available literature on business process in Accounting Information Systems quality. Descriptive Analysis methodology has been adopted in this study.

LEVERAGING BUSINESS PROCESS MANAGEMENT SYSTEMS THROUGH ACCOUNTING

Accounting may involve in order focusing on entire processes and not on single transactions. Technology makes it possible to log all transactions associated with a particular process and report financial and non-financial aspect regarding the process. E.g. If we focus only on financial data, then price setting policy of a product in an organization will only depend on cost. To know how much a product cost better, we should assess the cost associated at each product processing. So to this, an answer could be ABC (Activity Based Costing) that is a process oriented instead of product oriented. So a Business Process System enables to produce appropriate information called decision making. However still accounting information such as resource expenses, current inventory, resource consumption, current sales are not available in a BPMS making it less useful for economic analysis / economic reciprocity i.e. the idea that processes create not only costs but also income. BPMS through event logs records operational information regarding the processes and task performed in the process.

INTEGRATION OF BUSINESS PROCESS MANAGEMENT AND ACCOUNTING PRACTICES

The barriers of Integration of Business Process Management and Accounting Practices can be summed as follows:

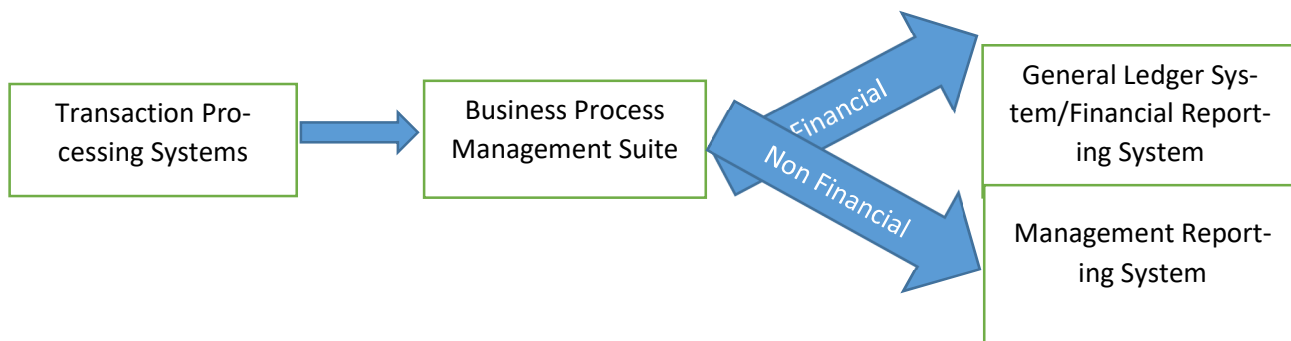

Integration barriers among BPM and accounting on a conceptual level emerge as the two entities differ in understanding of concepts like transactions, activities, process, cost etc. On Information Technology level the main barrier to integration between BPM and accounting is the process aware information systems and AIS are separate entities with weak communication links. Sonnenberg & Brocke (2014) have tried to overcome these barriers through their Process Accounting Model (PAM). Also to overcome the dysfunctional effects, multidimensional approaches to accounting have been proposed which emphasize that accounting should provide disaggregated event data to ensure that the use of accounting data is not limited to only one application. (Mauldin & Ruchala1999)

Sonnenberg & Brocke propose an approach that can be used within BPMS focussed on 'event' concept which is a new event log data structure to satisfy information needs of both accountants and business process managers. The 'event' approach unlike double entry book keeping system aims at producing financial results in a contemporary way where accountants produce information for management guidance and support.

Proposed model on the basis of interoperability where by BPMS supports the new AIS interacting with transaction system in key cycles and filters necessary information to the AIS.

FIGURE 3: PROPOSED MODEL BASED ON INTEROPERABILITY WHERE BY BPMS SUPPORTS THE NEW AIS

BENEFITS OF ADOPTING A BUSINESS PROCESS ORIENTED ACCOUNTING INFORMATION SYSTEM

The study conducted by Belfo & Trigo (2013) highlights the most current tendencies and challenges around accountancy and finance. The following table shows the benefits of adopting a business process oriented accounting based on BPMS grouped by the accounting challenges based on above mentioned study.

