ABSTRACT

The study examines a general but a serious problem of road accident death in India. Road accidents accounts for about 30% taking place at the national highways and 44% at state highways and about 25% at the other roadways. In most road accidents mainly two wheelers are involved due to rash driving affecting the life of mainly young people. It is in this context, the study focuses on an analysis of the pattern of road traffic accidents, socio-demographic profile of road traffic injury, road safety measures, availability of first aid at the time of critically injured persons, impact of lighting and signage, traffic rules and licensing process, faulty number plates, liquor/drug consumption, working hours and fatigue of driving, it is in the light of the light of the focus of the study. Hypothetical statements have been made to test the empirical situation. Globally, road accidents account for 1.3 million deaths and 50 million injuries. Of this, India's contribution to the fatalities is 11%. The major causes of the accidents on the NHs were vehicle design and condition, road engineering, speeding, drunken driving/ consumption of alcohol and drugs, driving on the wrong side, jumping the red light, use of mobile phones, Poor Signage on no lights on road etc. India's socio-economic cost of road traffic accidents amounts to 0.55–1.35% of the GDP. To study this project N=1000 was collected from Maharashtra, Andhra Pradesh, Tamilnadu, Uttar Pradesh, Delhi & NCR by applying convenient sampling method. Measures of central tendency Mean, Median and Modes was used to calculate the average percentage.

MITIGATING STRESS USING SOCIAL MEDIA: A STUDY OF DIFFERENT AGE-GROUP INDIVIDUALS IN KOLKATA

ABSTRACT

In the above project, a study on the effects of social media in Kolkata with an emphasis on stress is carried out. A Questionnaire is used for data collection for a total number of 100 respondents in total. Different age groups were considered: below 25, 26-35, 36-45, 46-55, above 55 years analysis of data is done in the overall sample as well as for different age groups and comparison is also provided between the overall sample and sample for all groups. Our findings indicate that 64% of the respondents think that social media cannot help us in reducing stress. Although, only the age group of 18-25 in which 53.33% of the respondents mainly consists of individuals from those who just started college to those who just started their first jobs after doing graduation and some post-graduation thinks that social media can help us in reducing stress and at the other extreme 80% of the individuals who belong to the age group of above 55 years thinks that social media cannot be used as a medium to reduce stress.

ABOUT THE JOURNAL

In this age of Commerce, Economics, Computer, I.T. & Management and cut throat competition, a group of intellectuals felt the need to have some platform, where young and budding managers and academicians could express their views and discuss the problems among their peers. This journal was conceived with this noble intention in view. This journal has been introduced to give an opportunity for expressing refined and innovative ideas in this field. It is our humble endeavour to provide a springboard to the upcoming specialists and give a chance to know about the latest in the sphere of research and knowledge. We have taken a small step and we hope that with the active co-operation of like-minded scholars, we shall be able to serve the society with our humble efforts.