TABLE 1: BENEFITS OF ADOPTING BUSINESS PROCESS ORIENTED ACCOUNTING BY ORGANISATIONS

Accounting challenge	Benefits
Accounting operations	BPM increases process flexibility and swiftness diminishing redundancy and cost. BPMS empowers knowledge workers to contribute to the redesigning of accounting operations processes
External and compliance reporting	BPMS allows enforcing compliance in reporting since regulations can be formalized and implemented in the BPMS
Management Accounting	BPM allows management to operate business processes more reliably, faster, efficiently and better operational control. BPMS makes it easier to obtain performance key indicators (PKI) from processes and activities. BPMS improves the automatically allocation of costs and revenues to a specific cost or revenue centre.
Management Support	BPMS improves the formalization and institutionalization of process-related decision making at various organizational levels. BPMS allows obtaining non-financial information from business operations to management. BPMS governance model that embeds technical and managerial capabilities improves organization performance.
Strategic analysis	BPMS event-logs allow optimizing daily business operations through process redesign. BPMS event-logs allow the identification of business needs that can lead to new product ideas.
Forecasting	BPMS provides real-time data, which allows a more targeted and quickly identification of deviations and trends in underlying business operations.
Internal auditing, internal controls and risk management	BPMS allows the establishment of internal controls that enable the automatically generation of alerts or messages to management. Analysis of BPMS event-logs enables management to perform internal auditing and risk management in a more meticulous way. Continuous auditing can be done due to monitoring of Business Activity
Real time reporting	BAM offers the ability to deliver real-time reporting for optimizing business processes.
More non-financial data performance data	BPMS excels when compared to traditional AIS in this function, since they are focused on business processes while traditional AIS are focused on financial transactions and maintenance of ledger.
Tailor-made and interactive reporting	BPMS can contribute to the implementation of functionalities that allow tailor-made and interactive reporting. Knowledge workers may more actively participate on report design.

HOW BUSINESS TRANSACTIONS AND BUSINESS PROCESS COME TOGETHER

To generate financial reports, business transactions can be divided into following business processes:

1. Revenue & return processes, systems and controls: The transactions like large volume of daily sales, returns and cash inflow fall under these business processes.
2. Expenditure & return processes, systems and controls: The business transactions that fall under these business processes are large volume of expenditure, returns and cash flow transactions, payroll and purchase of fixed assets.
3. Conversion processes, systems and controls: It includes raw material and work in progress transactions.
4. Administrative processes, systems and controls: The business transactions that are administrative are investments, borrowing and capital transactions.

KEY FINDINGS

1. Business Processes being followed in organisations have influence on the development of Accounting Information Systems. Thus Accounting Information Systems should be developed in accordance with Business Process Management Systems to gain competitive advantage. This is in sync with the previous findings by Rama & Jones (2006) as they confirm that the business processes are regarded as an important factor affecting the success of Accounting Information Systems.
2. The success of Accounting Information Systems should not only be measured in terms of reduction in costs and resource usage information but also be measured that how effective is Accounting Information Systems towards improvement of business or financial strategy and increase in customer value.
3. In today's changing business scenario, Business Process Management Systems affects inter organisational Accounting Information Systems and redefine the relationship of buyers, sellers and even competitors within an industry.
4. Organisations should obtain knowledge of appropriate information quality dimensions for accounting information systems adoption to improve work performance as it will help organisations to make profits.

CONCLUSION

The convergence of Accounting Information Systems and Business Process Management Systems is still an important concern of business and technological managers. Information Technology in relation to Accounting Information Systems has a positive impact on companies' performance and productivity. Thus Accounting Information Systems has to take a new shape- the shape of Business Process Oriented Accounting. The results of theoretical evidence from this study can be used to solve future issues of quality in Accounting Information Systems through good business process.

REQUEST FOR FEEDBACK

Dear Readers

At the very outset, International Journal of Research in Commerce, IT & Management (IJRCM) acknowledges & appreciates your efforts in showing interest in our present issue under your kind perusal.

I would like to request you to supply your critical comments and suggestions about the material published in this issue, as well as on the journal as a whole, on our e-mail infoijrcm@gmail.com for further improvements in the interest of research.

If you have any queries, please feel free to contact us on our e-mail infoijrcm@gmail.com.

I am sure that your feedback and deliberations would make future issues better – a result of our joint effort.

Looking forward to an appropriate consideration.

With sincere regards

Thanking you profoundly

Academically yours

Sd/-

Co-ordinator

The journal, neither its publishers/Editors/ Editorial Board, nor any other party involved in the preparation of material contained in the journal represents or warrants that the information contained herein is in every respect accurate or complete, and they are not responsible for any errors or omissions or for the results obtained from the use of such material. Readers are encouraged to confirm the information contained herein with other sources. The responsibility of the contents and the opinions expressed in this journal are exclusively of the author (s) concerned.

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
